The "Big Six" Convention.

An unusual convention is that to be held at Elmwood Tuesday and Wednesday, Oct. 26 and 27. It is called the "Big Six" convention because there are six big subjects which will be considered by six big men in Sunday school work—Teacher Training, Missionary, Temperance, Elementary, Intermediate and Adults departments, and will be discussed by such men as J. W. Kersey, pastor of the first church in Omaha, and State Superintendent of Teacher Training; Dr. F. W. Sisson, pastor of the first church in Nebraska City; J. N. Merrill, one of the officers of the state association; Byron Seal, the whirlwind of Lincoln; Chas. H. Lewis, the new state secretary; Miss Margaret Brown of Grand Island, state superintendent of elementary grades—Such an array of expert talent as this is seldom realized outside of a state convention, and all these are to be brought to Cass county of Oct. 26 and 27, besides these the best local talent in the county will be on the program and the bone and sinew of Cass county Sunday school work will be in attendance. This is the ninth annual meeting of the association, and if all signs do not fail will be the largest and most enthusiastic in its history. The people of Elmwood are making extensive preparations to take care of this convention in good shape. Free entertainment will be provided for all delegates. Convention will begin on Tuesday noon and close with the evening session of Wednesday. This is an interdenominational meeting and every Sunday school in the county will be privileged to send delegates. Send names to L. A. Chapman, Elmwood. Remember the dates—Oct. 26 and 27—if you miss it, you'll miss it.

Let Steam Do Your Work

And you can have your work done a whole lot easier and faster than if you had horse power. Let steam saw your wood, pull stumps, do heavy hauling, plowing and overland freighting. One of the most important requirements of a traction engine is a safe strong boiler of suitable proportions well made and thoroughly tested before leaving the factory. You find in the CASE engine the best there is in engines. You will be able to get more power out of this engine than any other rated the same. The CASE engine is built along lines that give it the greatest tractive quality of any engine on the market. Its large wheel base, boiler mounting, double gears, more equal distribution of weight on front and rear axles and their great power make the CASE the premier puller up hill or on the level and over all conditions of roads. In order to find out more about this wonderful machine write me for catalogues and particulars.
