The Communities Welfare!

The banking business is one of more than ordinary interest to the community in which the institution is located.

To make the work of the bank most effective, there must be a confidence between the bank of its patrons, and between in fact the whole community.

Any fear of a financial institution is immediately reflected in the business of the whole community.

The bank which has proven its worth to the community is the one which has stood the test of good and adverse times and stands ever ready for the service of the whole community.

The patrons' interest and the community good is the bank's first concern. We are here for the service of the entire community.

Thanking you for your confidence, co-operation and earnest work for our community, we invite your business.

Trunkenboltz oil company, which is being installed at Murdock, has been started, with Frank Melvin and Alvan Bernemeier doing the work on the foundations. Roasted Weiners Thursday

The ladies of the R. N. A. on last Thursday met at the home of Mrs. James Mills and had a most enjoyable time as they had prepared for the occasion with a quantity of weiners which they roasted and had a most enjoyable time. The ladies who had become sedate on account of the years which they had accumulated, had thrown them away and were young as the youngest again, and the merry peals of laughter, as they feasted on the hot sizzling morsels, told of the happy time they were having. For the once the work in hand at the meeting was indefinitely postponed and "All went as well as a marriage bell."

Were Ready for the Burglars

When the alarm was telephoned to Murdock that an attempt to rob some bank in this neighborhood, was given to Henry A. Tool, he notified his associate in the business, Mr. Henry A. Guthman and with Messrs. Kenneth and Richard Tool, went to the Murdock Mercantile Co. place of business where they were able to watch across the street, keeping vigil during the night. Mrs. Tool watched at the window of their home which commanded a view of the road leading from the southwest and Johnsonson from the northwest, in order that the men stationed at the store might know if any cars came from the west. Mrs. Tool noticed a car coming at about one o'clock from the west with powerful lights and immediately communicated with the store, but as the car approached it was seen to dim its lights and later extinguish them as they slipped thru the town. The work of the men in the car was done so carefully that they were able to stop and get tools from the Rock Island tool house unbeknowns to the watchers who were intently looking after the two banks, as they not only watched the bank of Murdock, but kept going occasionally to see that there was nothing doing at the Farmers bank. Mr. O. J. Pothast had been notified, but on account of the fear of leaving the home alone, he had remained with the family.

Satan in the Toils!

It has been said that "a half hitch would hold anything, and two half hitches would hold the devil."

That has nothing on a halter which Mr. A. J. Tool is making from the best of leather and which will hold the "Old Harry" himself, and they sell only for one "buck" at the shop or \$1.25 elsewhere. Come in and see this wonderful "headgear."
