The best medical skill available could not give me more than temporary relief. Teachers Institute.

The date for holding the county institute, as previously announced by County Superintendent Wortman, is the week beginning July 31. It will be held at Weeping Water this year. While the Journal would like to have seen this assembly again located in our city for their annual preparatory work, since we believe circumstances make this place the proper one, yet we have no criticisms to offer and we wish the teachers of this county a pleasant time and Godspeed during their sojourn at our sister town.

Cass county has a right to be proud of its excellent schools, its progressive teachers and bustling county superintendent. The Journal is patriotic enough to believe that they are the superior of those in any county in Nebraska or any other state. We believe this, not merely because of home patriotism, but because we have closely observed the constant and unremitting efforts made for self-betterment. Superintendent Wortman is one of those who believe that the institute work should, in some manner, be continued during the entire school year. To this end he has had the county organized into local sections which meet four times per year with two general sessions where all meet together. This brings results right home to the school room. For the institute this year Prof. Rouse and Prof. Sharman, the latter gentleman from the Schuyler public schools, have been re-employed. They gave excellent satisfaction last year. The Journal takes its hat off to the institute as a whole, and to instructors and each pretty schoolman individually. May they never grow less.

The Advertiser.

The advertiser is a peculiar genius. A great many men of the business world advertise in a paper not because of the returns it brings them, but simply because the merchant across the way or next door is doing it. Now as a matter of fact, no merchant has any definite way of knowing what returns an advertisement brings him. In the first place, there are two kinds of advertisements—direct, and indirect. The merchant can come much nearer forming a correct estimate of the returns the former brings him, than the latter. Indirect advertising is invisible, intangible. And after all, contrary to the opinion of the infallible "printer's ink," indirect advertising is the kind that pays; it is the form of advertising that lives in the mind of the reader and patron. It is expensive, however, and very few merchants in their gracious wisdom indulge in it. It is expensive for this reason. To be successful, indirect advertising must be clean, with plenty of white space and more or less display, with no crowding. The reason indirect advertising pays is largely because it brings your house first, your goods second, before the public. A nice clean, attractive advertisement, making mention of fresh, reasonable stocks will bring more people to your store than a thrilling notice of some article, the price of which is the principle feature of your advertisement, and causes a little furore which soon blows over.

In the second place, indirect advertising is more inspiring, more elevating, and inspires in the reason that something called confidence. And after all, when the whole story is told, when the merchant has gained the confidence of the people, his business is a success, he has achieved much,—more in fact than nine-tenths of the merchants.—University Place News.
