### What Am I To Do?

The symptoms of biliousness are unhappily but too well known. They differ in different individuals to some extent. A bilious man is seldom a break fast cater. Foo frequently, alas, he has an excelient uppetite for liquids but none for solids of a morning. His tongue will hardly bear inspection at any time; if it is not white and furred, it is rough, at all vents.

The digestive system is wholly out of order and diarrhea or constipation may be a symptom or the two may alternate. There are often hemorrhoids or even loss of blood. There may be giddiness and often headache and acidity or flatulence and tenderness in the pit of the stomach To correct all this if not effect a cure try

# **OBJECTIONABLE PETS.**

Mr. Perry was an old bachelor, and Miss Briggs was an old maid. He lived in the orick house on the hill, and she in the ottage opposite, and they were morial memies. He despised her because she opt two cats and a canary, and she athed him for his affection for a huge tastiff and an old knock kneed horse. "Why on earth the man don't try to get a decent horse is more than I can imagine!" she would say, as he plodded up to the door. "I believe that he is too ican and miserly to buy one.

Miss Briggs would have hardly felt leased had she known that Mr. Perry ode back and forward on this worn out iece of horsellesh for the purpose of anoying her.

They never spoke, but yet they manged to keep up a perfect warfare by dis-greeable manners and wrathful glances. She sat hour after hour beneath the anary bird in the window, with her cat perched upon the sill and her knitting in ier hand, throwing glances of scorn to he opposite side, where he, with cigar and newspaper, received and paid them mack with interest.

His detestable dog came over and ran brough her garden, destroying all her seautiful tulips and hyacinths, and she give him a hot bath, which sent him lowling to his master, and when said uster remonstrated, sent word that she vould treat him worse next time.

Her little red cow broke through his nclosure and devoured his turnips and abbages, and he led her home and inormed Miss Briggs that a second offense would give her a comfortable pasture in he pound

For two years they lived and fought, and no one could bring about peace beween them. It was a pity, the neigh-ors all said, for Miss Briggs was a dear ittle soul, and there was not a finer man n the country than Mr. Perry.

"Julia, my love," said Mrs. Perkins one ufternoon, as she entered the cozy paror, "I am going to have a party, and I want you to come down in the afternoon to tea and remain during the evening. Every one will be there.'

"Will the old bach over the way be

"Now, Julia, don't be so foolish! If you remain at home he will think that ou are afraid of him." Miss Briggs thought the matter over. Well, it would look a little like that, and she would not have him think so for he world-the conceited wretch.

forgot the cat and the canary. He only saw a little patient woman, with a pretty face, trim figure and tender hands-and would you believe it-fell in love with her

How could he help it? She had sat by him through the dreary days of pain, she had brought him her preserves and nice, invigorating cordials. She had, in all probability, saved his life.

What could he do? Nothing but fall in 'Miss Briggs!" he said, one day when

he was able to sit up. "Well, Mr. Perry?

"You have been very good to me, and I feel as though I owe you a great deal." "There! now just stop where you are. You owe me nothing."

"But would you mind if I trespassed a little further on your good nature?"

"Not at all. "Well, Miss Briggs, will you take mo in charge for the rest of my life?"

"Whint's "Will you marry me? There!" Miss Briggs blushed, and her answer came thus

"I will marry you." There was a wedding in church a few weeks later, and Mrs. Perkins prepared the wedding supper

Making Cheese in Small Quantity,

Since the establishment of so many reameries and cheese factories throughout the country, cheese making in families has almost become a lost art. The night's and morning's milk may be put together in a large kettle and brought almost to blood heat, when rennet is put in and stirred up with the milk. After that it must not be disturbed again until it has curdled and whey appears on the top and sides of the kettle. Dip this off carefully, so as not to break the curd and cause a whitish whey. This whey may be warmed and turned back to keep up the temperature until the separation of of the whey from the curd is complete, when it is all dipped off again and the hardened curd is cut from time to time into inch squares with a large knife to still further aid in the separation of the

After this the whole is dipped into a coarse strainer cloth, spread in the cheese basket and placed over a tub to drain. It is then chopped in a chopping bowl or rubbed into small pieces and salted ready for the cheese hoops, when it is gently pressed until the whey is all expelled. A dried rennet is soaked in salt and water in a stone jar, and the amount required will depend on its strength and must be arned by experience. A tablespoonful to a gallon of milk is about the usual quantity. When on the shelf to dry the cheese must be rubbed daily with grease nucle from heated butter until it is cured. While a quite small fruit or eider press might be used, it would not be well adapted to the purpose, and a cheap one made by a carpenter would be better.

