#### HAGUE PEACE CONFERENCE.

Some Propositions Agreed to and Others

Rejected. THE HAGUE, July 22.—Baron de Staal presided at the plenary session of the international peace conference yesterday to place the final seal upon the labors of the first committee. The first point M. van Karnebeck's report dealing with prohibition of dropping explosives from balloons, was unani-

mously agreed to.
The second point, prohibition of the use of asphyxiating projectiles, was agreed to by all except the United States and Great Britain, whose abstention nullifies the agreement of the

The third point, which relates to expanding bullets, occupied the major part of the sitting owing to the question of the dumdum bullets used by

the British army. Sir Julian Pauncefote expressed regret that the plenary session had been so suddenly summoned, as the British government had intended to make a statement regarding the dumdum bullet. The conference agreed to leave the minutes of the session open for the insertion of the British statement. Andrew D. White, the head of the United States delegation, then made an important speech in opposition to McCague building, northwest corne prohibition of such bullets as the dumdum. Mr. White's arguments made a great impression on the delegates, especially when he explained that the adoption of the proposal as submitted would not prevent the use of another bullet, which had already been invented and would entail the same end as the dumdum, but in a more cruel manner. The new missile, Mr. White said, was outside the specific definitions of the proposal.

Captain Crozier, the military member of the United States delegation, proposed as a substitute the following: The use of bullets should be prohibwounds, such as explosive bullets, and in general every kind of bullet exceeding the limits necessary to put a man day evening. immediately hors de combat.
