

THE LAW'S DELAY.

Hix—What's the best way to never settle a question?
Dix—Go to law about it.

CHILD HAD SIXTY BOMLS.

And Suffered Annually with a Red Scald-Like Humor on Her Head.

Troubles Cured by Cuticura.

"When my little Vivian was about six months old her head broke out in boils. She had about sixty in all and I used Cuticura Soap and Cuticura Ointment which cured her entirely. Some time later a humor broke out behind her ears and spread up on to her head until it was nearly half covered. The humor looked like a scald, very red with a sticky, clear fluid coming from it. This occurred every spring. I always used Cuticura Soap and Ointment which never failed to heal it up. The last time it broke out it became so bad that I was discouraged. But I continued the use of Cuticura Soap, Ointment and Resolvent until she was well and has never been troubled in the last two years. Mrs. M. A. Schwerin, 674 Spring Wells Ave., Detroit, Mich., Feb. 24, 1908."

Potter Drug & Chem. Corp., Sole Props., Boston.

Couldn't Blame the Boy.

"Young man," said the stern parent, "when I was your age I had to work for a living."

"Well, sir," answered the frivolously inclined youth, "I'm not to blame for that. I have always disapproved of my grandfather's attitude in the matter."

Sure throat is no trifling ailment. It will sometimes carry infection to the entire system through the food that is eaten. Hamlin's Wizard Oil is a sure, quick cure.

Faith.

Faith makes us, and not we it; and faith makes its own forms.—Emerson.

Lewis' Single Binder made of extra quality tobacco, costs more than other 5c cigars. Tell the dealer you want them.

Too often when the heart is willing the purse is weak.

INVALUABLE for Summer Complaints

Dysentery, Diarrhea, Cholera Morbus, Cholera Infantum, Colic and Cramps. Also relieves Griping Pains, Sour Stomach, Vomiting, Sea Sickness, and Hysterics and Nervousness due to bowel affections.

DR. D. JAYNE'S Carminative Balsam

stops pain immediately and almost invariably brings about speedy recovery. This medicine is just as safe as it is effective. Get a bottle at your druggist's, and keep it always in the house. For the children's sake, don't go away for the Summer without taking a supply along.

Per Bottle, 25c

Dr. D. Jayne's Expectant is a reliable remedy for croup and whooping cough, coughs and colds.

Mysteries of Nature

By G. Frederick Wright, A. M. LL. D.

ICE DRIVEN PLANTS AND ANIMALS.

Before the glacial period the plants which now flourish in the latitude of Virginia and North Carolina were growing in a happy family in Spitzbergen, northern Greenland, and on the Arctic shores of North America. Arctic expeditions have repeatedly brought back from the middle tertiary deposits north of Disco island the embedded leaves and fruit of magnolias, sassafras, hickories, maples, poplars, birches, lindens, southern cypress and several species of sequoias, including the gigantic forms now found only in California, and three kinds of ginkgo trees now peculiar to Japan. The evidence of these fossil plants is conclusive that just before the glacial period there was a warm climate all around the north pole.

Until the theory of the origin of species by natural selection was accepted, and the facts about the glacial period brought to light this distribution of trees and plants was a profound mystery. For the solution of the problem we are largely indebted to the late Prof. Asa Gray, who in 1859 read a paper before the American Academy of Arts and Sciences on the flora of Japan, which attracted the attention of the scientific world and opened the way to the full exposition of his theory, which was set forth in an address before the American Association for the Advancement of Science at Dubuque, Ia., in 1872. The way had been prepared for this work by the fact that the large collection of Japanese plants gathered by Commodore Perry's expedition in 1857, which opened Japan to the world, was placed in his hands for examination. The result was that it appeared that there was a striking similarity between the plants of Japan and those of the Altai mountains, of the Himalayas and the eastern portion of North America, and a striking dissimilarity between the plants of these regions and those of the Pacific slope of North America, while the most remarkable resemblance was between the plants of Japan and those of eastern United States.

