Mrs. James Allison received a letter from her daughter, Mrs. C. S. Stone who lives at Yampa, Col., where Charley is cashier of a bank, in which she states that on the 4th of July, Mr. and Mrs. Stone and two other couple went about twenty-five miles up into the mountains and camped out for the day. From what Mrs. Stone writes they had a fine outing and caught 115 mountain trout. A Fine Time.

Mrs. O. A. Davis entertained the Kensington Wednesday afternoon, and it was in a manner out of the ordinary. About thirty or forty were present and a box filled with the good things was provided for each one present, and when lunch hour arrived everyone partook of his or her supplies. Mrs. Will Smith, Mrs. S. O. Pitman and Miss Fay Oldham assisted Mrs. Davis in preparing for the pleasant event. All present speak of the occasion as one long to be remembered as one of exceeding pleasure.

Spirited Runaway.

Guy Stokes was so unfortunate as to meet with a runaway Tuesday. It seems he was driving along with two horses hitched to the buggy, when Nick Klarens came up behind them with a cultivator, which scared them and they began to run and made double quick time for about a mile. Strange to say, the vehicle turned over twice, and when stopped it was found that save a few slight bruises, Guy was uninjured, and a broken tongue was all that was injured to the buggy. It was a remarkable escape for Guy.

## LEE ALLISON IS DANGEROUSLY HURT

### Breast Bone Caved In and Several Ribs Torn Loose.

From Tuesday's Daily.

Reports received this morning from the home of Lee Allison, south of this city and near Murray, are to the effect that he is lying there at the point of death suffering from injuries presumably inflicted by a team which he had driven to town yesterday afternoon. Mr. Allison who is known to nearly every man, woman and child in the city came in yesterday to do some trading, driving a team which he recently secured and which he had not been driving except for a few times. He left the city in the early evening and drove to his home, driving into the horse lot.

It is presumed that he got the team unhitched from the buggy without trouble as they were free when the accident was discovered but the harness was still on them. It was after supper when Mr. Allison was discovered lying in the horse lot with his breast mashed in and otherwise in a badly injured condition. The horses were standing about in the lot with the harnesses still upon their backs. Mr. Allison was unable to talk and could make no definite statement as to what had caused the trouble nor as to anything he had done after entering the lot. He was taken to the house and Dr. B. F. Brendel of Murray summoned to his assistance.

Dr. Brendel arrived within a short time and discovered that Mr. Allison's condition was decidedly critical. He found that the breast had been caved in, the breast bone broken and that the ribs had been torn loose from it. Apparently he was suffering also from internal injuries. Dr. Brendel made him as comfortable as possible and later came to this city. He states that the chances for recovery are not good owing to Mr. Allison's advanced age and his enfeebled condition. For some time past he has been suffering from ill health and this injury coming on top of the other illness promises to be final.

Lee Allison is one of the most widely known men in Cass county and has a great many friends who will regret exceedingly to hear of the accident which has befallen him. He has lived here for all his life and has long been an active farmer and horseman. For many years he has been noted for his prowess as a horseman and when the bicycle fever was at its height, he won considerable distinction throughout this section of the country by the races which he ran with a team of running horses against bicycle riders. These races were daring and in them he displayed many qualities which stamped him as a bold and nervy driver. Of recent years his health had been such that he did not indulge in these races any more but he still retained much of his recklessness when horses were concerned. It is this recklessness which has probably led to his fatal injury. His many friends hope the diagnosis of the surgeon is incorrect and that he yet recovers to drive many more teams.

In County Court.

In county court this morning Judge Beeson admitted to probate the last will and testament of the late John Dreamer. His son Chris Dreamer was appointed administrator of the estate with the will annexed. The widow of the deceased was named as executrix in the will but owing to her age it was thought advisable to appoint the son.

A final settlement was made in the Louis Gustin estate and the report of the administrator allowed. The administrator and the sureties on his bond were released and discharged from liability thereon.

A final hearing was to have been had in the matter of the estate of Dorland Clapp, deceased, but this matter was continued pending the arrival of the administrator.

The last hearing on claims in the E. T. Rickard estate from Weeping Water was also had this morning. Attorney Clarence Tefft being present and representing the estate.

A marriage license was issued this morning to W. T. Knox, aged 30, of Kemmerer, Wyo., and Miss Genevieve Lucille Pollard, aged 25, of Weeping Water.

Alf Nickles is spending today in the city, driving in this morning from his home.

Letter From F. M. Young, Jr.

Joe Cook came in this morning from his home south of the city and took occasion to call at the Journal office, bringing good tidings from our friend F. M. Young, Jr., who is now located at Degraff, Minn. Mr. Cook received a letter this morning from Mr. Young conveying the intelligence that he and his wife are well and that they were in love with their new home. He enclosed some samples of fall and spring wheat and oats, and they effectually put an end to the wild tales that all the grain in that locality has been destroyed by drouth. The several specimens which were sent are very fine and indicate that Degraff and its locality is certainly blessed this year with good crops. The wheat is good sized, good heads and long ones and gives every promise of being an abundant crop. The oats also makes a very fine showing and Mr. Young is to be congratulated upon the excellent prospects which these specimens show in sight for that country. Mr. Young also writes that his wife has been raising turkeys and now has a fine flock of the fowls. She has fifty young ones which is far more than she has ever been able to raise here. On the whole the letter is a most optimistic one and shows that Mr. Young and his good wife are getting along nicely, and that they are satisfied with the country and its prospects. The many friends of these estimable people throughout this county will be more than gratified at their success and trust that they will always find things as pleasant and enjoyable as in the past.

Rain All Round Us.

Plattsmouth people who have been looking and hoping for rain were again disappointed last night and this morning when heavy showers passed around to the south and east of the city while scarcely a sprinkle fell at this place. The rain in the city did not amount to more than enough to dampen the ground. The rainfall south of the city in the neighborhood of Union is reported to have been heavier and enough fell to make the roads muddy. From this city south, the rain seems to have increased in volume.

Across the river in Iowa it was apparent that good rains fell over in Mills county, the rain being visible on the bluffs. Malvern and that locality enjoyed a hard rain and the base ball game which was to have been played there this morning had to be postponed until this afternoon owing to the muddy condition of the grounds. This afternoon indications were that showers were taking place over western Iowa also. North of this city the rainfall in Omaha and between that point and here was considerably heavier than here and the cars on No. 6 showed the signs of having struck quite a downpour.

Farmers from the country state that rain is needed now but that corn can stand several days yet without damage to amount to anything. The things needing rain now worse than anything else is the pastures and the grass crops which have suffered a good deal and which are rapidly dying out. The small grain is now ready for harvest and within a few days this will commence. Some specimens brought in indicate that both wheat and oats will be much better than that some time ago and will produce a good crop. Several specimens of wheat from the farm of Claud Everett near Union show up remarkably well, the heads being large and heavy with a good stand in the field. The improvement has been satisfying to those who thought the crop was more than a partial failure several days since.

The weather bureau predicts for today fair weather and with unsettled weather tomorrow. This would indicate chances for showers tonight and tomorrow. No heavy rainfall is in sight.

Mr. Hilton desiring to remain here until that time. Plattsmouth will be glad to welcome Mr. Keil and his estimable wife to the city and trust that they will find it a good place to live.
