

# MURDOCK DEPARTMENT.

PREPARED EXCLUSIVELY FOR THE JOURNAL.

O. J. Potthast has been having as his guest, Mr. and Mrs. A. C. Benst, of Lincoln, at their home in Murdock for the past three days.

Carl Schneider, who is employed in the Cadillac assembling plant at Omaha was a visitor with friends here for a short time last week.

Henry A. Guthman and family were spending a number of days at Almsworth during the past week and enjoyed the occasion very much, they making the trip in their auto.

J. A. Bauer has been getting in the winter supply of coal for Harold Tool and getting that gentleman ready for the winter, which most people are hoping is some ways off yet.

E. K. Morton is working on the school house and assisting in hurrying the work along in order to have the building all completed for the days when school shall begin this fall.

Mrs. Frank Melvin, who has been spending a few days last week at the home of relatives in Lincoln, where she had a most pleasant visit, returned home last Thursday afternoon.

O. E. McDonald and L. B. Goerthly were in Omaha one day last week, where they went for a load of mail and other soft drinks for the popular pleasure parlor of Mr. McDonald.

Roy Stauss, who has been attending school at Chicago, returned home last week, having just completed a course in electrical engineering and is building a few radios at the present time.

The Young Peoples society of the Evangelical church on last Sunday evening gave a most interesting program which resulted in an offering of \$14.00 which will be used for missionary purposes.

Mrs. J. E. McHugh and the children and Mrs. W. Tool and the family were spending a number of days with relatives in Lincoln, where they all had a most pleasant time in their visiting.

On Wednesday of last week the Rev. Lorenz Stauss organized a young peoples prayer meeting, having fifteen members of the young people of the church as its initial members of the meeting.

Mr. and Mrs. George Neinstell, of Clay Center, Kansas, who formerly lived near Murdock, but who have been living in Kansas for the past twenty years, were visiting here for a few days last week with friends.

The Rev. Lorenz Stauss, pastor of the Murdock church last Sunday, his subject being, "Stand Your Ground for Jesus," and which was a most eloquent and able discourse.

Mr. and Mrs. O. E. McDonald were enjoying Rock Bluffs day at the Old Settlers' picnic at Union on last Friday. Mr. McDonald was a former resident of Rock Bluffs precinct and was enabled to meet many of his former friends and associates there.

Miss Alice Lau, who has been at Omaha for some time past, where she has been receiving medical treatment and which it is hoped has improved her health, returned home last week feeling some better after

her two weeks' stay at the institution.

Harry V. McDonald and family, who have been at Meadow for the past ten days, where they were enjoying fishing, boating and swimming and a general good time in their outing returned home last Thursday well tanned and looking happy and healthy from the out of door life.

Word from Joe Wutchinek is to the effect that he is at Champalain, Illinois, and is working with Max Dusterhoff, they both being well satisfied with the work and with the country where they are located. They will expect to remain there for the next four weeks, when they will return to Bloomington.

Among the beautifully kept lawns of Murdock, we observed that of G. Bauer, which is surely a beautiful place as he has given much attention to the home grounds and they have responded to his magic work. It pays in appearance.

In general satisfaction and in the advertising of one's town to keep the home looking nice.

David Campbell is shelling and delivering the corn which belonged to Mr. H. H. Gakemeier, some three thousand bushels, which goes at \$1 per bushel, a much better figure than the 40 cents at which it was selling earlier in the season. Mr. William Heier also disposed of some 10,000 bushels of dollar corn but a short time since.

Mr. and Mrs. W. O. Gillespie and Miss Viola Everett departed one day last week in their auto for the west and will be gone for some time, seeing the sights of the west and visiting at the home of the father of W. O. Gillespie who resides in the vicinity of Douglas, Wyoming, where he is farming. They will expect to visit the country there and also investigate the crop conditions and will camp out along the way and enjoy the outing to the fullest.

Victor Thimgan is assisting in the finishing of the wood work at the new school building and many of the young men of the city are adding their services to make this one of the best buildings for the purpose that may be found in towns of anywhere near our size in the state. Among those working are Harry Gillespie, Richard Tool, J. W. Kruger, Walter Baumgartner and Ray Baldwin, as well as the painters and decorators, John Amgwert and Homer H. Lawton. The work is progressing very nicely and everything promises to see the completion of the building in time for the opening of school in the fall.