The Pacific coast of the United States is rich in coniferous trees like cedars, sequoias and redwoods, but is conspicuously lacking in most of the trees familiar on the Atlantic slope. For example, there are not half as many maples, or ashes, or poplars, or walnuts, or birches, or oaks on the Pacific slope, and they are of such inferior quality that it is said "a passable wagon wheel can not be made of California wood, nor a really good one in Oregon." The Atlantic slope has four times as many species of non-coniferous trees as the Pacific slope, but only a little more than half as many coniferous species.

The first step in the solution of this problem is found in the relation of the land continents in the northern hemisphere to each other. Whereas, the southern ends of the continents project far out into deep seas so that they are widely separated from each other at the north they approached each other and are separated by shallow seas. The water in Behring strait is only 150 feet deep, and that in the sea only a few hundred feet deep, so that a slight elevation of the bottom of the ocean there would join Asia to America, and permit the migration of plants and animals from one continent to another. That these continents have been recently joined by such a change in land level is proved by the fact that bones of the mammoth have been found on both sides of Behring strait, and even on the Pribiloff Islands, far out in Behring sea. A similar belt of shoal water extends from Greenland by way of Iceland to Norway. It is therefore easy to suppose a continuous land connection clear around the north pole enabling plants and animals to migrate freely. On the other hand, the general resemblance of species both of plants and animals in the lands surrounding the north pole is proof that there has been such opportunity for migration. Whereas, there is this great similarity in species in the northern hemisphere, there is a total dissimilarity between the species occupying the southern extremities of the continents in the southern hemisphere.

But with the coming on of the glacial period this happy family of species around the north pole was rudely disturbed by the new conditions. The lowering of temperature and the slow accumulation of glacial ice made it impossible for trees of a temperate climate to maintain their existence on those inhospitable shores. If they were to exist any longer they must emigrate to milder climes. But how shall a tree which is fixed in the soil remove to better its fortune? Of course, a single tree is helpless in such a situation. But, as Prof. Gray wittily says, when a tree is driven to an extremity it can "take to the woods," and the forest can begin a majestic movement toward better climes.

As the conditions favoring the forest became severe along its northern belt they would become favorable over a corresponding belt stretching to the south. Over this belt the seeds would be gradually scattered by various agencies. Some seeds would be blown by the wind, some carried by streams of water, some by birds and squirrels and other animals. Whereas formerly such stray seeds had

failed to find favorable conditions in these new fields, now they would be the favored ones, and thus the species which they represented would slowly spread southward until the glacial period had exhausted itself and the extreme limit of favorable conditions had been reached.

Thus it would result that the same species would be driven down to corresponding latitudes on both sides of the Pacific and Atlantic oceans, and we should have what now appears—namely, the same species of plants in Japan, the middle United States and Europe and northern Asia.

But it still would seem to be a puzzle why the plants were not the same in corresponding latitudes on both sides of the American continent. Why should the species of plants in California be so different from those in Pennsylvania and Virginia? This is answered by considering the different conditions which prevail on the east and west sides of a continent. Because the world turns from west to east the prevailing winds in the northern hemisphere are from the southwest. The breezes of the Pacific coast are therefore sea breezes, laden with moisture, while those in the eastern Atlantic states are land breezes, which have been largely bereft of their moisture and are subject to greater alternations of temperature. The constant action of these diverse conditions would have a direct effect to favor some species on the Atlantic coast that would not be favored on the Pacific, and vice versa. Thus we have everything accounted for in a most natural way.

The reason why these plants have not returned to Greenland and Spitzbergen is that the glacial period is not yet over. It still prevails in those northern regions. But they have started on their northern journey and have partially recovered the ground lost. Some have already attained their original homes, leaving, however, many stragglers on the way. The main body of arctic vegetation is the same with that which covered the country of the middle Atlantic states during the climax of the glacial period. Of the stragglers remnants still left in favoring situations one of the most interesting is Scotch heather, which is found not only in Labrador, but in a few places in Massachusetts, like Andover and Cape Cod. In all the rock gorges opening into Lake Erie remnants of the glacial vegetation are preserved in the sequestered and cool shady nooks. Some such are also preserved in similar narrow, cool gorges opening into the Ohio river below Cincinnati.

But the mountains formed the best retreats for the arctic plants, which were following up the receding ice sheet. Alpine plants are found on the high elevations of the White mountains, and on the high peaks of the Rocky and Sierra Nevada mountains as far south as New Mexico, but are absent over all the intervening areas.