Young voters of Indiana-those born just after the war-are in the proportion of three to one in favor of the Republican ticket.

It is hard to believe that in the great (state) Dakota there are farmers absolutely in want. Yet such is the case, as Mr. M. J Herpman has just returned from there and reports that untimely frost in August, destroyed the standing gram in several counties. No doubt the people of Dakota will come to the aid of these unfortunate localities, now that th seriousness of the damage is known.

SUGAR is almost as much of a household necessity as bread, and should therefore be made as cheap as possible. The Mills bill provides for a reduction of 18 per cent of the duty on that article, and the Senate substitute provides for a rduction of 50 per cent. No intelligent voter can fail to see at a glance, therefore, which of the two parties is most desirous to lessen the burden of the people and lower the prices of food. The effect of the Mills bill in this respect would be to legislate \$6,000,000 per year into the treasury of the Sugar Trust, while the Republicans aim to give that amount to the people in the form of a saving on their purchases of sugar .- Globe Democrat.

PITTSBURGH Commercial: Every prominent labor representative at Pitts burgh is working for Harrison. Their reason is that they are satisfied with the tariff as it is. Enoch Davis, a guide roller, owns a row of brick houses in one of which he lives; II. A. Loughran, another roller has accumulated \$10,000; Joseph Webbir, who once worked for 16 cents a day in England, is worth \$16,000; W. H. Cready pointed to a planc in his W. H. In the money on his daughter's education as an English mechanic earns; Joseph Dashback, who works as a roller by the day, is also a member of a big furniture firm in Pittsburgh. These men are able to show substantial reasons for leaving the democratic party and standing by protection.

## Men Are Just as Bad.

A woman, speaking of the attacks made apon her sex for their methods of hand ling their skirts or bustles when sitting down, earrying their parasols, and other nabits, says "I think three quarters of such talk is nonsense. I am perfectly sure that men have just as many marked habits as women. What can be more ibsurd, I would like to know, than to see a man, every time he sits town, fling his coat tails wide apart? Then, again, that everlasting twitching at the legs of his trousers so as to pull them up in folds above the knees, and exposing generally the not always attractive top of a pair of shoes, with strings tied in a by no means picturesque knot. To me one of the re pulsive habits is the refolding up of a pulsive nabits is the refolding up of a uandkerchief before replacing in the pocket, which is quite common among men. I always wonder if the user is afraid of getting them mussed or only wants the outside fresh and clean. As regards pulling down cuffs so they will show beneath the sleeve, and similar tricks, are they not every day sights?"-The Argonant.

#### The Turkish Tobacco Business.

The tobacco factories of Cavalla are sorry places on a warm day. As many as 300 men and women may be seen huddled together in stiffing atmosphere engaged in sorting the leaves which the country different factories as many as 4,000 are thus employed-4,000 of the dirtiest and most unwashed vagabonds of creation. I think the ignorance of those who indulge in tobacco concerning the process it has ne through is only to be compared to the bliss of those who enjoy a good dish of macaroni and who have never seen it manufactured at Naples .- Cornhill Magazine.

She walked into Mrs. Perkins' sitting room and found her awaiting her with a smiling face. She thought that she must be in a very good humor, but said noth-ing, allowing the good lady to smile as long and pleasantly as she wished.

She understood it all when supper time came, and Mr. Perkins entered, followed by Mr. Perry. This was a well laid plan to make the two become friends.

Miss Briggs bit her lips and inwardly vowed that nothing should tempt her to "give that man" her hand in friendship. She hated him, and always would.

Crowding Out Small Dealers.

The big shops in Paris have not formed a trust, but, as though by tacit consent, they work together to crowd the small dealers out of business If two or three of the small establishments drop prices to gain trade, they are met by such a reducion on the part of their enemies that they are threatened with ruin and are giad to get back to the former rates. One man, owning a small shop in the vicinity of a successful and wealthy rival, sought to avenge his wrongs a short time ago, and to a certain extent succeeded. On several successive days he passed the big store with a concealed syringe in his pocket, and whenever the opportunity offered he squirted ink on the exposed white goods. In this way considerable fine stock was destroyed before the author of the mischief was discovered .- Chicago News.

## Origin of Yellow Fever,

The latest suggestion concerning the origin of yellow fever comes from Dr. Gabier, a French physician. He believes hat the disease is analogous to cholera; hat it flourishes only under peculiar conditions of race, climate and temperature, and that its first cause is the development of microbes in the intestines. He has received a commission from the French government to go to Florida and study the disease.—Chicago Herald.