**Card of Thanks**  
We are duly appreciative of the sympathy and of the kindly acts which were rendered by our friends at the time of the sickness and death of our beloved sister, Mrs. I. J. Werfer, of Lincoln, which occurred last Sunday. May love, sympathy and service melt your grief when it shall be your lot to bear it.—The Hornbeck Brothers.

**District Meeting Tuesday**  
The members of the three camps of Loyal Neighbors of the Modern Woodmen of America, Weeping Water, Manley and Murdock, will meet with the Murdock camp on Tuesday afternoon, August 18th, when they will take up the business coming before them and also will have a social time as well.

**Murdock will Celebrate**  
With a remembrance of the excellent time which Murdock, and of how the citizens enjoyed the occasion when they had the Ford day some time since, the citizens are spurred to make an effort to even eclipse the good time which they had last year. At a meeting it was decided to celebrate for two days, and the dates have been selected as August 28th and 29th—Thursday and Friday of next week. Preparations

are now being made for the occasion. A most worthwhile program will be presented and enough amusement of a good clean character will be provided for all who are interested in a good time. The new school building will be well along by that time and will also be a feature in the celebration. All are bending their efforts to the end of making this a real home coming day for Murdock. The former residents of this community will be notified and invited to be present on the occasion, and it will be a feature of the occasion that an effort will be made to organize a Murdock Pioneers' association and to hold annual gatherings to keep the spirit which made this excellent little city possible alive. Not a bad idea! Everyone in Murdock will be found working to the end of making this a most successful gathering.

**Helped Make the West Prosper**  
In 1871, the year of the great Chicago fire which made them build a new and greater city, H. H. Gakemeier crossed the Missouri river at Plattsmouth on the ferry and for some two weeks stayed about that straggling city, and then hearing of the lands which would be required in the vicinity of Murdock, came and for two years lived near South Bend then Murdock, but moved to where he lived so long north of Murdock. When still a boy he attended school along with August Panska, they studying together. He was married about 40 years ago and farmed since then and the union has blessed him and the good wife with some eight children, all of whom are enjoying life to its fullest in Nebraska, with the exception of Will, who is making his home in Chicago. Herman and Gust are here, while John makes his home at Dunning, where he is engaged in the garage business. Carrie, who is now Mrs. Rev. Warther, Eleanor, a teacher in the Murdock schools, Martha, now Mrs. Rex Peters, he being manager of the elevator at Greenwood, while Mrs. Peters is a teacher in the Greenwood school, and a younger sister, Miss Lena, who is still at home.

Mr. Gakemeier purchased some of the lands from the Rock Island railroad and has five eighths or 400 acres and all good lands. At that time, Mr. Gakemeier well remembers when the people were discouraged in the earlier days of his stay here. Grasshoppers, dry years and hail, with other discouragements did not deter him for with a faith in the west and the farm, he stuck and has made this a success as well as with others winning the west from the prairie to one of the most fertile of farming districts and it is this class of men to whom the country is indebted for the great pleasures that we now possess.

**Visit Scene of Wreck**  
County Attorney J. A. Capwell, County Judge Allen J. Beeson and Attorney W. A. Robertson, all of Plattsmouth were in Murdock and went out to view the scene of the wreck where the car of Mr. Henry Kiemme was struck by the car of a traveling man and wrecked and the occupants of Mr. Kiemme's car injured.

**Card of Thanks**  
We desire to assure our friends and neighbors who so kindly visited at the time of trouble following the death of our beloved husband and father, August Panska, for the singing at the funeral, for the flowers and the sympathy extended in this our hour of grief.—Mrs. August Panska and Children.

