It is annouced at Washington that Speaker Crisp will announcethe committees Wednesday.

It is aunqueced from Washington that the supreme court decision handed down to day.

It has been stated that President Harrison contemplates restoring the duty upon sugar, tea and coffee have not availed themselves of the people into idleness. McKinley hill.

THE-beet sugar industry has been stimulated by the M'Kinley law but if the democratic papers were laboring for the good of the people this should note deter them from supporting the move.

THE declarations of the silver free coinage of silver will not disturb the republicaus. Their fidelity been questioned in the past and it will not be in the future.

Ir is not surprising to see democraffe papers oppose the further extension of the best sugar industry. It would not be true to its past record if it did not oppose every movement caculated to encourage America industries.

The opinion is prevailing in democcatic circles that Gen. Palmer will be chosen as the democratic standard bearer in 32. Senator Palmer has a strong constitution and there is little doubt that he would bear well the inglorious defeat the nominee will sustain.

THE members of the republican party are practically united upon every great question of public concern. As to preferences for a presidential candidate, there can be said stead, to be but little difference. Blaine and Harrison represent the true blue republican sentiment and the republicans will be perfectly satisfied with either.

Ir is expected that Congress free trade congressman will find it necessary to modify his views on the tariff question if he meets the expectations of the speaker. Mr. Crisp is opposed to the repeal of the M'Kinley law and the substitution of a fariff for revenue measure.

It has become generally settled that Wm. Springer will be appointed chairman of the ways and means committee and R. P. Bland, chairman of committee on coinage. If this program be carried out the legitimite results of the election of Speaker Crisp will be realized. It is plainly evident that the majority in the democratic party in congress, expects him to adopt no radical tariff policy. The seclection of Bland to shape a coinage bill is a strong indication that Mr. Crisp does not regret his vote in the last congress in favor of free coinage and that he desires to put such a bill though the house and succeed platform in 'W.

RELICS BY THE WAGON LOAD. nam. Chief of the Department of Ethnology, of the World's Columbian Exposition, a party of men has been making extensive excuvations of the pre-historic mound in Ohio and Indiana, and according to report, received from time to time, most gratitying success has been met with. Many skulls, skeletions, copper hatchets, pipes, orna ments, altura of burnt clay weighing 400 to 500 pounds, flint spear herds, etc., have been secured.

In one mound, situated near Anderson Station, Indiana, 7,212 flint spear heads and knives were discovered. The bulk was so great that it took four horses and a large

length. In the course. t guests assembled at the in length; some of them

Coughs only in Indiana, and show that and Colds, upon this condition. there were from sixty to seventy these detached from each one in trouble, and will use this remedy as finkes detached from each one in order to fushion it.

The largest find of fint implements snade in one place heretofore specimens In one of the caverus copy, one year, not in advance..... \$ 00 occupied by primitive man in the valley of the Seine, below Paris, 2. \$6 00 300 implements were found in one deposit. As it is reasonable to conclude that nearly one day's work was expended on each implement, and as each one exhibits almost absolute perfection as far as flint chipping is concerned, the find will be of special value to ethnological research.

How long cuffee was in use among eastern nations before being introduced in the Boyd-Thayer confest will be into Europe is not known. Aljeziri Alhambali, a noted Arabic author, states that it was first made known about 870 of the Hegira, and so quickly did coffee houses and booths multiply throughout Arabia that the government several times made streamons attempts to supcoming from those countries which press them, fearing they would lead the

Notwithstanding these efforts, the "coffee habit" took such a firm hold on the people that the beverage was made and drank in secret. They even went long distances into the desert and there prepared the seductive concoction without fear of molestation.

Some pious Mohammedans thought it might be included among the intoxicating beverages forbilden by the Koran, but Albambali, in an able pamphlet entitled "The Support of Innocence," miners' conventions in favor of the proved that it was not in the prohibitory section of that book. As a consequence the followers of the prophet once more to the 100-cent dollar has never returned to the delights of coffee. - De-

One Woman's Bedtime Hours.

A lovely woman who was talking with a friend one day about the enjoyments. disappointments and heartaches of childhood, said: "The sufferings I endured when a child were more acute than any I have known in later years, and the pleasantest remembrances I have of these far away times are of the bedtime hours, when my mother sat by our beds in that low roofed chamber and taught on the songs she sung as a child, told stories, some of which were of her childhood, while others were conjured up in her own head. Some of the sweetest hymns and sacred stories I learned then, and there ever comes to me when I close my eyes a faint picture of my devoted mother sitting there in the twilight. I think the only reason that the darkness had no terrors for me was that it nearly always came while she was with us. The sound of her voice dispelled all fear; it was associated with tenderest words, sweetest lullabys, softest good nights." -Anna P. Payne in New England Home-

Art in Telling Lies.

Telling the truth is an art, but not nearly so difficult an art as telling lies. It is within reach of any man's power, if he will take time and pains, to relate the thing that is. It takes a man of imagination and strong memory to bring forth the thing that is not. Besides, the Bryan will get a place upon the fiar cannot carry his lie all over the ways and means committee. The world and back to the creation; at some point or other he must piece it on to the universal truth, and to do that neatly be only part of the greater question as to but the Pain Edit relieved vice and virtue generally. Virtue is for all who love it; in order to become an assumed the matter of the painting of the content of the matter o must be a good workman, but this is accomplished villain a man must have natural aptitude, careful training and immense powers of application, and at any time the villian may be ruined, as a villain, by the unexpected coming to life of conscience.-All the Year Round.

> Silver Bollars 615 Miles High. The freesury counts its silver by weighing it, which is part of wisdom, in view of the fact that a man, counting at the rate of 250 dollar pieces per minute Druggist, Denver. steadily for eight hours per day, Sundays included, would be kept busy for considerably over eleven years.

Piled one upon the other, the \$400,000,-000 in the treasury would attain a height of 675 miles, and placed side by side they would carpet a room 50 feet wide and nearly 24 miles long.—David A. Wells in Harper's Weekly.
