Wouldn't it be better to receive a check from an insurance company after a tornado or cyclone takes away your home than to be compelled to use your own hard cash to rebuild? I represent Standard Old Line Companies, and can write your insurance at a low rate. Better look up your policies and if you have no tornado insurance call at the bank and let me fix you out.

Equal Suffrage Petition Day.

Lincoln, Neb., June 16, 1913.

It is planned to start the circulation of the petitions for the submission of the equal suffrage amendment in all parts of the state in a concerted movement, beginning July 16. That date will be made "Suffrage Petition day" in all the counties, and it is hoped that the local workers and friends of the movement will at once make arrangements for a general meeting in your county. Wherever desired outside speakers will be sent to these county meetings to assist in the organization and to help start off the petition work.

We would like to hear at once from the suffragists of your county, in order that we may know what plans they can make for the "Petition day" meeting, and how headquarters can help them. The time is short, but this general rally day can be made a great success if all will get busy now.

Mrs. Viola M. Harrison,

Executive Secretary.

W. K. Shepherdson in Montana.

The Journal is in receipt of a letter from W. K. Shepherdson, from Lewistown, Montana, requesting us to change his paper from Worland, Wyoming, to that place. He says he is located in the famous Judith Basin of Montana, and it is the garden spot of the world. He says he has sold his holdings in the Big Horn Basin and his permanent home will be in Lewistown. He says Lewistown is a modern town in the way of buildings and accommodations, and wheat, oats and alfalfa are raised in abundance in the Judith Basin. The Journal joins with the many Cass county friends in wishing them success in the new home.

They were on the South Omaha market Monday morning and brought the top price, which was \$8.65 per hundred. Mr. Gregory bought the cattle right last fall, he fed them right all winter, and struck the right market. Under such circumstances what could keep him from making good money on them?
