## Watch Elimination!

Good Health Depends Upon Good Elimination.

RETENTION of bodily waste in the blood is called a "toxic condition." This often gives rise to a dull, languid feeling and, sometimes, toxic backaches and headaches. That the kidneys are not functioning properly is often shown by burning or scanty passage of secretions. Thousands have learned to assist their kidneys by drinking plenty of pure water and the occasional use of a stimulant diuretic. 50,000 users give Doan's signed endorsement. Ask your neighbor!

## MEET THE NEW MARSHAL

The village marshal star is packed by a new man, Clarence Ackles. He was appointed by the village authorities at their last meeting. The salary attached—\$10 a month—will not warrant him in remaining on duty at all hours, day and night, but the village dads say that while he is a peaceable and law-abiding community it might be necessary to have someone in authority should some stranger so far forget himself as to shatter the peace and dignity of the community. Marshal Ackles wears the star with dignity and as he stands six feet three there is not much chance of an argument when he asks that you observe the laws and ordinances of the city.—Louisville Courier.
