**TRAIN RADIOPHONE SYSTEM A SUCCESS**  
Washington.—The wireless train telephone system developed by prominent manufacturers of wireless equipment in Berlin has now been developed to a point where the manufacturers claim it to be a commercial success, the Department of Commerce is informed by Trade Commissioner T. Pilger, Berlin. Transmitters and the necessary relay stations are now operating for trains running between Berlin and Hamburg.

The Zugtelefonie A. G. Berlin, with a capital stock of 900,000 gold marks, has been organized for developing and extending the service. The company was floated by several strong German companies, one of which, the Huth company, is bringing all its patents and licenses for other patents into the new company. This company also delivers its contracts with the Federal Post Office Administration and with the German railways, as well as its present and future experience in train telephone communication. In exchange for these rights, it receives one-third of the stock of the new company, equaling 300,000 marks.

Actual cash expenditures for the equipment of trains operating between Berlin and Hamburg which have already been installed and which amount, it is said, to approximately 30,000 marks, are also refunded to the Huth company.
