Little Child Fell in a Well
Last Friday Ernie Alexander's two little children, about two and four years old, were playing at their home in the west part of town, and wandered across the street to a vacant house. In a short time the oldest one, who cannot talk plain, came running home screaming. Mrs. Alexander ran over to where the little ones had been playing and found that the little two-year-old had fallen in a shallow well, which fortunately had no water in it. When help was secured and the little one rescued it was found to be uninjured.

High Water
The Missouri river is the highest it has been this year. It is all over the bottom east and southeast of town. The sidetracks and part of the main track of the Burlington railroad are under water. In one place it almost reaches the firebox of the engine. It would be still higher but for its running over the neck of land northeast of Nemaha. The water is said to be six feet deep, running swiftly, and there is a strong probability that a channel will be cut through, and that Nemaha will be left off the main channel. The water was raising rapidly Thursday evening.

The water in the Nemaha river has been in its banks for several days.

Frank Keith is Nearly Drowned
Frank Keith came very near drowning Sunday afternoon. He was in swimming along the Burlington right-of-way near the bridge across the Nemaha south of town, with a number of other young men and boys. Frank got tangled up in some brush and sank. He grabbed Alva Buel came near taking him down, but Alva broke loose from him. Fortunately Ben Baldwin was near, and though he thought at first it was some of the boys fooling, he went to the rescue when he saw Frank was in danger. He caught up a pole that happened to be lying there and shoved it under Frank, who was sinking for the last time. Frank seized it and came near pulling Ben in deep water, but the latter had another young man catch hold of him and together they managed to get Frank to land. He was just about senseless but as soon as he got rid of some of the water he had swallowed he was all right aside from being a little sick and shaky. It was a narrow escape for the young man, as he was rapidly drifting to a barb wire fence on the banks of the Nemaha, and if he had escaped being entangled and held down by this would have gone on into the channel of the Nemaha river.

A Big Yield of Potatoes
The garden spot of the world is around Nemaha. This fact, so well known by those who have been here, is again emphasized by the way potatoes are yielding. Mrs. H. Denny went out in the garden Wednesday forenoon to dig potatoes for dinner, and the first hill she dug into yielded 28 potatoes, the smallest of which were as large as a hen egg. She didn't count the little ones that were considered too small to cook.

"Health Coffee" is really the closest coffee imitation ever yet produced. This clever coffee substitute was recently produced by Dr. Shoop of Racine, Wis. Not a grain of real coffee in it either Dr. Shoop's Health Coffee is made from pure toasted grains, with malt nuts, etc. Really it would fool an expert—who might drink it for coffee. No 20 or 30 minutes tedious boiling. "Made in a minute" says the doctor. Sold by all dealers.
