

BRIEF SKETCH OF THE LIFE OF THE LATE SAMUEL WAUGH

Born in Brook County, West Virginia, in 1844, Died at Lincoln, Nebraska, September 23, 1910

The following from the Lincoln Evening News of yesterday, gives a more complete account of the career of the late Samuel Waugh, whose death was announced in last evening's Journal, than we have been able to produce:

Samuel Waugh who for four years was vice consul to Germany and for several years a well known banker of Nebraska, died at an early hour this morning at the family home, 2503 O street. For the last three years he had been a victim of progressive paralysis, and his death was not unexpected.

Mr. Waugh is survived by a widow, three sons and four daughters. The children are Mrs. F. C. Buchtel and Mrs. W. R. Arndt, both of Denver; Misses Florence and Helen of Lincoln; Fred of Omaha, and Samuel and Bryan of Lincoln. One son, John R., is dead. The funeral which will be private, will be held at the residence Sunday afternoon. Burial will be in Wyuka cemetery.

Mr. Waugh was born in Brook county, West Virginia, in 1844. He entered Princeton university and was graduated from that institution in 1868. While pursuing his studies at Princeton he took an active part in

athletics. He was a member of the varsity base ball team of that university in the sixties.

A few years after his graduation Mr. Waugh came to Nebraska, locating at Crete, where he engaged in the banking business. In 1875 he was married to Miss Flora Rawlins at West Point, Neb.

While at Crete Mr. Waugh was appointed vice consul to Germany with headquarters at Chennitz, Saxony. He served in this capacity for four years, from 1876 to 1880. N. K. Griggs, who was found dead on a train at Alliance a few weeks ago, was counsel to Germany at the time.

Returning to Nebraska, Mr. Waugh again engaged in the banking business at Crete. At this place he was closely associated with Archibald Scott, who was paying teller at the First National bank and who died in the city last night.

From Crete Mr. Waugh moved with his family to Ashland to take up the same line of business. Later he removed to Plattsmouth where he was connected with the First National bank of that place. He was cashier of the latter institution for several years. Five years ago he moved to Lincoln with his family.

CUPID IN EVIDENCE AT NEHAWKA

The Culmination of a Pretty Romance Beginning About Two Years Ago.

John I. Long, the hustling editor of the Nehawka News, would, evidently, make a good reporter for a daily, as he has a sly way of getting on to incidents several days before they occur. Here is the way he relates a wedding that is soon to occur in which a prominent young man of Nehawka is a party thereto:

The culmination of a pretty romance that has its beginning a couple of years ago, will be the marriage next Wednesday, September 28, at the home of the bride's parents at Parker, South Dakota, of Miss Lois Wiltse of that place and J. J. Pollard of Nehawka.

Miss Wiltse taught school here for the two years prior to this term and during this time "Jimmie" laid siege to and won her heart, and while the outcome surprises none, the fact that this paper is able to foretell the event so accurately may be a surprise to some, as Mr. Pollard has the reputation of keeping things of vital interest to himself. However, we wish to assure the parties most concerned, that no one has told, and the conclusion is but the composite result of a nose for news, possessed by the whole staff of this paper. The fact that people talk in their sleep has nothing to do with it.

Miss Wiltse won a host of friends during her residence here and by winning ways and lovable disposition endeared herself to all with whom she became acquainted. No small evidence of her good taste is her choice of a husband, as Jimmie Pollard, as everybody knows him, is one of the sterling young men of this community. A young man of sterling parts, the youngest son of Mrs. Lena Pollard whose farm he conducts successfully and whose idol he is. Born and reared to manhood in this community he has endeared himself to all and has won an enviable reputation for his sterling worth.

Immediately after the marriage the young people will leave for Elizabeth, N. J., where they will spend their honeymoon visiting relatives of the groom and will be at home to their friends in Nehawka some time next month, just when we are unable to say as this is the only particulars in which our reporter fell down. The News extends congratulations and begs forgiveness.

Supper Postpone.

