She is reported to be getting along very well, but at her age her recovery will naturally be slow.

Hon. T. J. Majors and Prof. J. W. Crabtree, of Peru, spent Sunday in this village, not because it was their intention to do so, but because they made a miscalculation as to how the trains run. Each blamed the other for the mistake, but friends interceded and peace terms were agreed upon, and the two noted Peruvians spent the day pleasantly with a number of friends. Col. Majors was so infatuated with our town that he carried away several specimens of cobblestone donated and packed in his grip by one of his friends, Prof. O. J. Standley.

### Strange Bird Killed.

Last Friday afternoon, G. W. Ingwersen, who lives about four miles northwest, saw a strange specimen of a bird. His first thought was that it was a white crane. He sent for his gun and shot the stranger only wounding it. He was afraid it would get away and shot again, this time killing it. Elbert Purkiser, who carries mail on that route, came along and Mr. Ingwersen allowed him to bring it to town to see what it was. It was brought here but no one knew what name to give it so he sent it to Nebraska University. The following is the reply he received:

LINCOLN, Nebraska, May 5, 1905.

ELBERT PURKISER, Nehawka.  
MY DEAR SIR:—The bird which you sent in last week for determination is the American Egret. We would like the specimen for the University Museum and unless we hear contrary instructions from you by return mail, will have it mounted nicely and placed on exhibition there.

Yours very truly,  
LAWRENCE BRUNER.

The specimen resembled a crane in that it had very slim, long legs, a very small, long neck, small body, and above the wings was a "duster" shaped mass, very soft but did not resemble feathers. The bird was pure white and from what can be learned its home is in the far south. It is supposed that the bird has been caught in the high winds that have been blowing so long from the south and was carried by its force to where it was dropped. It is certainly a curiosity and can be seen now by going to Lincoln.—Nehawka Register.

### Juggling With Dynamite

Is no more dangerous than to neglect kidney disorders. Foley's Kidney Cure corrects irregularities and has cured many severe cases after other treatment has failed. It builds up the worn out tissues and restores health and vigor. "I was troubled with kidney complaint for about two years," writes A. H. Davis of Mt. Sterling, Ia., "but two bottles of Foley's Kidney Cure effected a permanent cure. F. G. Fricke & Co.

### Compare Them.

People are grumbling about the high salaries we pay our county officials; so it might be well to compare what our county commissioners receive with what was paid the Otoe county commissioners. For the month of April Commissioner Webering received \$100; Jones received \$99, and Ashton \$100.25. For the same month the Cass county commissioners received as follows: Banning, \$45; Hawksworth, \$15.30, and Marshall, \$20.85. If you think our commissioners are robbing you move over to Otoe county.—Nehawka Register.

### Do Not Be Imposed Upon.

Foley & Co., Chicago, originated Honey and Tar as a throat and lung remedy, and on account of the great merit and popularity of Foley's Honey and Tar many imitations are offered for the genuine. Ask for Foley's Honey and Tar and refuse any substitute offered as no other preparation will give the same satisfaction. It is mildly laxative. It contains no opiates and is safest for children and delicate persons. F. G. Fricke & Co.

## QUEEN OF ACTRESSES PRAISES PE-RU-NA.

MISS JULIA MARLOWE  
Heartily Approves of Peruna For the Nerves.

In a recent letter to The Peruna Medicine Co., Miss Julia Marlowe, of New York City, writes the following:

"I am glad to write my endorsement of the great remedy, Peruna, as a nerve tonic. I do so most heartily."—Julia Marlowe.

Nervousness is very common among women. This condition is due to anemic nerve centers. The nerve centers are the reservoirs of nervous vitality. These centers become bloodless for want of proper nutrition.

This is especially true in the spring season. Every spring a host of invalids are produced as the direct result of weak nerves.

This can be easily obviated by using Peruna. Peruna strikes at the root of the difficulty by correcting the digestion.

Digestion furnishes nutrition for the nerve centers. Properly digested food furnishes these reservoirs of life with vitality which leads to strong, steady nerves, and thus nourishes life.

Peruna is in great favor among women, especially those who have vocations that are trying to the nerves.

Peruna furnishes the lasting vigor for the nerves that such people need.

Thousands of testimonials from women in all parts of the United States are being received every year. Such unsolicited evidence surely proves that Peruna is without an equal as a nerve tonic and a vital invigorator.

Buy a bottle of Peruna to-day. If you do not receive all the benefits from Peruna that you expected, write to Dr. S. B. Hartman, Columbus, Ohio.
