"Thresh Your Own" Advance-Rumely **Steel Separator**

[Two-Plow Tractor Size]

OR the man who wants to "thresh his own" here is an "individual" separator that has no real rival. In the first place it is a Rumely. That means that it saves grain and cleans grain as no other separator can. Professional threshermen by the thousands in the United States and Canada swear by Rumely separa-

Then it is an ideal size for a two-plow tractor. Handles easily, runs easily and has a tremendous capacity for its dimensions.

Will Not Warp or Burn

Nearly 100% steel construction makes this separator immune to warping regardless of the weather or time you leave it unprotected. It is also fire-proof. This separator is especially adapted to the inexperienced thresherman. Every adjustment and oil hole is on the outside. A simple lever raises or lowers concaves. Blast, sieves and even the chaffer are handled from the outside. Everything is within easy reach

Being compact, short-turning, with a low center of gravity, this Rumely Ideal 22x32 job handles easily in barns or other places where there is not much room.

Come in and let us explain this efficient machine, showing you its many features.