The general supper which was to have been given at the home of Mr. and Mrs. A. A. Wetenkamp west of Mynard, was postponed until Thursday evening of next week, September 29. Supper will be served at 7:30. Everybody invited.

Real Estate Sold.

A sheriff sale in foreclosure of mortgage in case entitled Livingston Loan & Building association against Frances Skoumal, was had at the south door of the court house this morning in which lots 16 and 29 in the southeast quarter of section 13, township 12, in range 13, was in controversy. The association was represented by Walling, Gering and Robertson. The property was sold to the defendant for \$1463, she being the highest bidder therefor.

A Grandson Arrives.

Mr. and Mrs. Frank Kauble are rejoicing over the arrival of the stork at the home of their daughter, Mrs. Dr. F. D. Caldwell, at Omaha, which left them a bouncing boy baby. Grandpa Kauble wore a broad smile as he sat on his wagon seat this morning. The mother and child are doing nicely, and we hope the little fellow may live long to bless the home of his parents and grandparents.

Mr. Cooper Resigns.

George Cooper, a Burlington operator, who came to Plattsmouth to take the second trick at the Burlington station, taking the place of Mr. However, who was promoted to the vacant place made by the promotion of Mr. Clement, resigned his position yesterday after seven days in the position. Mr. Cooper departed for Kansas City on No. 2 last evening.

Take Auto Trip.

John Albert and wife and August Engelkemeler and wife returned on Thursday from a trip to Stanton, Nebraska, where they had been visiting Mr. and Mrs. Albert's daughter and family. The party left here Sunday in Mr. Engelkemeler's touring car and made the round trip without a hitch. The trip was a most enjoyable one, as the weather was ideal and the roads perfect.

Ed. Wurl of near Rock Bluffs was an Omaha passenger on the afternoon train today.

New Marvels Of the Inventors

HARDLY a day passes during the summer that the newspapers do not record a drowning, and it is not unusual to read on a holiday or Sunday that half a dozen pleasure seekers have lost their lives in this manner. All sorts of devices have been invented to protect the swimmer, but most of them have proved too heavy and cumbersome

BATHING SUITS IN WHICH IT IS IMPOSSIBLE TO SINK.

or impractical. At last, however, it seems as if the problem has been solved.

A German inventor named Hartwig, after studying the matter and experimenting for a number of years, has found a material for lining bathing suits which keeps the wearers afloat. In fact, it is said that one is as safe from drowning when in the water in a suit thus lined as if he were on dry land. One great advantage of the discovery is that the lining adds little to the weight of the suit and makes it strong, but not cumbersome.

Tests made abroad with this safety lining suit have attracted great attention. A number of people unable to swim a stroke have donned them and leaped into water twenty or thirty feet deep, where they have floated as easily as if made of cork. Should the suits prove all that is claimed for them timid folks will now have little trouble in learning to swim, and there seems to be no reason why the safety lining should not be used for clothes to be worn by those traveling by sea.

"But how can they tell just how high he flies?"

This question has probably been asked ten thousand times this summer at the aviation meets by those who have watched the daring aviators go up and up until they looked no larger than a

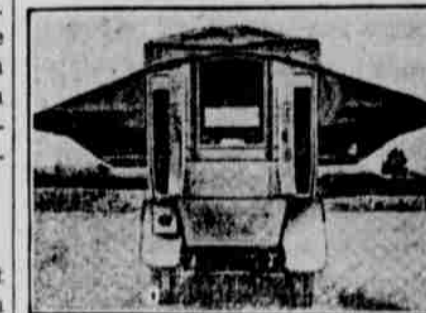

HOW THE HEIGHT OF A MAN BIRD'S FLIGHT IS REGISTERED.

bird. And to tell the altitude reached was a problem that long worried the inventors. Now, however, an instrument has been made that registers to the fraction of a foot the height reached. It is called a biograph, and when attempts are to be made to break a height record it is fixed to the aviator's coat, as shown in the accompanying illustration.

