A fine pony locomotive was turned out of the shops yesterday. It was a six drive-wheeler and was made entirely in the shops. A man who committed a burglary in Akron, Col., a few weeks ago went to McCook, Neb., where he thought himself safe, but a fine diamond ring which he wore led the authorities to suspicion him and a little enquiry led to his arrest and he was returned to Akron.

The slippery snow was last night the cause of an accident, in the B. & M. yards. An extra freight had been made up to go west and was just pulling through the north end of the yards when a brakeman slipped and fell from a car to the ground. He was discovered immediately and the train was stopped and the brakeman taken on board and the train proceeded. Who the man was or how badly he was hurt we were unable to learn.

Plattsmouth Needs Electric Lights.

The subject of electricity for lighting the business houses and streets of Plattsmouth is hardly new to our business men. It has been agitated at intervals for the last five years, and especially so in the last one, and steps have been taken so far in that direction to show that if a plant were established here it would pay from the start. The citizens of Plattsmouth would appreciate and patronize an electric light plant, and the business men know that for clearness of light, lack of care on their part, there is as yet no artificial light to equal it. There is no danger of explosion or leakage and an ignorant person will never blow it out. All our business men want to see Plattsmouth lighted by electricity. Not only because it would be profitable and pleasant for their business houses to be lighted with it, but because they are interested in the advancement of their city and electric lights would be a good advertisement for her. When we think of Crete and Wahoo with their 3000 to 4000 population and Plattsmouth with a population of 8000, and those cities with electric lights and Plattsmouth still in darkness. It seems time for Plattsmouth to make the improvement. It is not because it would not pay here nor is it because business men do not desire it. It must be because an organization has never yet been made here with the determination of securing an electric plant. The value of the time it would take for Plattsmouth citizens to insure success and secure the coming of an electric light plant to Plattsmouth amounts to nothing compared with the benefit it brings when it comes.

Dissatisfied With the Returns.

GRANT, Neb., Nov. 25.—The returns from the precinct on county divisions have created much dissatisfaction in this part of the county. News reached this place to-day of an organization at Lisbon to contest the vote. Ballot box stuffing and minor voting are alleged. While passing up or down Main street you will be well repaid for the time it takes to look at the Xmas and New Year cards displayed only to-day and to-morrow in Phil Young's show window and comprising the finest line ever seen in Plattsmouth, and only a small part of the stock displayed in the store.

A mushroom plantation has been established in a disused railway tunnel at Edinburgh. The mushroom beds occupy about 800 yards of the tunnel, whose total length is about three-quarters of a mile. Near the headwaters of the White river in Alaska is a very large and active volcano which discharges almost continuously great streams of fire, smoke and lava. It is about 300 miles inland.

"Pa," said little Johnny, "teacher is thinking about promoting me." "How do you know?" "From what she said today." "And what was that?" "She said that if I kept on I'd belong to the criminal class." A kitten of Portland, Ore., was seen to charm a rattlesnake. The snake was coiled and with its head followed every motion of the kitten. The kitten seemed to realize the importance of the situation and never allowed her attention to wander from the snake. The snake was killed.

There is an unaccountable and remarkable mortality among the sardines of San Luis Obispo, Cal. They are dying by the thousands, and the shores of the bay are covered with these dead fish to the depth of two or three feet, and the stench is unbearable. The most extensive policeman's star in the United States is said to be the one owned by Marshal John Jolly, of Butte City, Mont. It is of solid gold; has five points; each point has a diamond; and in the center is a program of diamonds. The description indicates that it is worth more than the \$300 at which it is said to be valued.

Large quantities of gunpowder are at present being sunk at the mouth of the Thames by a government steamer. This gunpowder has been accumulating for some years in the magazines at Purfleet, having been returned from stores as deteriorated or unreliable. The government has attempted to find a market for this condemned powder, but no manufacturers were willing to undertake the risk of the process of extracting the saltpeter. Several years ago watermelons were almost unknown in California. An old Missourian, who owned forty acres near Lodi, and who had raised the fruit in old Missouri, planted his whole lot to melons. His neighbors laughed at the idea of melons growing without rain, and he was called the boss crank of the country. But the vines thrived and bore melons—40,000 of them—and he cleared \$20,000 from his forty acres; and now Lodi is the great melon district of the Pacific slope.
