Last fall Wm. Brandt, who lives in the country near Nehawka, went to Omaha and purchased some sheep they being all ewes, which he put on feed and as the pieces were not long, as to have sold them at the time would have entailed a loss. During the time when he was waiting for an improvement of the market the flock found a number of lambs and some time since out of the 300 which he purchased he sold a car load and just recently sold another car realizing from the two some \$1,800 and has now on his farm 73 lambs left to the good, besides the profit which he has already made. It is not all sunshine on the farm but now and then there is a ray of hope.

Excellent Cows, Anyway
Last week we had an article regarding Ayrshire cows and the calf club which when it came to the reader said Airdale and would lead one to think the calf was part dog, but such is not the case, for the Ayrshire cow is one of the best of milkers and also somewhat of a beef animal. Laugh all you may desire at the turn the article took, but see E. M. Pollard just the same, and he will tell you something about this calf club which will be to your interest.

Application Overruled

AT JERUSALEM TO FILM
DAVID AND GOLIATH
Jerusalem, March 22.—Twenty stars of the American film world have arrived in Jerusalem recently to prepare for the filming of the Old Testament story of King David. The big scene in the play is to be the fight between David and Goliath which will be staged a few miles north of the city. Biblical accuracy is not strictly to be adhered to, since the scenario provides a love scene after the battle.
About 5,000 persons are to be employed in the filming of the play. Five thousand sheep, 1,000 camels, and 2,000 goats are also to be used.
This will be the first time a production of any magnitude has been filmed in the holy land. Apart from the appropriateness of the country for the filming of biblical stories, it is said that Palestine is unsurpassable for film productions owing, first to its natural beauty, and second to the clarity of the atmosphere.

GASOLINE SUPPLY OF THE NATION
Figures From Washington Indicate There Will Be Ample Supply For Needs at Present.

Washington, March 23.—The millions of motorists concerned over the matter of the nation's gasoline supply may experience at least temporary relief in the announcement of the United States Bureau of Mines that the stocks of this vital fuel were increased in the month of January by 119,000,000 gallons. On February 1, there was a reserve of 705,700,000 gallons, which is 130,000,000 gallons more than for the corresponding date in 1921. The figures are rapidly approaching the 800,000,000 gallon record mark made in May of last year. Production of gasoline in January amounted to 444,622,783 gallons; imports were 8,250,393 gallons; domestic consumption amounted to 2,271,168 gallons; exports to 49,856,310 gallons; and shipments to insular possessions 675,659 gallons. Present stocks are equivalent to fifty days' supply based on the total daily average consumption for 1921. Operative refineries in the United States numbered 292 on February 1, with an indicated daily capacity of 1,753,946 barrels. Plants running continued to operate on an 80 per cent basis.

An increased demand for gas and fuel oils may be anticipated if the pending coal strike becomes a reality. Stocks of these oils on hand February 1 amounted to 1,319,481,359 barrels. Based on the daily average domestic consumption for 1921, these stocks are equivalent to sixty-eight days' supply. The production of these oils in January amounted to 858,110,877 gallons.

During January the nation's output of kerosene amounted to 172,817,141 gallons, an increase of 2,500,000 gallons over the preceding month. The fact that, despite this increase in production, stocks of kerosene decreased 12,500,000 gallons indicates enlivening in the movement of this product.

Stocks of lubricating oil on hand February 1 were 245,000,000 gallons, an increase of 28,465,000 gallons over the month previous.

Whether there is any valid state law prohibiting the operation of stills and the possession of mash is a question the supreme court now has under consideration. A decision will not be given for some time. Arguments on the matter of whether the legislature blundered and put the amendment in a place where the constitution says it could not be legally inserted were heard Thursday morning at Lincoln.

At the last session of the legislature the prohibitory law was amended in a number of particulars. As passed Section 16, which originally covered only permits for the sale of ethyl alcohol, was amended so as to include a prohibition of keeping or operating a still. Judge Tewell of Keith county, before whom was brot John Opela, John Badberg and Adam Kosnicki, charged with violation of this section, held that it violated Section 14 of Article 3 of the new constitution which provides that no bill shall contain more than one subject and the same shall be clearly expressed in the title. He said that the amendment was not germane to the section amended. W. D. Oldham, a one-time supreme court commissioner, defended this ruling and attacked the prohibition of keeping or old law, which he said had made a roaring lion out of an innocent Mary's lamb.

It was the task of Assistant Attorney General Dort to defend the law. The arguments of both attorneys were largely technical. Dort laid down the broad general proposition that any number of amendments may be contained in an act, however diverse they may be, so long as they are not inconsistent with the general subject of legislation. It was done merely for convenience and was not mandatory. He said that nowhere had the constitution required the legislature to break up the laws they pass into sections. It was done merely for convenience and was not mandatory. Therefore, this entire law being de-

vised to laying down the restrictions to be placed upon the use and sale of intoxicating liquors, no part of it could be held unconstitutional because the new matter may not be deemed strictly germane to the subject of the section amended. If it be germane to the subject covered by the bill it is constitutional.

Mr. Dort further took the position that the object of the constitutional provision cited is to prevent deceit on the part of a legislator or a legislature, and to make it impossible to slip into a bill or to amend a law in such a way that public attention is not challenged to what is being sought. There is no question of that sort in this case, he said. The amended law contained a large number of changes and public attention was directed to all of them.