Some people object to long tours in their automobiles. They say that, while the ride itself is most enjoyable, the meals they are obliged to purchase along the way are not even fit for a hobo to eat. But now the inventors have come forward with a car that enables one to take his kitchen with him and in which everything, from griddlecakes to a roast beef dinner, can be quickly prepared.

One of these novel machines has recently been supplied to Emperor William and is complete in every detail. It looks like a traveling postoffice van, but the sides fold outward to form tables or counters. The roof is domed to permit the chef to stand upright.

A MOTORCAR KITCHEN.

while, as will be seen, the entire outfit, including the driver, is well protected from the weather. All the utensils have specially designed places. There are safes and cupboards for ice, meat, vegetables and all other provisions and cutlery caissons.

A large field tent is carried to serve as a dining room for a dozen people; also an oval table and twelve chairs. It was used during the recent army maneuvers.

Should Conservation Be State or National?

By Senator A. J. BEVERIDGE.

THE United States is, THE AMERICAN PEOPLE ARE, A NATION, NOT FORTY-SIX NATIONS. In war we fight under one flag for our common safety. In peace let us strive under one flag for our common welfare.

Just as the idea of PROVINCIALISM has worked other evils, so it has worked the waste of our natural resources. The PROVINCIAL idea was that the natural wealth, belonging to all the American people, should be handed over for nothing to special interests. This was done under the plea of encouraging individual enterprise and hastening local development.

And so forests which once belonged to all the people have been ruthlessly felled, and upon their ruins have risen the empires of our lumber kings. Priceless deposits of coal, iron ore and copper which once belonged to all the people have been surrendered freely TO SPECIAL INTERESTS.

THE NATION MUST KEEP AND ADMINISTER FOR ALL THE PEOPLE THOSE NATURAL RESOURCES BELONGING TO ALL THE PEOPLE. EVERY STATE SHOULD AID AND NOT HINDER THE NATION IN DOING THIS GREAT DUTY.

By JAMES J. HILL.

TO pack the fact into a single statement, the need of the hour and the end to which this congress should devote itself is to CONSERVE CONSERVATION. It has come into that peril which no great truth escapes—the danger that lurks in the house of its friends. It has been used to forward that serious error of policy, the extension of the powers and activities of the national government at the expense of those of the states.

There are dangers inseparable from national control and conduct of affairs. THE MACHINE IS TOO BIG AND TOO DISTANT. Its operation is slow, cumbersome and costly. So slow is it that settlers are waiting in distress for water promised long ago. So faulty has been the adjustment of time and money that congress has had to authorize the issue of \$20,000,000 of national obligations to complete projects still hanging in the air. So expensive is it that estimates have been exceeded again and again.

THE ATTEMPTED FEDERAL CONTROL OF WATER POWERS IS ILLEGAL, BECAUSE THE USE OF THE WATERS WITHIN A STATE IS THE PROPERTY OF THE STATE AND CANNOT BE TAKEN FROM IT.

Taste Your Food When Eating to Avoid Tasting It Afterward.

By HORACE FLETCHER, Food Specialist.

WE eat too much. We steer in the wrong way. The human is but a machine—a corpomobile, if you please.

Food which is not enjoyed—that is to say, palatable—is undigested.

IT IS ABSOLUTELY WRONG TO TAKE FOOD UNTIL YOU ARE HUNGRY, AND THE HUNGRY MAN WHO CANNOT TAKE TIME TO EAT HAD BETTER NOT EAT. IF YOU HAVE BUT TWO MINUTES TO EAT, EAT CAREFULLY IN THOSE TWO MINUTES.

TASTE THE FOOD AT THE TIME OF EATING AND YOU WILL NOT NEED TO TASTE IT AFTERWARD.

Further, we do not generally make the most of foods. If we should all eat bread first until the appetite was satisfied with that, then other things, we would need only one-half what we are now eating. The mind, too, must be in an agreeable state.

Professor Cannon of Harvard made some very interesting experiments with a cat. The cat was given subnitrate of bismuth with her food to make the path of digestion visible to the X ray. After the cat was well fed she lay satisfied and purred, and the digestive organs seen through an X ray, were in perfect working order, but when the cat was annoyed that which she had eaten became dead food.

