Serbia Almost Cleared of Invaders—Eight Miles From Old Capital.

The liberation of Rumania has begun by entente forces after a year's occupation by the Germans.

Crossing the northwestern portion of Bulgaria at Lom Palanka, southeast of Iron Gates, French patrols have forced a passage of the Danube and entered upon Rumanian soil.

The French defeated German detachments and took prisoners. Serbians, supported by French cavalry, north of Nich, are continuing to advance with Belgrade eight miles distant. The food problem with any army but the Serbian would be difficult. The Serbians advance whether they are fed or not.

The Serbians are being aided by guerrilla bands, who hid in the mountains early in the war, and are now making their way down from the heights to cut off portions of the enemy stragglers in the rear.

Retreat in Serbia Costly. It is evidently the desire of the Austro-Germans to evacuate Serbia as quickly and as cheaply as possible.

But their retreat is being made costly by the Serbians. On the northern Italian battle front between the Brenta and Piave rivers the Austrians are being put to the test in a new attack by British, French and Italian troops, while in Mesopotamia the British again have gone on the offensive against the Turks and last accounts were making considerable progress.

May Mean Big Offensive. Military observers note that the first official reports refrain from describing the Italian attack as a drive.

The place selected indicates the operations may be a preliminary step to a major offensive. If the heights between the Brenta and Piave are carried it may be possible for the allies to reach the valley of the upper Piave and outflank the whole Austrian position on the lower stretches of the river.

The operations are being watched
