U. S. TO MARK 50,000 MILES OF HIGHWAY

Every Federal Aid Road in Country Included in System; Warning Signs to Be Posted.

Washington, Aug. 8.—Fifty thousand miles of road, honeycombed by the United States from the Canadian border to the Gulf coast and from the Atlantic to the Pacific, were selected Wednesday by the joint board on interstate highways as "United States" highways to be designated with uniform road markers.

The actual grouping of these roads into arterial highways was abandoned by the full committee and was turned over to a subcommittee which, after making tentative designations, will submit recommendations to the various states for approval.

Every federal aid highway in the United States is included in the system, which provides for no through routes, but embraces every state capital and most points of national and sectional interest.

When the routing of the highways is completed, they will be numbered so that tourists traveling on any road may know from its number the territory through which he is passing and where he is going. The routes will be posted with uniform signs informing the travelers of curves, railroad crossings and other conditions of the road.

The markers which will show motorists their routes will be the shield of the United States bearing the number of the road, the state in which the sign is posted and the letters "U. S." In addition, variously shaped signs will be placed to give warnings of dangerous curves, railroad crossings and the condition of the road surface.

The exact routing of the main highways will not be determined until the subcommittee makes its recommendations to the various state highway officials who will have the power to make minor changes. The routing will be guided mainly by metropolitan cities, state capitals, resorts and points of general interest. No new road construction is involved in the system other than roads now planned under the federal aid program. The board has no power to maintain the present regular highways, but will devote its funds to the purchase of the signs.

Network Over Country. The system literally forms a network over the entire country, including stretches extending over several states along with short spurs of only a few miles. Under the plan of the board a motorist at any point in the United States can be constantly informed by the markers which will be posted at frequent intervals.

The subcommittee which will complete the work on the system is composed of E. W. James, of the bureau of public roads, chairman; F. T. Sheets of Springfield, Ill.; B. H. Uepmiller, Jefferson City, Mo.; R. A. Gline, Salem, Ore.; Charles H. Moorefield, Columbia, S. C., and Cyrus S. Avery, Oklahoma City, Okla.

BE READY FOR THE "COLD SNAP" Two grovers at Mabton, Wash., have sold their Anjou pears for \$100 a ton. Both men beated their orchards freely to ward off spring frosts. Their price is from \$22 to \$25 a ton better than that paid for most other pears.

Hard luck may come to the best farmer, as it comes to the best men in other lines. But the man who really tries to raise better crops, almost always does it. There is the story of the shiftless farmer who objected to the young extension lecturer in his community. "What's the use of talking to me about better farming? Why, I don't even use what I do know about good farming."

Frosts are certain to come in business or farming and the wise operator will have his heaters and his resources ready for the "cold snap."

FORMER UNITED STATES SENATOR PASSES AWAY Wilmington, Del., Aug. 8.—Former Judge George Gray, prominent in democratic politics ever since the civil war, died here Friday at the age of 85.

Judge Gray, besides having been a United States circuit judge for 15 years, was three times elected to the United States senate from Delaware, the first time to succeed Thomas F. Bayard when the latter was appointed secretary of state in 1885.

He was named to many important diplomatic posts and commissions under several administrations, including Presidents Roosevelt and Wilson. He was a member of the peace commission at Paris in 1898, and was a member of the international permanent court of arbitration under the Hague convention of 1906. He was vice president of the Carnegie endowment for international peace.

It is said that every pint bottle of whisky taken by government agents in prohibition raids has cost the government \$27. Uncle Sam is paying too much for it. Bootleggers will deliver it for much less than that.