SO WHEN YOU ARE WORRIED AND GET THAT TIRED FEELING YOU ARE GENERATING CARBONIC ACID GAS IN THE BODY. Therefore during the process of digestion conserve and propitiate the mental stage. And here is a point that is often lost sight of—this matter of hate. Hate is the tightest halter on the throat of the alimentary canal. It causes more disorders than any one thing I know of. Cultivate loving everything, not for any sake but your own.

CULTIVATE SUCH A SPIRIT THAT NO MAN CAN MAKE YOU HATE HIM IF YOU WOULD PRESERVE THE SAFE AND EASY RUNNING OF YOUR CORPOMOBILE.

New York More Polygamous Than Ottoman Empire.

By AMEEN AR-RIHANI, Syrian Poet, Now in America.

MY countrymen are giving up polygamy. Ninety per cent of the best Mohammedans have only one wife apiece.

Philosophers have said that men are naturally polygamous. Perhaps that is true. But one thing I know is true—IT IS THAT YOU OF THE WEST YIELD TO THAT INSTINCT MUCH MORE THAN WE at the present time.

NEW YORK TODAY ACTUALLY CONTAINS MORE POLYGAMISTS THAN THE OTTOMAN EMPIRE. YOU ARE OUT-MOHAMMEDANIZING THE MOHAMMEDANS.

INTERESTING CASE IN JUSTICE ARCHER'S COURT

From Saturday's Daily.

Judge M. Archer was engaged in the trial of a damage suit in which Charles Matous of Havelock is plaintiff and Edward Donat, defendant. The amount in controversy is \$48 and attorney fees of \$100, and grew out of the assignment of the claim of \$48 by Mr. Donat to a Kansas City party who brought suit on the claim in the Missouri jurisdiction and tied up the plaintiff's wages amounting to something over \$80 for a period of about two months. Mr. Matous employed an attorney at Lincoln and one at Kansas City and contested the attachment suit, having the same dismissed, and this expense and statutory penalties is what he seeks to recover in the suit on trial today. The case has some interesting features, as the court in which the attachment suit was brought was one of the sort some attorneys style "rabbit courts," and it appears that the legality of this court has been questioned and its acts not all sanctioned by the superior courts of Missouri. Attorney A. L. Tidd appears for Mr. Matous while Judge A. N. Sullivan tried the case for Mr. Donat.

If you want help or have anything to sell, advertise in the Journal.

Fine Honey.

Julius Neilson, engineer in the Burlington yards, brought to the Journal office Thursday evening a couple of pounds of the finest honey that ever was placed upon a hot biscuit. Clear as a crystal and as sweet as the bees could make it, and now maybe you think it wasn't toothsome and delicious? Eh! Julius is a worker among the bees at odd times and has been very successful. He has quite a number of hives and by close attention to them they produce quite a quantity of the "sweetness," over and above of what is used for home consumption, which always finds a ready sale upon the market. Thanks, Julius, and "may you live long and your shadow never grow less."

Enjoyable Visit.

From Saturday's Daily.

Jas. A. Walker of Murray came up on the early morning train today, accompanied by his cousin, J. C. Walker, of Pittsburg, Pa., whom he has not seen for some years, and who paid him and his family a short visit. They boarded the early morning Burlington train eastward bound for Ottumwa, Ia., where they go to visit another cousin, Tom Walker, of that city, where they no doubt will have the time of their lives. Mr. Walker will return home about Monday evening at which time J. C. Walker will pursue his journey homeward.

The Shape-Maker

is a new model in suits; for young men particularly. The trousers keep in place without suspenders, or even without a belt. The wearer has to stand and walk erect; it helps develop the figure; its a shape-maker.

Hart, Schaffner & Marx have designed this new model; its the best thing done in clothes making for fifty years.

We want you to see it; you want the sort of figure it gives a man. Men of any age can wear it.

Suits and Overcoats from Hart, Schaffner & Marx \$20.00 to \$35.00 Others \$10.00 and Upwards