**Citizen August Panska**  
The family of August Panska were left to mourn when the death Angel called for one of the best citizens which this community was well satisfied to claim, in August Panska. Well does the writer remember the meeting this genial gentleman with his pleasant greeting and kindly smile when coming to Murdock. The family are truly the greatest losers, but the city of Murdock and the church, where he was a most enthusiastic worker, are also losers. For his entire life he has been here, and he was an enthusiastic worker in the church and for the betterment of society. He enlisted in the service of his Master at the age of 17 and from that time on lived a most devoted and consistent life. Since coming to Murdock he has been a member of the board of education and a member of the town board and was ever found working for the best interests of the village and its advancement. His presence and his good counsel will be missed by his associates in the good work of making Murdock a bigger and a better town.

## MARKETS VERY GOOD CORN

The elevators at Murdock are being kept busy receiving corn the past week and two of the well known farmers of that locality have sold their surplus corn at a good figure and which will give them a pleasing return for their labors. William Heir, Sr., has disposed of 10,000 bushels of corn at the elevator at the price of \$1.00 per bushel and Henry Gakemeier has also sold and delivered 4,000 bushels of corn at the price of \$1.00 per bushel and Henry several years the farmers of the county are receiving a good price for the crops they have raised.

## NEBRASKA GRAIN CROP LOOKS UNUSUALLY GOOD NOW

Despite Acreage Wheat will Reach Largest Figure Since 1916 Says State Reports.

The present crop situation is unusually good for this date, says the August report of the Division of Crop and Livestock Estimates. Evidence of greatly increased prosperity about in nearly every county due to good yields and advanced prices, and a feeling of optimism is apparent.

The winter wheat crop has exceeded the highest expectations with the largest yield since 1916. The corn crop will be considerably above the average of the past five years. The oats crop will be about three fourths of a normal crop.

The average yield of wheat is 19.2 bushels, the highest by far since 1916. Despite the reduced acreage, the crop will reach 55,834,000 bushels. Last year, the production was 28,290,000 bushels and the 1918-22 average is 52,244,000 bushels. This is really the first good yield since 1916. The 1917 year average is 15.3 bushels and the past five year average 14.5 bushels. This year's yield has been exceeded four times since 1895.

The large wheat yields surprised the most optimistic. Seldom, if ever, has the improvement during the last five or six weeks of the year been so marked as this year. The dry winter and spring continuing to almost June 1 had not only reduced the stand from one-third to a half, but had left the crop in a weakened, unpromising condition. Cool, wet weather during June revived the crop to an extent that is hardly realized. There was practically no rust of either kind, and the leaves and stems functioned properly until maturity. Although orange leaf rust is not generally considered very harmful, its absence this year may have been a factor in the large yields.

The quality of wheat is 97% as compared to a 10-year average of 89%. Test weights are abnormally high. In the drier sections of south central, southwestern and western Nebraska, some very high gluten tests have been reported, but in eastern sections the percentage of gluten is considerably lower as is usually the case when rains continue until harvest.

The condition of corn is 80%, an improvement of 6 points during the month of July. In most counties, the splendid color, rank foliage and growth makes the crop appear like gluten of 100%. However, the crop has been discounted for the following reasons: It is about ten days late; considerable areas of severely damaged fields in lowlands; some poor stands; about 10% of the crop is very late and can hardly be expected to mature. The soil moisture supply is excellent except in northwestern sections, and the final outcome will depend largely upon the time of the first killing frost. The present forecast is 211,045,000 bushels against 272,052,000 bushels last year and the 1918-22 average of 190,586,000 bushels.

The condition of oats at the time of harvest was 85% which indicates a production of 77,658,000 bushels. Last year the crop was 91,048,000 bushels and the 1918-22 average is 67,070,000 bushels. Stocks of old oats total 4,458,000 bushels or 5.5% of last year's crop.

The condition of spring wheat is 75%. The present forecast is 3,384,000 bushels. Last year the crop was 3,168,000 bushels. Drouth in western counties reduced the prospects. The present forecast of all wheat is 59,218,000 bushels against 31,388,000 bushels last year.

The condition of barley at the time of harvest was 79% which indicates a crop of 8,944,000 bushels. Last year's crop was 9,432,000 bushels. Dry weather in the leading producing counties is responsible for the reduced crop. Stocks of old barley total 380,000 bushels or 4% of last year's crop.

The average yield of rye is 14.5 bushels. The production is 1,914,000 bushels, against 1,584,000 bushels last year. The quality is 94%.

