THE LARGEST CIRCULATION of any Cass County Paper.

FRIDAY, MARCH 16, 1900.

SHELDON publishes his first paper today.

AND the next day it snowed. What's the matter with March?

A. H. WECKRACH is a candidate for the nomination for mayor on the democratic ticket.

NEXT Saturday night the republicans expect to nominate a city ticket that will be a winner.

ABOUT all the people have to say about candidates for the council is that we must have good men.

IF THE Boers will surrender unconditionally England will be perfectly satisfied. Her streak of generosity is somewhat lean.

BIXBY says that with some men Bryan's birthday is considered a greater proposition than the Fourth of July or Easter Sunday.

THE populists of Richardson county refused to be absorbed at the convention of the three-ring circus, held at Falls City yesterday. They prefer to stand alone.

EDITOR SHELDON has agreed to meet with the correspondents of eastern papers at 7:30 each evening and give out certain information concerning his work.

REV. CHARLES SHELDON says he is a Christian socialist. He defines a Christian socialist as "one who applies the teachings of the Sermon on the Mount to his daily life."

KENTUCKY is again in a state of comparative quiet, the state legislature having adjourned, pending the decision of the court of appeals in the matter of the governorship.

THE Bee states that the only candidate on the city ticket who ran as a democrat without any fusion indorsement was beaten by a smaller plurality than most of the fusion candidates.

NINE democrats from the east acted with the republicans and passed the "gold bill" yesterday afternoon by a vote of 166 to 120. It is expected that President McKinley will give it his signature today.

A DISPATCH from Sheridan, Wyo., conveys the news that the republicans elected their entire city ticket. For years Sheridan has been a democratic stronghold, hence their great rejoicing in the republican ranks.

GOVERNOR POYNTER doesn't seem to admire Dr. B. F. Lang, superintendent of the institute for feeble minded youths at Beatrice. If the doctor has not reformed since he resided at Weeping Water he is no angel.

THE friends of B. L. Kirkham are urging that he be nominated for city clerk. Mr. Kirkham has been a hustler for the fusionists and his supporters in the convention will be numerous if he cares for the nomination.

THE Chicago Times-Herald states that a Kansas man, with whiskers eight feet long, says he will never shave until Bryan is elected president. Better to have eight foot whiskers and be famous than to have a smooth face and be one of the many.

GOVERNOR POYNTER's being at the head of the new insurance company, known as the Equitable Hail Insurance company, will not be likely to make him more popular in this county. The farmers in this vicinity have had plenty of the hail insurance business.

THE remains of the late William E. Goebel were buried yesterday. The highest spot in the cemetery was selected for interment, and the monument to be erected may be seen from all parts of Frankfort. The members of the legislature attended the services in a body.

THE reduction of grain rates to St. Louis on the part of the Missouri Pacific has brought about a similar reduction by the Burlington to both Chicago and St. Louis. The farmers are correspondingly happy. The reduction on wheat is 5 cents per hundred pounds, and on corn 3 cents.

MISS JULIA E. BRACKEN is said to be the envy of many a Chicago woman today, for she is Chicago's first legally licensed automobile driver. Miss Bracken drove an automobile in the bicycle parade during the fall festival, and took first prize for being the cleverest woman operator. She also captured the prize for the most handsomely decorated vehicle.

SENATOR ALLEN declares he has not deserted free silver at 16 to 1. Republicans want him and Mr. Bryan to continue right along that line. They made so much of the issue four years ago they will have to continue to ad-

vocate the same in order to be consistent. And since none of their predictions as to the result of not adopting their theory has come true, they will necessarily be playing a losing game.

IN PLATTSMOUTH, as in many other cities, it has been the disposition of most of its business men to refuse to serve the city in any capacity, thereby placing the business management in incompetent hands. And then from one year's end to another they find fault with the administration of affairs. They have reason to complain, no doubt, but the responsibility should be placed where it belongs, viz., on their own shoulders.

D. B. SMITH will doubtless be again nominated for a member of the school board, unless he should refuse to serve the city longer in that capacity.

HON. R. B. WIDNHAM is being talked of for councilman for the First ward. Probably no better man could be suggested.

W. J. BRYAN will speak in Deadwood, S. D., March 21.

INFORMATION AND OPINION.

Turpin, the inventor of melinite, is said to be with the Boers. The petroleum bombs fired at Kimberley are attributed to him. Great Britain was the only power that offered him compensation for his discovery.

An Idaho tramp who was injured on a railroad train while stealing a ride, has brought suit for damages, alleging that his mishap was due to the negligence of the company's employes. He says that, although he knew where he was, and that he ought to be put off, they did not put him off.

Prospectors are boring for zinc in four counties in Northern Arkansas, and within the last year several changes in the ownership of the land has resulted in consequence. One syndicate is said to have purchased 13,000 acres of land.

Congressman Devries of California introduced a joint resolution for the repeal of duties on white or printing paper and the material from which it is made, and directing the attorney general to proceed under the anti-trust law against those maintaining a monopoly in such paper and material.

A St. Louis judge has ruled that if a husband be locked out by his wife he may chop down the door, if necessary, to gain entrance—but he has to pay for the door.

