Congregational Meeting

The Presbyterian church of Murray will hold a congregational meeting at the church on Friday evening of this week, at which it is urged that every member of the church be in attendance. There are some matters of importance to the church affecting each member and it is desired that all be present.

Baseball Game Last Sunday

Last Sunday there was plenty of amusement in Murray when the Murray team pulled off a victory over another team from Nehawka, not the regular team, and when the ump called "Play ball," there was something doing until the game was finished. On their own grounds the Murray team proved invincible and made so many runs that they had not all been counted at the time we go to press. The visitors also made a number of runs which added glory to their already enviable record and by the way it is not known definitely at this time how many they had either. The only way it was known that the home town team had won, was that they had a half page more counted runs than the visitors. Those which were not counted and counted, were not taken into consideration.

Over Half Century Here

Last Tuesday, which was May 15, was the 56th anniversary of the arrival of the Wm. Lloyd family in this county, they crossing the Missouri river on that date in 1867 and from Plattsmouth went eight miles southwest to the home of L. G. Todd, and whose near neighbor was J. P. Buck a few miles away, as neighbors were then widely separated.

The Lloyd family were accompanied by their six children, they being Joseph, John W., Stephen, Davis M., George I. and Jane, five sons and one daughter. Miss Jane Lloyd became Mrs. Jane Totten, who died a few years ago. Mr. George I. Lloyd has made his home near here ever since and said to the Journal man that the day last Tuesday was much like the day they landed here, though a trifle cooler. They came over land from Peoria following the close of the war of the rebellion, Mr. George I. Lloyd being then just seven years of age. Mr. Lloyd thinks this just about as good a place to live in as the country affords.

Following the regular service of the Bible school, a very beautiful program was given, Richard Brendel giving a reading while Miss Mary Parks rendered a special number, accompanied by Mrs. W. L. Seybold. Messrs Miles Altman and Maxon Mellinger gave a piano and violin duet, and which was followed by a reading by Mrs. Grace Mellinger, assisted by Mrs. T. J. Brendel. DISABLED MEN'S SALARIES INCREASED BY ONE-THIRD

Men Taught by the Government are in Position for Greater Earning Capacity Now.

Men taught by the Government now earn one-third more than before the war, although handicapped by disability. This fact was brought out in a recent survey made by the Veterans' Bureau of district nine. The Government is training men along professional lines, as well as the different trades, using their pre-war education whenever possible. The great aid of Uncle Sam is to so rehabilitate the disabled soldier that he will stand on an equal competitive basis regardless of his disability. In this way the farmer who can not put in as many hours as his more fortunate neighbor competes with him by his newly acquired knowledge of expert farming. The laborer unfit for manual labor is taught a trade. The physician who can no longer stand the strain of his profession, becomes a specialist or a research worker. The finer arts, such as music, journalism and commercial art, are also taught. But these talents must be so marked as to lead to financial independence before the ex-soldier is allowed to take them up. An interesting fact brought out by the survey is that eighty per cent of the men choose their own training. Although the cost of training one man averages \$1,300.00, his earning capacity is so increased that his training practically pays for itself in four years.

Other interesting statistics in the report show that the average age of the man taking training is twenty-eight years, the average pre-war education is the completion of first year High and the average length of his training a year and a half. Twenty-six per cent of the men re-educated by the government work for themselves. Ten per cent own their own homes and thirty per cent own automobiles.

To feel strong, have good appetite and digestion, sleep soundly and enjoy life, use Burdock Blood Bitters, the family system tonic. Price \$1.25.

Attorney Joseph A. Capwell of Elmwood was here today attending to some matters of business in the county court.

does your motor just use up oil? or is it properly lubricated?

JUST because there's plenty of oil in the reservoir and you use up lots of oil, you can't be sure your motor is getting proper lubrication. Bearings may be heating and parts wearing out at top speed.

The temperature of the pistons and the cylinder walls varies from 400 to 900° F. Unless your motor oil is of the right grade, the normal operating heat of the motor can destroy its lubricating efficiency.

Years of laboratory and practical service tests have proved the lubricating efficiency of Polarine. It resists heat and always flows freely. Made in five grades—light, medium, heavy, special heavy and extra heavy—but one unsurpassed quality.

Consult the Polarine Chart for the grade best suited to your motor. Standardize its use and your motor will run quietly—a protective film guarding every moving part against friction and wear.

Ask for Polarine by name and be sure you get what you ask for. Sold where you see this sign.
