New Cabbage Worm.

Reports are coming from a number of sections of the discovery of a new special of cabbage worms. The invader is about three-fourths of an inch long and about one-eighth of an inch in thickness. In color they are a very dark green with bright yellow spots on either side. They are the most Johnnie Svehla, an Eight-Year-Old Lad destructive worm we have ever had to contend with as an army of them will destroy a cabbage patch in less than a
