I have been botherd with catarrh for about twenty years. I had lost sense of smell entirely, and I had almost lost my hearing. My eyes were getting so dim I had to get some one to thread my needle Now I have my hearing as well as I ever had, I can ses to thread as fine a needle as ever I could, my sense of smell is partly restored, and it seems to be improving all the time. I think there is nothing like Ely's Cream Baim for catarrh Mrs. E. E. Grimes, Readrill, Perry county, Ohio.

The mouth of the cumul is more than a null above the tails. As far as eoustructed the clust is about 1,500 feet long, 12 feet disp, and varies from a breadth of 200 feet at the mouth to 100 feet at its inner end. Along the sides of this canal and of its branches to be built are sunk jets to a depth of 160 feet, and at the bottom of these pits are placed the turisme water wheels. Each of these wheels has 140 feat effective head of water over it. The water is carried down to them in great pipes seven or eight feet in diameter, called Most of us desire, at one time or penstocks. After the water had done another, to visit a city in which so its work on the wheels it is discharged many persons find homes, and, into the big tunnel, which runs away un-when we do, we can find no better derground to the river below the falls. This tunnel has been the most diffi-

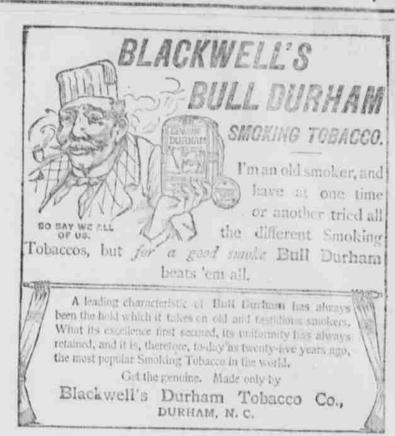

cuit and costly part of the work so far. it was cut through solid limestone rock. but the rock was found to crumble so badly after exposure that the whole 7,000 feet of the tunnel had to be bricked up. It is in the form of a horseshoe. twenty-eight feet high and eighteen feet broad, inside dimensions. Starting at a depth of 160 feet it has a downward slope or pitch of four feet in a thousand at first, increasing to seven feet in a thousand. Its mouth where it disfairs were very much embarrassed charges into the rapids is 214 feet below the brink of the cliffs which form the ravine. Its cross section is 365 square feet, and at the speed of twenty feet a second, with which the water will rush out of it, there will be a discharge of about 50,000 gallons every minute.

And yet this enormous amount of water will not show any appreciable drain whatever on the magnificent volnme of Niagara. It will lower the level of the great flood only about one and a half inches. The extent and constancy of this water power can be understood when it is realized that the water service of the great lakes, with the land sloping into them and contributing to the Falls of Niagara, has a total drainage basin of over 240,000 square miles-equal to more than twice the area of Great Britain and Ireland, about 40. 000 square miles more than the total area of France, and more than fifteen times the total area of Switzerland. The Horseshoe falls are 158 feet high and 2,000 feet wide. The other channel, in the state of New York, forms the American falls, which are 169 feet high at the eastern side, and 1,000 feet wide, both falls comprising 3,600 linear feet of water.

The extreme limits of variation in the depth of the river at different times above the falls are 31/4 feet, but these limits are rarely reached. The ordinary variation is about one foot. Below the falls the extreme variation reaches fifteen feet. Generally a variation of one foot above the falls is followed by a change of level of five feet below the falls. These slight changes are of short duration, and are due mainly to long continued and violent wind or sudden great accumulations of ice.

The average discharge of water at the outlet of Lake Eric into the Niagara river is estimated by some authorities at 265 000 cubic feet a second. Moreover. as far as this or the next two generations are concerned, it doesn't matter whether there is any rainfall, for there are 6,000 cubic miles of water backed up in the little mill pond of the Niagara Falls Power company, which is sufficient to run the falls in their present style for 100 years without the help of another drop from the clouds, -New York Trib-

ELMWOOD NOTES.

Blurwood Erios filler Altendrove over the Enn asper line last night to marry in couple from Lincole.

Lumber is being hanled for a new house to be land; for Bird Critchfield, north of the line residence he jind completed. Durbin Fires, have the empenter contract which insures a good job.

Captain Dan Fells and Captain Dave McCaig, two worthy old veteons of the late war, have recently been placed on the pension pay roll-This is right; it is what we like to sector every man who went to the front man buttle is described of more than a pension.

Mrs. Maraida Donnelly, mother of las, boundly died yesterday aftermoon Lift o'clock of consumption. North Sixth Street, Plattsmouth The decemed was well-known in this city having for a long time past condeher home with her beather, Robt Donnelly. The funeral will TIMOTHY : CLARK, occur temorrew alternoon at 2 o'clock from the residence.

The Bank of Commerce moved in its new quarters two weeks ago and have now got straightened around and fixed up in elegant shape. The fixtures are as fine as can be seen in any much larger city. The building is a credit to the town.

We are pleased to learn that John A. Davies, Esq., was elected representative on the republican ticket at the Piattsmouth, (Neb.) district. John is a Glenwood boy and his many friends. congratulations. Glenwood Opin-

Last evening Mrs. Thomas Ryan received the and intelligence of the death of her brother in Denver, Col., which occurred yesterday morning. She left for Denver this morning accompanied by her husband, sister and son.

It has leaked out that the Omaha brick paving company will make some grand improvements on their plant in this city in the early spring. They have made a thorough test of the clay and find it will makes the best of paving brick.-Louisville [ournal

Try the "Crown" cough cure. Brown & Barret guarantee it.

It is Doubtful.

From present indications it is rather doubtful whether Sixth street will be paved before spring. The rumor to that effect was circulated on the street today and a HERALD reporter asked F. E. White chairman of the board of public works regarding the matter. Mr. White says that the curbing will be set this fall and that the paving will probably not be done before spring. "The contractor" Mr. White says he had bought the Atchison brick and when he had ordered them shipped, found out that they had been sold and that there was a law suit pending over the sale of the brick. Mr. White says he refused to accept anything except the Atchison brick. The contractors have brick in Omaha that the board there refused to accept and they wers offered here but Mr. Whitesaid if they were not good enough for Omaha they were not good enough for Plattsmouth.

Mr. White says that the contractor gave a good bond and that the contractors agreed to stand all damages that may occur by the paying not being done.
