### Bad Luck With Invention.

Fritz Lutz has been trying his inventive powers at his farm the past few weeks, and among the inventions that have been trying his patience was a grinding apparatus that he rigged up this week. The machine was correctly designed, but Fritz arranged it so that it exceeded the speed limit of an emory wheel velocity, and when he applied the tool that he desired a keened edge on, the wheel was moving so rapidly that it broke into many pieces that were whirled at terrific speed through the air, some of which came near striking him. He then found a man to produce the desired edge for him, and went on with his farm work.

### The Place to Buy Lumber.

There never was a season so favorable for building and making improvements around your farm home as this one has been, and the activity around the Murray lumber yard is an evidence of this fact. More of all grades of lumber is being sold this spring than for many seasons. The demand for good goods and the fact that it can always be found at this lumber yard at the right prices are the causes for the increased business.

Mr. Kikendall is after the lumber business of this locality, not only from the fact that it is due him, but because he is ready and willing to meet all competition on the numerous grades of lumber.
