**WHAT AN OLD-FASHIONED FARMER SAYS**  
 Old-fashioned farmers who stack their grain are scornful of the farmers who thresh their grain out of the field. They say that the modern farmers do not take the proper interests in their wheat to take the trouble to stack it and let it sweat, that the modern farmers are so crazy to turn their wheat into money, to buy automobiles with, that they thresh it out of the shock as quickly as possible. But the modern farmers say the old-fashioned way of stacking grain is a useless trouble and expense; that the modern machinery has done away with the necessity of sweating grain before it is marketable; that the mills overcome that.
