Scene from "The Old Clothes Man" which comes to the Keith Theatre Monday Evening of next week with a strong company.

It's a Real Thanksgiving for the family with a Monarch Range

With a Monarch Range in the kitchen there will be true Thanksgiving in the hearts of cook and guests alike. A woman's pleasure in using this perfect range quite equals her pride in serving the family and guests with the delicious food it prepares. Why not make this a Genuine Thanksgiving in your home? Whatever your cooking arrangements may be, you can improve them—and you ought to do it. It's not as though it were an extravagance to buy the "best range possible"—as a matter of fact you can't afford to use anything else! The Monarch actually does its work with so little fuel that it soon pays back its cost in real money.

The things that a man with a Monarch Range in his kitchen has to be thankful for—

Some features of the Monarch Range that makes the Woman who uses one truly thankful—

It Pleases His Wife Thoroughly

A woman who uses a Monarch Range is more than merely satisfied. She is pleased—enthusiastic about it. She appreciates that she has a range far superior in every respect to the so-called "steel ranges" that her friends are using.

It Cooks his Meals Promptly and Perfectly

No unexpected delays because "the oven wouldn't heat." No spoiled meals that are usually blamed on the cook when the range is really at fault.

Uses so Little Fuel it Pays for Itself

Here's the important thing. This makes the Monarch the range for rich and poor alike. It saves its own cost in a short time and continues to save year after year. It's an investment that yields big returns regularly, long after the principal has been paid back.

The Polished Top

Never requires any stove blackening—yet is always in perfect condition—clean and shiny.

Wellsville Steel Body

Always retains its splendid finish without the use of stove blacking or paint. Most lasting material known for range bodies.

The Duplex Draft

A device found on the Monarch alone which does away with the sifting ashes and keeps the oven uniformly heated

An Air-Tight Oven

With patent non-warping bottom. Seams can never open up to admit drafts, ashes and dust as in a so-called steel range. Assures perfect baking which can be done only in an air-tight oven.

Lower Warming Closet

A convenient storage compartment underneath the oven. With the door open it heats the kitchen like a base burner and can't interfere at all with the baking oven.

SOLD BY JOS. HERSHEY,

Locust and Fifth Streets. Phone 15.

The North Platte Telephone Co., who purchased the Ogalalla Keystone Telephone Co.'s lines, are preparing to re-build the entire system. Manager Warner is now at Omaha buying material for this work and as soon as it arrives a large force of men will be put to work and push the same to an early completion. A new switch board will be placed at central, new phones will be installed and a cable carry all the wires now in town. It will be a metallic system and instead of yelling into the phone a whisper will do as well and better. He hopes to have the entire line rebuilt by January the 1st. —Ogalalla News.
