CHAPTER XIII.

The Adventure With the Little Man. face. WISHT you wasn't so set in your | Smoke laughed. "That's the way it ways," Shorty demurred. "I'm takes everybody. You see those high sure scalet of that glacier. No ledges across there to the northwest? man ought to tackle it by his There's where I first saw it. No warntonely."

Smoke laughed cheerfully and ran of the whole lake from there. I'd givhis eye up the glistening face of the en up looking for it too." tiny glacier that filled the bead of the valley. "Here it is August airendy, headed back and was expecting to and the days have been getting shorter fetch the Stewart last night when out for two months," he epitomized the sit- I popped in sight of the lake. If that's nation. "You know quartz, and I it where's the Stewart? And where

don't. But I can bring up the grub, did you come here? And what's your while you keep after that mother lode. name?" So long. I'll be back by tomorrow. evening."

He turned and started.

"I got a hunch somethin's goin' to smile, and his hand flashed eagerly out happen," Shorty pleaded after him. But Smoke's reply was a bantering laugh. He held on down the little val- health, with quick black eyes and a ley, occasionally wising the sweat from magnetism of camaraderie. his forehead, the while his feet crushed through ripe mountain raspberries mured incredulously. "And its botand delicate ferns that grew beside tom's buttered with gold?" patches of sun sheltered ice.

In the early spring he and Shorty mg." Smoke dipped in his overalls had come to the Stewart river and pocket and brought forth half a dozen launched out into the amazing chaos nuggets. of the region where Surprise lake lay. And all of the spring and half of the baven't beaten me to it," Carson swore summer had been consumed in futile whimsically, but his disappointment wanderings, when, on the verge of was patent. "And I thought I'd scoopturning back, they caught their first ed the whole caboodle. Anyway, I've glimpse of the baffling, gold bottomed bad the fun of getting here." sheet of water which had lured and fooled a generation of miners.

Making their camp in the old cabin which Smoke had discovered on his previous visit, they learned three things-first, heavy nugget gold was carpeted thickly on the lake bottom; next, the gold could be dived for in the shallower portions, but the temper- got to realize that no gold deposit like ature of the water was man killing. it has been discovered in all the histoand, finally, the draining of the lake ry of mining. It will take you and me was too stupendous a task for two men and my partner and all the friends in the shorter half of a short summer. eled far, they had set out in search of down there. The problem is to drain the mother lode. They had crossed the big glacier that frowned on the southern rim and devoted themselves to the puzzling maze of small valleys and canyons beyond, which, by most unmountain-like methods, drained, or had at one time drained, into the lake.

The valley Smoke was descending gradually widened after the fashion of any normal valley, but at the lower end it pinched narrowly between high, precipitous walls and abruptly stopped in a cross wall. At the base of this, in a welter of broken rock, the streamlet disappeared, evidently finding its way out underground.

Climbing the cross wall, from the top Smoke saw the lake beneath him. Unlike any mountain lake he had ever seen, it was not blue. Instead its intense peacock green tokened its shallowness. It was this shallowness that made its draining feasible. All about arose jumbled mountains, with ice yours? Let's see." scarred peaks and crags, grotesquely shaped and grouped. All was topsy turvy and unsystematic-a Dore night-

Across the lake, seemingly not more than half a mile, but, as he well knew, five miles away, he could see the bunch of spruce trees and the cabin. He looked again to make sure and saw smoke clearly rising from the chimney. Somebody else had surprised themseives into finding Surprise lake, was his conclusion as he turned to climb the southern wall.

From the top of this he came down into a little valley, flower floored and lazy with the hum of bees, that behaved quite as a reasonable valley should, in so far as it made legitimate entry on the lake. What was wrong with it was its length-scarcely 100 yards-its head a straight up and down cliff of 1,000 feet, over which a stream pitched itself in descending veils of

And here he encountered more smoke, floating lazily upward in the warm sunshine, beyond an outjet of rock. As he came around the corner he heard a light metallic tap-tapping and a merry whistling that kept the best. Then he saw the man, an upturned shoe between his knees, into the sole of which he was driving hob

"Hello!" was the stranger's greeting, and Smoke's heart went out to the man in ready liking. "Just in time for a smack. There's coffee in the pot, a couple of cold flapjacks and some jerky."

"I'll go you if I lose," was Smoke's acceptance as he sat down. "I've been rather skimped on the last several meals, but there's oodles of grub over in the cabin."

"Aeross the lake? That's what I was heading for."

"Seems Sutprise lake is becoming populous," Smoke complained, emptyover. It will be a cinch."

It was a hard, hot climb. The sun blazed dazzlingly on the ice surface, his neck and tied it to the rope and and with streaming pores they panted increased the length by a second ban from the exertion. There were places, crisscrossed by countless fissures and manufactured from sled lashings and crevasses, where an hour of dangerous toil advanced them no more than a ted together, was both light and hundred yards. At 2 in the afternoon strong. The first cast was lucky as beside a pool of water bedded in the ice Smoke called a halt.

"Let's tackle some of that jerky," be said. "I've been on short allowance, the crack. But Carson, who had reand my knees are shaking. Besides, we're across the worst. Three hundred | waist, stopped him. yards will fetch us to the rocks, and it's easy going, except for a couple of nasty fissures and one bad one that heads us down toward the bulge. There's a weak ice bridge there, but Shorty and I managed it."

"I'm lighter than you by forty pounds," Carson said. "Let me go first."