In some respects the effect of the glacial period upon animal life and distribution was even more peculiar than that on plants. During that period a large number of arctic species were crowded down into central Europe and into the middle and northern states of the Atlantic coast and Mississippi valley. In company with man's remains there are found those of the grizzly bear, the Irish elk, the reindeer, the musk ox and the arctic fox, while the ibex and the chamois, which now occupy the high mountain crags, descended to the valleys. Several of these northern species now extinct were also present in these temperate regions.

The indirect effect of this incursion of arctic animals into the temperate zone was to cause the destruction of many animal forms which already occupied the region. Just before the glacial period there were living in America two extinct species of the cat family as large as lions, four species of the dog family as large as wolves, while the walrus was found in Virginia, the sea cow in South Carolina. There were also living six species of horses, the South American tapir and llama, a camel, two species of elephant and two of mastodons, a species of megatherium, three of megalonyx and one of myodon—huge terrestrial sloths as large as the rhinoceros or even as the elephant.

Insects also, as well as plants and the larger animals, were compelled to reckon with the glacial period. Among the most interesting illustrations of this occurs in the White mountains, where various Alpine species of butterflies are found near the summit. In ascending Mount Washington one suddenly encounters near the top whole swarms of butterflies (Oenotus Semidea); so that, as Prof. Samuel Scudder has said, so far as insect species are concerned, "in ascending Mount Washington we pass, as it were, from New Hampshire to northern Labrador and the southern extremity of Greenland." Similar species occur also on the summit of the Rocky mountains. The story is the same. Dispersed far and wide during the glacial period, these insects have at last been compelled to take refuge on the summits of the high mountains, where alone glacial conditions perpetually prevail.

Graham Crackers at their Best

There are no better Grahams than "Sunshines"—none half so good.

Sunshine Grahams are made of the best whole wheat graham flour, at the "Sunshine" bakeries—the finest in the world.

The ovens are of white tile and are on the top floor—sunshine and pure air all around them.

Sunshine Grahams

Each package is protected by the triple seal. So you can be sure they are clean—pure and wholesome.

The "Sunshine Seal" on the end is proof of the genuine. Be sure it's there.

You miss the best in Grahams—'til you try "Sunshines."

At your grocer's in 10c sealed packages.

LUCKY MAN.

She—Two men whom I refused to marry, sir, have become millionaires! He—Is that the reason why?

Valuable Knowledge Spreading. Every day sees hundreds of new recruits in the war against tuberculosis, and every day brings new methods for the fighting of the plague. The National association predicts that if the present degree of interest is maintained, within five years everybody in the United States will have been informed on the way to prevent and cure tuberculosis, and concerning the infectious nature of the disease. Two things in particular are needed, and for these the National association is working in every way. They are, a more complete registration of tuberculosis cases, and the further isolation of dangerous advanced cases of consumption.

A Sunday Sermon.

One must accept life as it is. It gives us great happiness if we are wise enough to see it, and it balances the scales by sending great sorrows, too.

But that is life. If you would make the world brighter try to forget your hurts, dry your eyes and turn to help those who need the pressure of a friendly hand, the encouragement of a smiling look. Sorrows and troubles of all kinds should teach one a great lesson—the lesson of universal kindness.—New York Times.

ON FOOD

The Right Foundation of Health.

Proper food is the foundation of health. People can eat improper food for a time until there is a sudden collapse of the digestive organs, then all kinds of trouble follows.

The proper way out of the difficulty is to shift to the pure, scientific food, Grape-Nuts, for it rebuilds from the foundation up. A New Hampshire woman says:

"Last summer I was suddenly taken with indigestion and severe stomach trouble and could not eat food without great pain, my stomach was so sore I could hardly move about. This kept up until I was so miserable life was not worth living.

"Then a friend finally, after much argument, induced me to quit my former diet and try Grape-Nuts.

"Although I had but little faith I commenced to use it, and great was my surprise to find that I could eat it without the usual pain and distress in my stomach.

"So I kept on using Grape-Nuts and soon a marked improvement was shown, for my stomach was performing its regular work in a normal way without pain or distress.

