A man can live on less after he's married---he has to.

The married man will find that Loyalty Always Pays

—and loyalty to your home town bank pays in a hundred ways other than financial profits.

Money deposited elsewhere subtracts from the resources of your home town. On the contrary loyalty to your home bank benefits the community and entitles the loyal man to demand all the services his bank has and the co-operation of his associates.

YOUNG PEOPLE WEDDED IN IOWA LAST SATURDAY

Miss Clara Dean of Glenwood and Ernest Hutchison Formerly of This County Married

A wedding of interest to many in Glenwood and the western part of Mills county was solemnized in Sidney Saturday, July 12. The high contracting young people were Ernest Hutchison of Eau Claire, Wis., and Miss Clara Dean of Glenwood. The ceremony was pronounced by Rev. Miles at the Presbyterian manse.

The bride is one of the choicest of the daughters of Queen Mills, a graduate of Glenwood High school and a most successful teacher in our schools. She is fitted to adorn and gladden any home. Her friends are many and they consider the young man fortunate who has won her for a home maker. As is known, she is a daughter of our good citizen, B. B. Dean, one of the beloved pioneers of this county.

The groom is a son of Mr. and Mrs. W. P. Hutchison of Plattsmouth and is a young man of high standing in his home community and in his future home city, Eau Claire, Wis., where he has been associated with a brother in the implement business and where the newly weds will make their home.

Mr. and Mrs. Hutchison are visiting with relatives a short time here in Glenwood and in Cass county, Nebraska. They will go to Eau Claire, Wis., where after August 15, they will be at home to their many friends.—Glenwood Tribune.

AMERICAN ADVANCE IS BASED ON POWER

Super-Development Declared Necessary to Maintain the High Standard of Living.

London, July 13.—Super-power development is necessary in the United States in order to maintain the high standard of living in that country, Guy E. Tripp, chairman of the board of directors of the Westinghouse Electric and Manufacturing company, New York, today told the world power conference which is in session here.

Mr. Tripp explained that "more and cheaper" electric power was what he termed "super-power" included. This super-power development, he said, is now being carried out vigorously in America under private initiative. He maintained that government ownership is not essential to its accomplishment.

Government owned super-power systems, he declared, cannot furnish electric power at lower cost to the public than can privately owned systems.

Extensive plans are already under way explained, for a practical determination of the extent to which electric power may be used upon farms. A considerable area in one of the great farming districts of the northwest is to be equipped with an adequate distribution system, and with the co-operation of the farmers experiments will be carried out on a scale hitherto not attempted.

"The vision of the electric power leaders is so broad and comprehensive," said Mr. Tripp, "that it marks a new area in the application of power to industry; and if they are allowed to go ahead without undue obstruction, we may look forward in a comparatively few years to practically a nation wide super power system consisting of great high tension trunk lines receiving power not only from water powers and supplementary steam stations, but from all other cheap sources."

PACIFISM IS DENOUNCED BY FORMER A.E.F. CHIEF OF STAFF

Columbiat, S. C., July 15.—The doctrines of pacifism were denounced by Gen. J. G. Harbord, former chief of staff of the A. E. F., in an address today to the annual convention of the National Rainbow Veterans' association, which opened here yesterday for a three-day session.

"Only deluded men and women," he declared, "are taking part in spreading such doctrines," adding that women pacifists are either hopeless old maids or childless married women.
