THE World-Herald is making a great ado about a new scheme of their county commissioners as a wonderful plan to collect taxes. It is that of withholding warrants from jurors and witnesses who owe personal taxes and were in the past. If the Omaha folks would come down and interview the Cass county commissioners they might learn still more about administering county affairs economically.

CONGRESSMAN MEIKLEJOHN, in an interview of his own seeking at Lincoln the other day, very considerately stated that he had no designs on the United States senatorship. Ratz! HARRISON ON TWO NOMINATIONS.

One expression in Gen. Harrison's letter of withdrawal will attract some attention apart from that given to the general subject matter of that deliverance, says the Globe Democrat. It is this: "The republican party has twice in National convention given One Year, in advance, . . . . . \$5 00 me its indorsement, and that is enough 50 I think the voters of our party are now 10 entitled to have a new name." A FRENCH scientist thinks he has discovered the secret of one of the premium tricks of the Hindoo fakirs. He watched them plant a seed in a basket of earth and cover it with a cloth. Soon the plant germinated and grew and pushed the cloth up several feet. Then the scientist discovered that a certain kind of earth was used in performing this trick, and that the earth was always secured from ant hills. Ants contain a large amount of formic acid, and their hills in time become charged with it. This acid has the property of greatly stimulating plant life. I fell back exhausted; but, I further argued, might not a stiletto do double duty, much as forks can be used for toothpicks? Presently he laid the pamphlet down. My husband, glancing "Beef Cattle Raising," and a number at the title page, immediately addressed that our fellow traveler was a harmless Dutch dominie. The stiletto proved a paper cutter and the murderous gleam in his eye only the blue light of Calvinism. - Chicago Times-Herald.

#### A Famous French Duelist.

The late Marquis de l'Angle-Beaumanoir was in his younger days famous as a duelist. One evening, meeting his cousin, the Marquis du Hallays, in the foyer of the Opera, he walked up to him and, in the course of conversation, remarked:

"Isn't it odd, my dear fellow, that, never have fought with one another?" "That's true," replied Du Hallays,

'but that can always be remedied." And on the strength of that, the two cousins met in mortal combat on the following morning, the encounter resulting in the Marquis de l'Angle-Beauother occasion, when he was about to fight a duel in which he was entirely in the right and his adversary in the wrong, he suddenly discovered that his opponent and full apology. A fierce storm arose, and the fishing fleet perished. Consequently a new and more or less highland colony, mainly of Chisholmes, came in, and never were such good men as the lost sailors of Fife. For long the unholy day at November was a holiday, nobody daring to go forth to sea.

Such is the legend, which may have no historical basis. In any case Fife fishers and the east coast men generally are considered to be better in a boat than the west highlanders, and Fife enterprise and capital might have left us a more prosperous isle of Lewes .-- London News.

The Schoolboy and the Inspector.

In an Edinburgh school the other day an inspector, wishing to test the knowledge of a class in fractions, asked one boy whether he would rather take a sixth or a seventh part of an orange if he got his choice. The boy promptly replied that he would take the seventh. At this the inspector explained at length to the class that the boy who would choose the smaller part as this boy had done because it looked the larger fraction was very foolish, but the laugh was on the other side when the chirping voice of another urchin broke in in remonstrance, "Please, sir, but that boy disna like oranges."-Westminster Ga-
