The Rev. C. Hewitt, minister of the Otterbein church north of Nehawka, on last Sunday evening began a series of revival meetings which he has had under consideration for some time. ### NEHAWKA SCHOOL NOTES

The second six week term is up with this week. Most of the classes are having examinations and the report cards will be given out next Tuesday.

The boys in the Agricultural Shop work have completed a "Model Store" for the 3rd and 4th grade room. This is having interesting arithmetic and making more practical.

School will be dismissed a little early Wednesday before Thanksgiving in order to give the teachers who are going out of town opportunity to catch the three o'clock train.

School will be kept Thursday or Friday, thus giving the school children ample opportunity to assist with finishing corn shucking.

The Juniors have received their flings and all are very much pleased with them.

The Juniors will give a Thanksgiving program for convocation on Wednesday morning.

The Seniors are planning for a convocation program week after this. Remember the basketball game with Louisville on Thanksgiving day. Both boys and girls. Celebrate Turkey day by attending.

The Agriculture boys have been making a hot bed frame as part of their work. It is being placed south of the Farm Shop, thus providing protection for it from the north winds. The reason for putting it in now is that it is much easier digging now than it will be later in the year. In the spring it will be started up and the boys will raise vegetable plants in it. This is one of the very practical parts of their study.

If you wish to know how many tons of hay in your stacks or the number of bushels of corn in a crib, ask one of the Agriculture boys to figure it out for you. They know how.

The Sophomores put on an Educational week program for convocation Wednesday morning. The following took part: Florence Griffin, Charlotte Hansen, Sterling Horze, Harold Dodson, Ruth Adams, Elsie Stoll and Merle Brandt.

The Hiking club is planning to go to the woods Thursday after school and take a lunch with them.

Remember the basketball games Friday evening.

The school board held a meeting last Saturday at which time they decided to give the teachers and pupils Thursday and Friday for Thanksgiving. They also decided to have a two weeks' vacation Christmas.

The man who took the pictures last week, has sent them on. Some of them were not extra good, but in years to come will bring back pleasant memories.

Gail Kettlehut has been quite sick during the past two weeks. He is in St. Elizabeth's hospital in Lincoln and is rapidly improving. His class mates of the fifth and sixth grades, sent him a large bouquet of roses, with which he was very much pleased.

Neil Pierce fell out of a tree and broke his arm last Sunday. He is in the hospital, but is somewhat handicapped in his writing.

Everyone present joined in the singing with true community spirit.

After the regular business meeting was held the crowd was treated to a short but pleasing Thanksgiving program by Miss Brady and the children of the school. The members of the club expressed their appreciation of the fine serving table presented to the club by Mr. Rohrdanz which the club will always feel proud of as Mr. Rohrdanz made the article himself. It is a very neat and attractive table being made so it can be folded and put away when not in use.

The boys' glee club is doing fine under the leadership of Mr. Mayfield. At a very late hour all wended their way homeward declaring they had had a most enjoyable time.

Owing to corn shucking the program was arranged with practically no practice.

A number of the farmers in the vicinity of Fairview are finishing cornshucking. A few more days of nice weather will see them all thru.

Start the Pullets Right

Success in realizing a high average egg production depends in a large degree upon getting the pullets started right, says the agricultural college, Lincoln. An important part in this is the feeding management. In order that the pullets may put on flesh instead of going into a molt dry mash should be fed sparingly for a time. A rather heavy allowance of scratch grain mixture has been found to "turn the trick." Twelve to 15 pounds of the mixture (3 parts cracked corn, 2 parts wheat and 1 of heavy oats) per day per hundred pullets makes a very satisfactory ration. Besides this a plentiful supply of fresh water should be provided as well as regular feedings of succulent green feed.