Burlington, N. Y., will not collect any taxes this year, the saving on appropriations having gone on so long that the township has sufficient funds to run all departments.

A western man has patented a warming device for raising bread, having a lamp set in the bottom of the casing, with a number of trays to carry the dough, arranged in a tier in an upper compartment, the heat circulating around the trays and passing off at the top.

Two New York men have devised a fire-escape truck, with a telescoping vertical shaft, which can be extended to the required height and carries a horizontal bracket arm, on which a pulley is mounted to carry a basket attached to a wire rope to lower persons from the windows.

"Free bread funds for the poor" seem to have passed away with Coxey's army. It was in 1894, under a democratic low tariff, that the lamp posts in New York's streets were decorated with such signs and with contribution boxes to receive the funds. At the same time the great New York democratic dailies were collecting free clothes for the men who were unemployed under free trade.

It is recorded that a farmer in Fulton county, Ohio, recently sold 125 head sheep for \$800, being an average \$6.40 per head. The farmers there say that under the Wilson free trade period that number of sheep would not have brought to exceed \$125, and the owner would have had to look around a long while for a purchaser at any price.

A new fad is that of having the eye photographed. Young girls now are sending photographs of their eyes, only one in the photograph, to their friends. If sent anonymously a great deal of fun is obtained in guessing who it is. Small evening parties are entertained with a collection of the photographs of the eyes of those present, and guessing contests with prizes, make up the game. The pictures are numbered and the tally cards have corresponding numbers. Even with the originals present it is puzzling.

Leziness has never been looked upon lightly by the Dutch. They once had a rough-and-ready but perfect cure for begging. When a strong, able-bodied man was caught in the act of asking alms, he was forthwith cast into a pit. At the top of the pit was a tap, which was turned upon the man. At the bottom of the pit was a pump, by means of which the water could be pumped out. The beggar was thus in a tight hole. If he refused to work the pump he stood a good chance of being drowned, if he worked the pump for an hour or two he was likely enough to learn a lesson that hitherto he had not cared for. Generally, the beggar gladly left his leziness in the pit. The water cure worked wonders.

CAUSES OF THE BOER WAR.

Right of Trial By Jury Insisted Upon—Extortionate Taxation Opposed.

The following statement from a Presbyterian paper published in Chicago, sums up with commendable brevity and accuracy, the points at issue in the South African war:

Six principal points are involved in the arbitration precipitated by the formal declaration of war by the Boer government. They are:

First—Taxation without representation. The British government demanded for British subjects that they be rectified. This was what was meant by the diplomatic controversy over the "franchise." The Boers, finally made the concession that five years of residence and the oath of allegiance to the Boer republic should entitle an outlander to vote. But this concession was placed under limitations which practically nullified it. It was not an honest offer. The imperial government demanded a five year limit to political incompetency, and that the ballot should not be subjected to any nullifying conditions. This the Boers refused, unless the imperial government should renounce suzerainty. The latter refused to discuss that question and the Boers then withdrew the offer.

Second—Trial by jury. British subjects are allowed a trial by a jury of their peers, and under the laws of all English speaking people. A British subject under the Boer oligarchy must be tried by a jury of Boers.

Third—Education. In the public schools the English language is not allowed. As the population of Johannesburg is twenty English to one Boer, this was a virtual exclusion of English children from the schools. The imperial government demanded, on behalf of British subjects, that the two languages should stand on an equality—English speakers to have the same benefits as those exclusively given to the Dutch. This was refused.

Fourth—Municipal government. There are only about 1,000 Boers in Johannesburg, to 23,000 outlanders. The Boer government clung to its exclusive right to govern the English city without the consent of the governed.

Fifth—Extortionate taxation. Before the English discovered and developed the Kimberly and Witwatersrand mines the total income of the Boer government was about \$6,000,000. It is now four times that amount, or a levy upon the outlanders of \$19,000,000 per annum, in the expenditures of which the taxpayers are allowed no voice.

Sixth—Slavery. Though this does not appear in the diplomatic discussion, it has affected the sentiments of British subjects towards the Boers. The natives are practically enslaved by them. They call it "apprenticeship," but native youth are held to work and labor during the most effective period of their lives, namely, till the age of twenty-eight. After that age they are held to service by terrorism in many, if not most, instances. This is highly repugnant to the British constitution, whose glory has long been that no slaves can tread on British soil. The earth emancipates him the instant he stands upon it.

These are the issues upon which the Transvaal and the Orange Free State have thrown down the gauge of battle. The contention was not over the right of the Boers to self-government. That the imperial government has never questioned nor made any attempt to circumscribe. The demand of the English is that Englishmen within the limits of the British empire shall have equal enjoyment of that right with all others. If that had been conceded, the imperial government would have left the people of the Transvaal to settle all matters of domestic concern to suit themselves.

Rev. W. E. Sizer, W. Canton, N. Y., writes: "I had dyspepsia over twenty years, and tried doctors and medicines without benefit. I was persuaded to use Kodol Dyspepsia cure and it helped me from the start. I believe it to be a panacea for all forms of indigestion." It digests what you eat. F. G. Fricke & Co.