Estimates of grain crops for the United States this year and last are: Corn 2,534,490,000 bushels this year; 3,046,387,000 last year. Winter wheat, 589,550,000 bushels this year; 572,340,000 last year. Spring wheat, 224,767,000 bushels this year; 213,401,000 last year. Oats, 1,429,041,000 bushels this year; 1,299,822,000 last year. Barley, 1,841,711,000 bushels this year; 198,185,000 last year.

**A LITTLE TALK ON THRIFT**  
With the development of good roads and the increasing popularity of the automobile, people everywhere are spending more time in woodland retreats, and it is a matter of public education that lessons in forest preservation should be given more widespread attention.

Last year 11,500,000 acres of forest lands in America were burned with a financial loss in excess of \$16,500,000, according to data compiled by the National Board of Fire Underwriters. The area of our despoiled forests during last year alone was eight times the acreage of the

## DEATH OF HENRY KUHNHENN OCCURS AT AVOCA

Old and Well Known Resident of North Branch Precinct in Otoe County Passes Away.

Henry Kuhnenn, formerly a resident of Avoca, died Monday at the home of his son, Fred Kuhnenn, in North Branch, where he had made his home for some time past. Mr. Kuhnenn was taken ill 5th February and gradually grew weaker until the end came August 15th, at noon.

Henry Kuhnenn was born at Kindeleton, Wis., July 27, 1855. He learned his religious instruction and was confirmed in the faith of the Lutheran church while a lad and remained in that faith until his death.

He came to Nebraska as a young man to seek his fortune in the west and on May 25, 1882, he was united in marriage at Nebraska City to Miss Margaret Harding of Kindeleton, Wis. For a time they resided on a farm, but 24 years ago he retired and became a resident of Avoca. On February 6, 1906, his wife passed on to the better land, leaving him and their son alone.

In his declining years his son dutifully repaid the loving care of youth by giving his father the tender care and devotion of a son.

Mr. Kuhnenn was active in the affairs of Avoca after becoming a resident of that town and was for some time a member of the town board, and at one time was actively engaged in business in that village.

He was a sincere, upright man and had a host of friends who esteemed him for his integrity and industry.

He is survived by his son, Frederick William Kuhnenn; one sister, Mrs. Caroline Weisel, of Plattville, Wis., two grandchildren and other relatives, besides a host of friends in this and other communities who will mourn his departure.

Funeral services were held Friday at 1 p. m. at the home and at 2 p. m. at the church at Avoca, and were conducted by Rev. C. Gabler of Syracuse. The body was laid to rest in the Avoca cemetery by the side of his beloved wife.—Weeping Water Republican.

## MANAGER CLAIMS RAILROADS WILL NOT ALTER PLANS

Burlington Will Make Consolidations; No Big Labor Layoff; Expect to Add to Regular Force.

Assurance that no changes are being made or contemplated by the Burlington railroad which would be detrimental to Omaha, were given by General Manager E. Flynn of Burlington lines west, in an interview Thursday evening.

Reports that the Burlington was shifting departments so that fewer men would be employed there and more in Lincoln have been so current that many Omaha business men were aroused and the Chamber of Commerce communicated with Flynn, asking for information regarding changes.

**One Consolidation.**  
Flynn responded with a communication in which he declared that although for economic reasons it was necessary to consolidate one department maintained in Omaha with a similar department in Lincoln, this consolidation would not result in the employment of fewer men at the Burlington shops in Omaha.

Reports that changes unfavorable to Omaha were being made persisted, however, and in an effort to refute them Flynn said:

"In April, for economic reasons, we found it necessary to consolidate the position of master mechanic, with the result that instead of two master mechanics, one in Omaha and one in Lincoln, there is now one, located in Lincoln. The Omaha mechanical division was of short mileage.

**Loss of Two Men.**  
"This consolidation resulted in the removal of five clerks from Omaha, but the day the change was made we put three clerks to work in the tax and legal departments, so the loss was only two men. Moreover, since the heavy movement of wheat has begun we have increased our forces in the Omaha roundhouses so that the total 394 men are as compared to 391 men a year ago.

