Going via the Pacific Northwest  
Returning from California  
via Colorado.

The Low Cost of the Trip  
Will Surprise You

It is an experience of a lifetime to become acquainted with the great storehouses of scenic, climatic, agricultural, and other wealth in the Pacific Northwest and California.

In making such a trip, it is both natural and logical for one to select that route on which the most and the best of the astounding wonders in our fascinating West can be viewed from the car window.

To the end that Burlington patrons may reap the fullest possible measure of delight, benefit and inspiration which such a wonderful trip affords, schedules have been developed and perfected via two widely different routes so that the most of the best scenery is passed during daylight hours.

Through the combination of these two routes par excellence into one grand circle tour of our impressive and progressive West, you can travel several thousand miles through a dozen great states, on one ticket.

You can see practically every kind of scenery, every phase of topography, every variety of plant life, every species of animal life, every sort of mineral wealth, and every beauty of landscape that the entire American West affords.

Aside from the broadened vision which travel only can give, such a trip may take you to the land of your dreams, to a home in this wonderland of natural beauties, to an opportunity in this wonderland of natural wealth, with a future wide open.

Let me tell you more about it and let your home-town railroad introduce you this summer.

Mrs. Christian Duerr Passes Away  
Last Sunday—Funeral Services  
Held on Wednesday.

The death of Mrs. Christian Duerr occurred last Sunday, June 3, 1923, at the home of her daughter, following a lingering illness due to the complications of old age. She was 77 years, 4 months and 1 day old at the time of her passing.

The maiden name of Mrs. Duerr was Mary Anna Hber. She was born in Greenville, Ohio, February 2nd, 1846, where she lived with her parents, the late Mr. and Mrs. Jacob Frederick Huber, and grew to womanhood. At the age of fourteen years, she was confirmed in the Lutheran church at Union, Ohio.

February 20, 1863, she was united in marriage to Christian G. Duerr. One year later they moved to Louisville on a farm where she and her husband and family resided for 42 years until the death of the husband and father. To this union were born eight children, four of whom died in infancy. Six years ago, Mrs. Duerr moved to Louisville to make her home with her daughter, Mrs. A. A. Leddy.

She leaves two sons and two daughters. They are George Duerr and Mrs. A. A. Leddy of Louisville; Philip Duerr and Mrs. M. E. Zear of Ashland. Two sisters survive her. They are Mrs. Carrie Krouse of Omaha and Miss Christina Huber, of Beatrice. Mrs. Duerr also leaves seven grandchildren and a large number of relatives.

Mrs. Duerr was always kind to all who knew her and in her last illness she received the sympathy of the entire community. The funeral occurred from the Methodist church on Wednesday afternoon, the pastor Rev. Cuthbert L. Elliott officiating, assisted by Elder W. E. Gofings of the Christian church. She was laid to rest in River View cemetery in the family lot beside her husband.—Louisville Courier.

Winter Wheat Slightly Improved  
With Estimate of 581,000,000  
Bushels; Kansas Drops.

Washington, June 8.—The principal grain crops of the country will be smaller this year than last with the exception of oats and barley, both of which have been planted on large acreages than a year ago, according to the department of agriculture's monthly report issued today. No reports have been made yet on corn.

Winter wheat shows slightly improved prospects resulting from May conditions, and a crop of 581,000,000 bushels is forecast. This total is a little more than was indicated a month ago and about 5,000,000 bushels less than last year's crop. In Kansas there was a reduction of more than 10,000,000 bushels in the forecast compared with a month ago, and in some other states there were slight decreases.

The season's first forecast of spring wheat production reported the prospective yield at 236,000,000 bushels, or 40,000,000 bushels less than last year's crop, which was placed at 276,000,000 bushels in revised statistics today. The spring wheat acreage is 5.1 per cent less than last year's. North Dakota's crop promises about one-third less than a year ago, while Minnesota and South Dakota will have slightly smaller crops. Montana and Washington show increases over last year.

Smaller crops of apples and peaches than last year are indicated, although they will be larger than the average crops of the five year 1917-1921 inclusive.

The condition of the crops, in percentage of a normal on June 1, was reported as follows:  
Winter wheat, 76.3; spring wheat, 90.2; oats, 85.6; barley, 99.0; rye, 81.1; hay, 84.4; pastures, 84.8; apples, 75.5; peaches, 65.7.

**The Power of a Simple Truth**

WHEN you again hear the remark that "the railroads are making too much money; their rates are too high," ask the speaker whether he has examined the facts.

Ask him whether he KNOWS anything about the enormous costs of running a railroad, despite close watchfulness over expenses.

If he doesn't KNOW anything about railroad costs his views are both valueless and unjust. If he claims to know, be sure his information is accurate.

More MISinformation is tossed around about railroads than any other subject, for lots of people think they know more about a railroad than those who have devoted their lives to it.

It is as wrong to bear false witness against a railroad as against any other neighbor.

The Rock Island System had to take in \$120,800,854 last year to pay its 40,000 employees and meet its other bills before it could count a dollar of profit.

Its taxes alone were \$6,163,175. That is where some of the dollars went which you paid in freight and passenger rates. A portion of them doubtless came to your community.

The TAX BILLS for 1922 were almost TWICE THE SUM RECEIVED IN DIVIDENDS by the thousands of persons who have investments in the property, some of them, perhaps, residents of your neighborhood.

For every \$2.81 paid in dividends, the Rock Island paid \$4.93 in Taxes last year.

It does not appear from this that the Rock Island is making "too much money" or that its "rates are too high."
