is a word you often see in advertising—with many it is only a word—here it is an actual fact. Service means to us just what it means to you. Service is something we practice as sincerely as we preach.

Like Job of old, J. D. Cross is having a time with a number of boils which have visited themselves upon him. He has several on his right wrist and forearm, which are interfering with his work. But he is not complaining, and we are hoping that while they may be valued at \$5.00 each, he will soon be rid of their company.

Several young people from Union drove to the Mt. Pleasant school house, near Nehawka, and enjoyed the program given there last Friday evening. Attorney C. L. Graves and Dr. C. M. Swab went out last Monday afternoon, taking their guns and a lot of ammunition with them, having in mind a hunting trip of the kind you hear talked about. Attorney Graves claimed he would not shoot anything larger than a squirrel, but the medicine man, it is averred never did shoot anything smaller than a bear. This we expect is all true, but we failed to hear of there being a scarcity of wagons in which to haul their game home. One thing we do know and that is they both pounded that old man with the scythe and an hour glass over the back and left him in a dying condition.

Mrs. Fred Clarke was a visitor in Omaha a few days ago, where she had her eye examined by a specialist, with the expectation of having a pair of glasses fitted. Upon rigid examination, however, it was ascertained that while her sight would be temporarily impaired, a complete cure could be effected. The specialist prescribed a treatment which would remove the pressure from the optic nerve, and thus relieve the cause of her impaired vision. When that is accomplished, if the need is still evident, the fitting of glasses will be proceeded with, as better results may then be obtained. Dr. Barrett is treating Mrs. Clarke for the present.

This is in accord with the wishes of both the teachers and pupils. Don't forget, there will be school Saturday of this week.

Some one with malice in their heart and without fear of human or divine punishment, proceeded to give the electric light engines at Weeping Water a treatment of emory powder, with the result that the proper working of the machinery was greatly impeded. Any man who would do a thing like that is deserving only of treatment such as would be meted out to a bolshevik or I. W. W. No use to throw grass at them, better begin with stones.

Jacob Lehman was in Union the other day and besides telling of the above trick, told of his son, Harold, who is still in the navy as a radio operator, having had a narrow escape, while making a dive in the submarine aboard which he works. Along with other towns on the new electric line, Union is desirous of being provided with electricity at an early date, the consumption of current here being in excess of what the local plant can satisfy. Often the street lights have to be turned off in order to accommodate the business houses and residences, in which electric lights are being installed with amazing rapidity, now that the town is to be supplied with good, dependable lighting service from the plant at Plattsmouth.

A few nights ago two citizens of Union, upon leaving their stores, started for home, each going in the opposite direction, and running into one another on account of the extreme darkness. It is said they felt the impact of the collision that almost spoiled the beauty of the two men, and did spoil for the instant their usual good nature. An explanation and an apology from each served to adjust the bad feeling and nature in a short time restored to them their disfigured good looks, so everything promises to be lovely if we can just get the lights installed and be assured against any further head-on collisions.

Robert Willis, a progressive citizen of Union, got a couple of teams out and graded the street in front of his place of business, also putting in a tile for draining the streets, and thereby making the place much better for himself and the public as well.

Commissioner J. A. Pitz, with his driver, Fred Valley, who handled the tractor, while Julius handled the grader, were in Union last Monday smoothing out the rough places in the new road and making it more serviceable than it would otherwise be. It is hoped to have this road in the best of shape when freezing up time comes.
