This A Great Country

Last Monday while the representative of the Journal was in Nehawka there was going on in this community the following work, putting up ice, plowing, cutting stocks for the spring work and threshing some of last summer's wheat crop, thus including work from all the seasons. Now can you beat this for a variety of work on the 22nd day of January? We do not think California could equal the work which this day afforded the vicinity of Nehawka.

Water and Sewerage Talked

The people of this progressive little city are at this time discussing the problems of water and sewerage which would add much to the comforts and necessities of living in the town. Just what will be done regarding the matter is at this time unknown but much interest is shown. Had a good water pressure been in evidence at the time the fire which destroyed the home of J. M. Palmer the home could have been saved. The city needs both the water system and the sewerage system as well.

No. 14—This beautiful violin solo takes place as an intermezzo between the third and fourth scenes of the opera. The story, Athanael, a fanatic monk of the desert, has told Thais in the third scene, which takes place in her house, that he will wait for her on her door step all through the night. Thais, a girl of supposedly descriptive of the conflict in the soul of the woman, who has been very wicked, and who determines to give up the god of love for the love of God. The ending of the piece clearly leaves the impression that she turns to the right way of living and thinking.

Massenet was a French composer and was born in 1842.

No. 15—This is one of the numbers of his suite called "The Carnival of the Animals," in which he tried to picture in tone the actual traits and habits of certain birds and animals.

In this selection the smooth flowing melody, sung by the cello, represents the swan as it glides gracefully over the placid lake, the silence only broken by the occasional ripples of the water, as it overflows into a tiny brooklet. The murmuring of the water is skilfully brought out in the piano accompaniment. See if you can tell from the music where the swan raises his head.

Saint-Saens (sang-sah-ong or sahn sah) born in Paris in 1835. One of the most versatile of French composers.
