**Gossard Corsets Now \$3.50**

You need no longer consider Gossard grace and symmetry as an unattainable luxury—you can hereafter afford it for yourself.

The \$3.50 Gossard illustrated above is made to excel every other corset at anything near the price—in style, workmanship and quality. It embodies all the important essentials of Gossard construction—the graceful Gossard lines—the popular front-lace feature—the celebrated non-rustable Electrobone—the dainty Gossard workmanship—all of which have only been obtainable heretofore at prices ranging from \$5.00 to \$25.00.

**THE GOSSARD CORSETS They Lace in Front**

—give the true line of beauty to the figure, following the perfect curve of the back—permit a suppleness entirely lacking in back-laced corsets properly support the spine and abdomen—insure perfect and permanent ease—secure the correct new figure by suppressing superfluous fullness—contribute wonderfully to the elegance of the new gown—and are far easier to put on and take off than the back-laced corsets.

Gossard Corsets have revolutionized erroneous methods of corseting. As a result, better health, correct poise of body, and more solid comfort have come to the women who wear them.

**The Curious Mistletoe.**

The story of how the mistletoe gets on the trees is a most interesting one. Covering the mistletoe twigs are pearly white berries. These come in the winter season, when food is comparatively scarce, and hence some birds eat them freely. Now, when a robin eats a cherry he swallows simply the ment and flaps the stone away. The seed of the mistletoe the bird cannot flip. It is sticky and holds to his bill. His only resource is to wipe it off, and he does so, leaving it sticking to the branches of the tree on which he is sitting at the time. This seed sprouts after a time, and not finding earth—which, indeed, its ancestral habit has made it cease wanting—it sinks its roots into the bark of the tree and hunts there for the pipes that carry the sap. Now, the sap in the bark is the very richest in the tree, far richer than that in the wood, and the mistletoe gets from its host the choicest of food. With a strange foresight it does not throw its leaves away, as do most parasites, but keeps them to use in winter, when the tree is leafless.

**A Queer Diagnosis.**

A celebrated Dublin physician was Sir Dominic Corrigan, who was as much famed for his brusqueness toward patients as for his skill. In the course of some reminiscences William Charles Scully told a story of the doctor which is quite well worth quoting. "I was taken to see him," says the writer, "several times, but he always treated me with the utmost kindness. However, a highly respectable maiden aunt of mine had a different experience. She went to consult him. After sounding her—none too gently—and asking a few questions he gave a grunt and relapsed into silence. Then after a short pause of meditation he said, 'Well, ma'am, it's one of two things—either you drink or else you sit with your back to the fire.'"