"Very soon the yellow coating disappeared from my tongue, the dull, heavy feeling in my head disappeared, and my mind felt light and clear; the languid, tired feeling left, and altogether I felt as if I had been reborn. Strength and weight came back rapidly and I went back to my work with renewed ambition.

"Today I am a new woman in mind as well as body, and I owe it to this natural food, Grape-Nuts."

"There's a Reason."

Look in pkgs. for the famous little book, "The Road to Wellville."

Like an Earthquake.

Former High Sheriff Chesterfield C. Middlebrooks, whose bungalow at Highland lake stands partly over the lake on stone and cement foundations, was awakened at four o'clock the other morning by loud noises which he says shook his bungalow like an earth tremor.

He says that after the household had been shaken out of a sound sleep, he, not waiting to dress, went outside to ascertain the cause of the noise. He found, he says, that a monster frog had his bed directly under the bungalow. The frog weighed fully six pounds, he says, and every time it croaked the bungalow cracked and shook.

Mr. Middlebrooks bought an anchor, strong rope and enough red flannel to bait 100 hooks, and will try to save his property by capturing the bullfrog—Winsted (Conn.) dispatch to New York World.

A Trying Time.

Judge—Why did you strike this man?

Prisoner—What would you do, Judge, if you kept a grocery store and a man came in and asked if he could take a moving picture of your cheese?—Harper's Weekly.

Important to Mothers. Examine carefully every bottle of CASTORIA a safe and sure remedy for infants and children, and see that it bears the Signature of *Chas. H. Fletcher* in Use For Over 30 Years.

The Kind You Have Always Bought.

Reprensible to Allow It. Husband (reading from his paper)—Here, they say, is a comet coming towards the earth, traveling at the rate of a million miles a minute.

Wife (awaking from a doze)—Why don't they enforce the speed laws better?

PERY DAVIS' PAINKILLER is the first, safest and surest remedy for cramps, colic and diarrhea. As a liniment for wounds and sprains it is unequalled. 25c, 50c and \$1.00.

Occasionally women try to reform a man by roasting him.

Mrs. Winslow's Soothing Syrup. For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

A malicious truth may do more harm than an innocent lie.

Lewis' Single Binder straight 5c—Many smokers prefer them to 10c cigars.

An easy beginning doesn't always justify the finish.

SICK HEADACHE

Positively cured by these Little Pills. They also relieve Distress from Dyspepsia, Indigestion and Two-Houry Eating. The Safest and Surest Way of Curing Piles

Fistula And Rectal Diseases. The book is well worth reading. It tells the plain truth about Piles and Rectal diseases. It conveys a message of hope to those who have suffered the tortures and unpleasantness for years and now consider their case hopeless. It points out the sure road to permanent relief for those who have tried useless medicines and prescriptions. The book gives a full history of my experience and tells of hundreds of cases that have been cured. It will convince you that my method is the safest and surest way to obtain permanent relief from your affliction.

Pay When Cured

That's the fairest offer I can possibly make. That's the best way to prove to you that I do as I say. You risk nothing. You pay nothing until the cure has been accomplished. Then I give you a written guarantee (good as long as you live) that the cure will be permanent. Should the trouble ever return or any of the symptoms appear again after I pronounce you cured, I will treat you free of charge, until every symptom has disappeared. That's fair and square. It's the most liberal offer ever made. Why not accept it and rid yourself of the trouble forever?

Come and see me about your case. If you cannot come just now, write for my free book. Address

DR. E. R. TARRY,

126 Bee Building, Omaha, Nebraska.

Constipation

"For over nine years I suffered with chronic constipation and during this time I had to take an injection of warm water once every 24 hours before I could have an action on my bowels. Happily I tried Cascarets, and today I am a well man. During the nine years before I used Cascarets I suffered untold misery with internal piles. Thanks to you, I am free from all that this morning. You can use this in behalf of suffering humanity. B. F. Fisher, Roanoke, Ill.

Pleasant, Palatable, Potent, Taste Good, Do Good, Never Sicken, Weaken or Grip. 10c, 25c, 50c. Never sold in bulk. The genuine tablet stamped C. C. C. Guaranteed to cure or your money back. 50