"We expect to add to our force as the weeks go by, and a glance at employment statistics show that our force has been increasing each year in proportion to the growth of the city.

"On the same day that we made the changes in April we also put to work 63 maintenance of way men. We are now planning to make roundhouse enlargements here which will cost about \$20,000. This work is to begin immediately and should be completed before the weather, and will result in the employment of 20 to 25 men while it is in progress. The Burlington and its officials realize the importance of Omaha and will do everything possible to aid its growth."

**A LITTLE TALK ON THRIFT**  
With the development of good roads and the increasing popularity of the automobile, people everywhere are spending more time in woodland retreats, and it is a matter of public education that lessons in forest preservation should be given more widespread attention.

Last year 11,500,000 acres of forest lands in America were burned with a financial loss in excess of \$16,500,000, according to data compiled by the National Board of Fire Underwriters. The area of our despoiled forests during last year alone was eight times the acreage of the

## French forests destroyed or damaged throughout the World war. The total number of fires was in excess of 50,000.

It is said that between 80 and 90 per cent of forest fires are caused by human carelessness. About 20 per cent result from carelessness in handling cigarette butts. The general negligence of campers in using precautionary measures while cooking also constitutes one of the great causes of woodland conflagrations.

The forests of America originally totaling \$22,000,000 acres have today dwindled to 138,000,000 acres of virgin timber. Not only do forest fires, as reflected in these statistics, involve a great loss of human life and property, but this wanton destruction deprives our life of food and shelter, despoils public playgrounds, relinquishes control of the distribution of moisture and curtails the supply of chemicals and other by-products of our woods.

The destruction of American forests affects each of us, and each of us should assume an educational responsibility in seeking to prevent the progress of these despoiling forces.—By S. W. Straus, President American Society for Thrift.

## SHAVER SAYS DAVIS' CHARGES ARE PROVEN BY SPEECH

Speech of Coolidge is Best Proof of Complacency in Corruption—Refers to Grafting

Chicago, Aug. 14.—The speech of President Coolidge accepting the republican presidential nomination is "the best justification for the democratic 'clean thinking' campaign," declared in a statement here tonight.

Mr. Shaver called the president's speech "the most complete possible proof of the charge made by Governor Davis, democratic presidential nominee of the complacency of the republican party and its candidate in the face of corruption."

"The speech of the president raised at once the question of whether or not the American people are capable of 'clean thinking,'" Mr. Shaver's statement said. "We think they are. He evidently thinks they are not. No other conclusion seems possible when you consider his messages dealing with scandals of the last four years.

"We are entitled with all respect to ask what the president means by this amazing statement. What sort of an answer is this to the bribetaking in the department of interior, the stealing in the veterans' bureau and the graft in the department of justice? Does the president mean that because of the budget system these things did not occur? Or does he mean that if they did occur that because of the budget system they were not dishonest; or does he mean because of the budget system the party of which he is the leader and candidate is not responsible and should not be criticized? I am at a loss to follow the logic of the president's defense."

## BANK ASSESSMENTS FOUR MILLION LOWER

Tax Commissioner Accounts for This by Reduction in Land Held by State and Nationals.

The assessed valuation of state and national banks in Nebraska this year is \$46,794,312. Last year the valuation was \$50,628,243. State Tax Commissioner W. H. Smith accounts for this reduction of \$3,833,931 by a falling off in the amount of land which banks had taken over and held for debts. Under the law banks cannot hold such lands for a period of over five years.

This is the full valuation of banks. Suits affecting 1923 values are pending in the state and federal courts at Omaha instituted by bankers for the purpose of obtaining a decision which will permit bank property to be taxed as intangible property. If these suits are won by the banks the assessed valuation of banks will be one-fourth of the full valuation.

Applying the average tax rate of last year to the bank valuation this year would make the total bank tax payable to the state, \$79,000. This average rate of levy is low when applied to banks as the larger banks are in communities where the rate of levy is higher than the average of 17 mills. If the banks win their case the tax due the state from banks would be increased three-fourths.

