There occurred a change in business when on last Sunday morning Frank Robb purchased the restaurant business of Arthur W. Ton Litter Multiplied
The ton litter of Spotted Poland China hogs which C. W. Stone and son had last year, have been more than reproduced this year for he has a whole yard full of them and excellent ones at that. The lover of fine stock would do well to see them whether he should want any or not for they are far superior to any which you see at many of the county fairs. While this is true the herd of Jersey cows are quite as good as are the hogs.

MAKING UP FOR TIME LOST DURING THE SPRING

Corn Growing Rapidly and Other Crops Making Good Headway With Plenty of Rain.

H. L. Lewis, division freight agent for the Burlington at Beatrice, finds that the corn average for the parts of four divisions within his territory is 85 per cent and that it is growing rapidly.

The summary of his report follows: "Corn crop has made excellent growth during the past two weeks; report of slight damage to corn from the effects of hot winds in the extreme western part of the state, Nebraska and northwestern Kansas; however, the second day after the hot winds ceased rain fell over the territory and it is estimated that damage has been largely overcome. The corn crop is approximately ten days late but with favorable weather from this time forward better than normal crop may be expected. Fruit crops like Douglas, Cass, Oso, Nemaha and Richardson, the loss in marriage license fees is quite noticeable. "Stop, Look and Listen" may be all right as a warning to motorists at the railroad crossing but those matrimonially inclined are loath to wait and want the license at once.

In 1923 there were 12,416 licenses issued in Nebraska and in 1923 only 8,129.

STORM LAYS WASTE IOWA FARM LANDS

Two Men Drowned in Flood Waters Following Cloudburst Near Cedar Rapids, Iowa.

Cedar Rapids, Ia., Aug. 18.—Two farmers, J. Schalley and D. E. Claud Barret of Bertram, eight miles east of here, were swept away and are reported to have been drowned in flood waters this evening while searching for cattle. A cloudburst late this afternoon caused several thousands of acres of farm land in this vicinity to be under several feet of water. Reports reaching here indicate that the storm caused great damage to crops. Telephone and telegraph wires were swept away.

Railroad advices received from Vinton, Ia., state that houses there and east to Marion, Ia., also suffered heavy damage.

Six and a Half-Inch Rain
Farmers in the vicinity of Coggon, Linn county, report that much of their corn crop was washed away as well as small grain in shock.

At Reinbeck, Grundy county, six and one-half inches of rain fell during the day. County agents and farm experts say that today's storm was the most destructive this summer.

Choked sewers caused one section of Cedar Rapids to be under from four to ten feet of water. Canoes were used by motorists who had cars parked in the flooded area.

All street car traffic in several sections of Cedar Rapids was tied up to-night because of the storm.

Motorists Stranded
Towa Falls reports that the power house there was put out of commission by the storm.

A score or more of stranded motorists are reported to be stuck in the mud in the vicinity of Traer.

There was a three-inch rainfall here this afternoon. At 9 a. m. the Cedar river had risen more than a foot and still was rising.

No attempts were being made to-night to search for Barret and Schalley. Fears were expressed at Bertram that other farmers may have lost their lives in searching for livestock when the Big Creek went out of its banks.

Cedar Rapids, Ia., Aug. 18.—From two to three feet of water covered entire farms in eastern Iowa tonight as a result of an unprecedented rainfall of three inches this afternoon.

Damage to crops is reported as the most serious in years. Entire fields of corn were washed away and it is feared that grain which withstood the storm will heat in the bins.

Many of the surrounding towns were cut off by wire due to hte storm and reports are meager.