They stood on the edge of the crevasse. It was enormous and ancient, fully 100 feet across, with sloping, age eaten sides instead of sharp angled rims. At this one place it was bridged by a huge mass of pressure hardened the bottom of this mass they could not | That's it. Easy, easy." see, much less the bottom of the crevasse. Crumbling and melting, the bridge threatened imminent collapse. "Looks pretty bad," Carson admitted

with an ominous head shake. "But we've got to tackle it," Smoke said. "We can't camp here on the ice all night. And there's no other way. Shorty and I explored for a mile up. It was in better shape, though, when we

"It's one at a time, and me first." Carson took the part coil of rope from Smoke's hand, "You'll have to cast Gimme your hand so I can slip down

He was a slender man, wiry with Slowly and carefully he lowered himwhere he stood, making final adjustments for the perilous traverse. On his back was his pack outfit. Around his neck, resting on his shoulders, he still fast to his waist.

"I'd give a mighty good part of my millions right now for a bridge construction gang," he said, but his cheery. whimsical smile belied the words.

The pick and the long stick he used as an alpenstock he balanced horizontally after the manner of a ropewalker. He thrust one foot forward tentatively, drew it back and steeled himself with a visible physical effort.

tom we'll make Rockefeller look like "I wish I was flat broke," he smiled up. "If ever I get out of being a mil-"But it's yours," was Carson's objeclionaire this time I'll never be one

"Nothing to it, my friend. You've "It's all right," Smoke encouraged. me try it first."

"I'll be all right in a minute. I'm all ness of the gold that it had not trav- er wouldn't be richer than half an acre right now," as his foot went out, this time to rest carefully and lightly, while the other foot was brought up and there's only one thing I'm afraid of. past.

Very gently and circumspectly he There's so much of it that if we fail to continued on his way until two-thirds control the output it will bring about of the distance was covered. Here be stopped to examine a depression be "And you tell me" - Carson broke must cross, at the bottom of which was a fresh crack. Smoke, watching, "Am glad to have you. It will take saw him glance to the side and down a year or two, with all the money we into the crevasse itself and then begin can raise, to drain the lake. It can be a slight swaying. done. I've looked over the ground.

"Keep your eyes up!" Smoke commanded sharply. "Now, go on!"

The little man obeyed nor faltered on the rest of the journey. The sun eroded slope of the farther edge of the crevasse was slippery, but not steep, much like a millionaire that I'm real and he worked his way up to a nartimid about crossing that big glacier. row ledge, faced about and sat down.

"Your turn," he called across, "But Wish I had some more of those hob just keep a-coming, and don't look spikes. I was just hammering the last down. That's what got my goat. Just in when you came along. How's keep a-coming, that's all. And get a move on. It's almighty rotten."

> the bridge was on its last legs was tend our deepest gratitude. patent. He felt a jar under foot, a slight movement of the mass and a heavier jar. This was followed by a single sharp crackle. Behind him he knew something was happening. If for no other reason he knew it by the strained, tense face of Carson. From beneath, thin and faint, came the murmur of running water, and Smoke's

pression. The sharp edges of the crack, but slightly touched by the sun, showed how recent it was. His foot was lifted to make the step across when the crack began slowly widening, at the same time emitting numerous sharp snaps. He made the step quickly, increasing the stride of it, but the worn nails of his shoe skated on the farther slope of the depression. He fell on his face and without pause slipped down and into the crack, his legs hanging clear, his chest supported by the stick, which he had managed

to twist crosswise as he fell. His first sensation was the nauseacaused by the sickening upleap of his pulse; his first idea was of surprise that he had failen no farther. Behind him were crackling and jar and movement, to which the stick vibrated. From beneath, in the heart of the glaof the dislodged masses striking bottom. And still the bridge, broken from its farthest support and ruptured in the middle, held, though the portion he had crossed tilted downward at a

pitch of twenty degrees. He could see Carson, perched on his ledge, his feet braced against the melting surface, swiftly recoiling the rope from his shoulders to his hand.

"Wait!" he cried. "Don't move, o feet of rope cached where we take the the whole shooting match will come ice. My partner and I used it coming | down!"

CASS COUNTY'S PRO-He calculated the distance with a quick glance, took the bandanna from danna from his pocket. The rope short lengths of plaited rawhide knotwell as deft, and Smoke's fingers clutched it. He evidenced a hand

"Make it fast around yourself as well," he ordered.

"If I go I'll take you with me." Smoke objected. The little man became very peremp

"You shut up!" he ordered. "If I ever start going" -- Smoke be

"Shut up! You ain't going to ever start going. Now do what I say That's right - under the shoulders Make it fast. Now start. Get a move on, but easy as you go. I'll take in snow that was itself half ice. Even the slack. You just keep a-coming

> Smoke was still a dozen feet away began. Without poise, but in a ferky way, it crumbled an increasing tilt. "Quick!" Carson called, coiling in

> hand over hand on the slack of the

rope which Smoke's rush gave him.

When the crash came Smoke's fin gers were clawing into the hard faceof the wall of the crevasse, while his body dragged back with the falling bridge. Carson, sitting up, feet wide apart and braced, was heaving on the rope. This effort swung Smoke in to on the ice and slipping down. Be self the several feet to the bridge. neath him, with forty feet of taut rope Smoke to a stop.

Each lay in a shallow niche, but Smoke's was so shallow that, tense with the strain of the flattening and sticking, nevertheless he would have slid on had it not been for the sligh: assistance be took from the rope. He was on the verge of a bulge and could not see beneath him.