In regard to the taxing of banks for lands owned, Tax Commissioner Smith says bank real estate is taxed separately from capital stock, and lands are deducted from capital stock for taxation purposes. The result is that some communities banks have all their capital in lands and pay no taxes in the city or village except taxes upon their bank buildings if these buildings are owned by the banks.

Frank Krank and wife were among the visitors in Omaha today to look after some matters of business for a few hours.

## NORTON FLAYS G. O. P. ON TAXATION ISSUES IN SPEECHES

Deplores Repeal of Excess Profits Tax in Talks at Clearwater and O'Neill.

O'Neill, Neb., Aug. 14.—Taxation, from both a national and a state viewpoint, were discussed by J. N. Norton, democratic candidate for governor, to two immense audiences of farmers and stock raisers at Clearwater and at Hudson's Grove, fifteen miles north of O'Neill, Thursday.

Both gatherings were community and old settlers' picnics, attended almost exclusively by real dirt farmers and the governor nominee was among friends at both places, which he frequently has visited as speaker in the interest of agriculture.

His development of the taxation theme was a divergence from his address at Beaver Crossing, attended previously. The repeal of the excess profits tax passed up the opportunity to compel the profiteers to pay their fair proportion of the cost of the war and of the expenses of government, he said. This likewise applies to the proposed cut in the income tax which the democrats had successfully opposed as the representatives of the masses, he said.

He opposed the republican plan for a sales tax which he said was really a commodity tax which could not be levied in proportion to the ability to pay.

Discussing state taxation, Mr. Norton congratulated the people on the 33 per cent cut in state taxes made under the administration of Governor Bryan, and referred to his own legislative record as chairman of the finance committee as consistent with his declared stand for economy in the administration of state affairs.

The address at Clearwater was delivered at 11 o'clock in the morning, after which a fifty-mile automobile drive was made for the O'Neill address, shortly after 3 o'clock.

## SEEKS TO INSURE SAFETY OF WILD FOWL IN AMERICA

Department of Agriculture Seeks a Means to Protect the Game Fowls from Slaughter

In response to numerous petitions recommending an immediate reduction in bag limits on wild ducks and geese and requests for an expression of the views of the Department of Agriculture on the subject, Secretary Wallace announces that since the first migratory law became effective March 4, 1913, the department has received many communications from nearly every section of the country indicating a very substantial increase in migratory birds, particularly wild ducks and geese. He states, however, that some persons assert that migratory birds, especially migratory wild fowl, while having increased greatly in numbers for some years after the Migratory Bird law became effective, have really decreased during the past few years and that impressions of an increase are gained because some of the birds now are concentrated in existing areas untouched by the drainage operations that have destroyed such a large portion of their former homes.

In order that the Migratory Bird Treaty, Act and Regulations may be efficiently administered, the department constantly seeks and is receiving information concerning migratory bird conditions, and will continue to acquire additional data on this subject.

The National Outdoor Recreation Conference, adopted a resolution recommending suitable reductions in bag limits where necessary and Mr. Chauncey J. Hamlin, chairman of the Executive committee of the conference, at the request of the committee, has requested the department to carry on an investigation to determine whether waterfowl are increasing or decreasing in the United States. In compliance with the request, the Biological Survey of the department has sent out a questionnaire to conservation societies, and sportsmen's and game protective associations, State and Provincial game departments, and the game wardens of the Biological Survey, its collaborators, and its scientific observers, to obtain up-to-date information concerning the present status of migratory birds and the condition of their breeding, feeding and resting places. The data gathered will be given careful consideration by the department, as well as its advisory board, and also will be available for use of the National Outdoor Recreation conference.

The department wishes to make clear that it is fully awake to the importance of keeping in constant touch with migratory bird conditions and that it will not hesitate to take any step needed and which lies in its power to insure the future safety of wild fowl and the perpetuation of wild-fowl hunting in the United States.

## OPPOSED TO FIVE DAY WEEK

Toronto, Ont., Aug. 14.—A proposal for a five-day week was reported unfavorably by the law committee of the international typographical union today. The motion would have been sponsored by New York delegates, who favored the change on newspapers. Western representatives opposed it.

The convention defeated several propositions to increase pension funds. Kalamazoo, Mich., was chosen for the 1925 convention.
