ARMY AIR PILOTS TEST PLANE BRAKE

Dayton, Jan. 15.—First tests of an airplane brake, designed to stop the ship within a short distance after landing, were made by army air pilots at McCook field here Thursday. One of the advantages of brakes on a plane, which operate similar to brakes on an automobile, is that they will enable flyers to make emergency landings on small fields.
 The plane must have lost nearly all of its flying speed, which settles the tail of the ship firmly on the ground, before the brake can be applied. When it is, the plane can be stopped quickly. If applied to soon, the plane will "nose over."

POLICE CHIEF ACCUSED OF AIDING BANDITS TO ESCAPE

Hollisboro, Mo.—Chief of Police L. W. Hurst of DeSoto Missouri, is in the county jail here today, charged with having aided in the escape of bandits who robbed the American bank of DeSoto of \$19,649, December, 30.
 Hurst is charged with having advanced information of the route to be taken by the bandits in their escape from the bank and with having led his posse off their trail. An alleged confession by William Perkins, on whose farm the bank loot is alleged to have been divided, led to the arrest of the peace officer Saturday. Two other men, both of Blytheville, Ark., are being held here while a third implicated is in jail in the Arkansas town.

Attack Made on the Railway Bill at Hearing

General Council of National Manufacturers Association Contends It Fails to Protect Public.

Washington, Jan. 15.—The Wallen-Parker railroad labor bill was attacked today before the senate interstate commerce committee by James Emery, general counsel of the national manufacturers association,

who contended that it did not properly protect the public interest. If the bill is adopted without amendment, he declared, congress has abandoned the policy of protecting the public in railroad labor disputes and steps back to the situation existing in 1920 when the public interest was not protected.

At previous hearings of the committee, passage of the bill had been urged by representatives of both the railroad operators and the union employes on the ground that it was an agreement reached by the principals to settle disputes and maintain uninterrupted transportation. Just before Mr. Emery appeared W. N. Doak, of the trainmen's brotherhood, told the committee that

the measure was "adequate to protect the interests of the railroads and the employes and fully adequate to protect the public interests and to assure industrial peace on the railroads."

Mr. Emery, on the other hand, argued that abolishing of title three of the transportation act of 1920, which is a special provision to protect the public, a policy would be adopted to permit employers and employes to make unrestrained agreements that would place "uneconomic upon transportation."

During the discussion, Senator Wheeler, democrat, Montana, remarked: "I understand President Coolidge favors the bill as it is."

"I do not so understand it," Mr. Emery replied.
