REPUBLICAN CITY TICKET. Mayor, CARL A. RAWLS. Clerk, WILLIAM N. BAIRD. Treasurer, DR. E. W. COOK. Police Judge, JAMES HUNTER. For Members of the W. M. BALLANCE School Board, H. N. DOVEY.

C. A. RAWLS for mayor. IN TIMES of peace or in times of war C. A. Rawls is the man on whom the people can implicitly rely.

WE wonder what fusionists who are opposed to a third term think about giving a man a fourth term?

REMEMBER that the republican primaries for selecting delegates to the county convention, will be held next Saturday.

MORE trouble in Kentucky. The secretary of state has been sent to jail on the charge of murder. The judge would not accept bail.

THE REPUBLICAN is the name of the new paper started in Nebraska City. Bedford and Berry are the publishers. It is to be an evening paper, while the Press (republican) is published in the morning.

NO ONE doubts but that Mr. Fox is perfectly capable of filling the office of city clerk, but there are others who could fill the position just as acceptably who have not already had it for three terms. Why not give some one else a chance?

WEeping WATER did not grant a franchise to either of the rival telephone companies, but its citizens will put in an exchange of their own and connect with the independent system. This action is very satisfactory to the Plattsmouth Telephone Co.

SPEAKER HENDERSON is strongly in favor of the Porto Rican tariff bill, and states that the syndicates and trusts are fighting for free trade for what they can make on the goods now in the island. He says the tax would be temporary and solely in the interest of Porto Rico.

JAMES B. DILL of New York received \$1,000,000 for the work performed in the Carnegie-Frick combine. His fee in this case is said to be the largest sum earned by any lawyer for one case. He is said to be a lawyer of tact, perseverance, energy and unbounded integrity.

CONDITIONS IN THE PHILIPPINES. Captain J. H. Culver of the Thirty-second United States volunteers, who recently returned to this country to recuperate from the effects of a dislocation of the hip bones, caused by a fall from a horse, was in Lincoln yesterday enroute to his home in Milford.

Speaking to a correspondent of the Omaha Bee in regard to the conditions in the Philippine islands, Captain Culver said that the insurgents are being made to believe that their independence will be granted after the fall election in this country. He said the various tribes on the islands were already hostile towards each other and that several hundred of the Maccabees have taken up arms against the Tagalos or insurgents.

"We have the larger bodies of insurgents well dispersed," said Captain Culver, "and the natives are now divided into small bands. They scatter and then concentrate into bands of 200 or 300 and attack our men in a manner quite similar to the Indian warfare on the plains in this country years ago. In private dispatches and proclamations they have captured the insurgents are instructed to scatter and annoy the enemy until after the fall election in the states, when their friends will be elected. And besides, they have extracts from Bryan's speeches in Tagalo language, together with their own comment. They have no hope for securing the independence asked for, except by the election of Bryan. A few days before I left we captured insurgent officers and the first thing they said was: 'Is Bryan going to be elected?' They all know Bryan's name as well as Aguinaldo's."

"When the insurrection first began several tribes joined with the Tagalos on the representation of the latter that the American soldiers would help them in their revenge against Spain. They have since withdrawn from the insurrection and we now have seven companies of Maccabees organized as corps of scouts. They even asked for the privilege of fighting the Tagalos. There is no doubt that the insurrection is held up by the encouragement received from the United States. With very few exceptions, throughout the Tagalo provinces, the business men are petitioning for our troops to be garrisoned in their towns for their own protection and for the protection of commercial interests in general.

Some Important Experiments. A series of very interesting experiments are being carried on by W. H. C. Moore, of the department of geology of the University of Nebraska, and Mr. Manie, who is interested in the Nebraska quarry industry. The object of these experiments is to find out whether a commercial cement can be manufactured from Nebraska rocks.

The experiments include the making of cement from the lime rocks that are found in the southwestern part of the state and the comparison of the article with cement that is successfully made for commercial uses. Flattering results have been obtained by this investigation in the laboratory. A cement has been made from native rock that compares favorably with the cement that is on the market. The question yet remains to be solved as to whether this product can be manufactured profitably in large quantities.—University News-Letter.
