FARMERS ARE URGED NOT TO PLOW WHEAT

Ames and amusements had been experts from Lincoln Make Examinations in the Southwest.

Lincoln, Neb., March 30.—Agricultural experts and farmers of many years' experience, who have been making critical examination of the winter wheat acreage in the southern half of Nebraska, east and west, in a report made this evening, are nearly united in the opinion that conditions are not as bad as supposed and that with an early rain a half to two-thirds crop is indicated. While they found some fields were being ploughed up their advice is to delay further activity in this direction for a week or two weeks.

The men who have been making the examinations are: Dr. I. E. Addison, an expert on wheat culture; C. E. Haynie, representative of a Harvester company; P. L. Hall, regent of the University of Nebraska, and Frank E. Johnson, a heavy land-owner and wheat raiser. Haynie made examination all the way from Lincoln to Holdrege.

Constipation and Indigestion.

These are twin evils. Persons suffering from indigestion are often troubled with constipation. Mrs. Robert Allison, Mattoon, Ill., writes that when she first moved to Mattoon she was a great sufferer from indigestion and constipation. Food distressed her and there was a feeling like a heavy weight pressing on her stomach and chest. She did not rest well at night, and felt worn out a good part of the time. One bottle of Chamberlain's Tablets corrected this trouble so that she has since felt like a different person.
