

Greenwood Department!

Prepared in the Interest of the People of Greenwood and Surrounding Vicinity

Andrew Stephens and family of Hamlin, Mo., were guests for a few days during the past week at the home of Mr. and Mrs. David Appham.

Glen Peters departed early last week for Lincoln where he entered the state university and expects to take the entire course in the institution.

Fred Emmett and wife of Lincoln were spending last Sunday at their friends C. E. Caffee and family, and where all enjoyed the visit very much.

Norman Peters, who underwent an operation at a hospital at Lincoln last week, is so far improved that he was able to return home during the past week.

County Constable Thomas Svoboda of Plattsmouth was a visitor in Greenwood on last Wednesday, having some legal papers to serve on parties in this vicinity.

Fred Brown on last Tuesday night went to Nebraska City, there he secured a load of very fine peaches which he brought to Greenwood for the canning of the people here.

Urban Rouse who assists at the Greenwood oil station is during the odd time painting his house, and firmly believes in the adage that a good coat of paint is a good insurance.

O. F. Peters and wife have been visiting in Omaha for some days past and also where Mr. Peters is doing some painting at the home of his daughter and husband, Mr. and Mrs. E. L. Jones.

Omar Yardley and the family were visiting at the home of the mother of Mr. Yardley for a short time. They drove to the eastern side of the county where the mother lives near the town of Murray.

Dr. W. H. McPadden who has been in the east for the past two weeks where he visited and at the same time attended a convention of medical men, returned home last week and is now resting up after his vacation.

A. R. Birdsall has had installed at the entrance of his cafe, a very fine electric sign which announces the place for the hungry and travelers to get a good meal. With the excellent service and eats which they give the business is very good anyway.

Sure Ed Montgomery has a fine vineyard, and this season, Dad Edwood and son Carl, have been busy weeding and disposing of the crop which was excellent. They have been supplying many of the people with their grapes and for jelly and canning.

Mr. and Mrs. G. D. Fulmer and Mrs. E. K. Reese, mother of Mr. Fulmer were visiting with friends at Fremont on Tuesday of last week, they driving over in their car for the occasion. While Mr. Fulmer was away Travis Cameron was looking after the elevator.

Judge W. E. Band, Frank Walton and Ed Montgomery have been embellishing the Rallsback farm, and making the buildings there look fine in their resplendent new coat of paint. While they are excellent painters with the brush, they really excel in word painting.

Nels Emelund and brother, Walter of Lincoln, and Henry Wilkin, the barber of Greenwood who have been in the north for some time where they were fishing and hunting and having a general good time returned home on last Tuesday evening and report an excellent time while away.

Mr. and Mrs. Robert Burks and their son, Kenneth, were spending the week and a few more days of vacation at Columbus, they going on Saturday and returning home Tuesday and while at that place visiting at the home of a sister of Mrs. Burks, at the home of Frank Starkey and wife.

W. E. Palling, Fred Ethrege and S. S. Peterson of the I. O. O. F. lodge of Greenwood were in attendance at the funeral of the late J. B. LaChapelle, who died at Ashland and whose remains were taken to Glenwood via Plattsmouth for interment.

The Greenwood committee accompanied the remains to the Iowa town for interment.

Mrs. Essey McNurlin is kept to her bed on account of an injury which she received when her car and that of the Leaver boys came together south of Greenwood some time last week. It is not advisable or either desirous that two cars try to occupy the same space at the same time. Mrs. McNurlin is at the present at the home of Mr. and Mrs. Carl Weideman.

Mr. and Mrs. E. A. London as the rush season at the Farmer's elevator was slightly passed concluded they would enjoy a vacation, and accordingly departed early last week in their car for the west, they expecting to visit in western Nebraska in Colorado, Kansas and Oklahoma before they return. They will expect to remain away for some two weeks and enjoy every minute of the time.

Will Make Home on Farm.

With that quietness which is assured that they knew all about what they were doing and what they expected to do, in the way of farming the newly married couple, Mr. Jess Olson and Miss Maris LaFollette now Mrs. Jess Olson, slipped away and were united in marriage, and were back home again before anyone knew of it in Greenwood.

The happy couple were united in marriage in Lincoln and will make their home on the farm southeast of town, where they are prepared for housekeeping. The bride was a teacher in the school near where she will

make her home and a very accomplished instructor at that.

Will Attend School.

Orville Palmquist, who has for the summer been at Merriam, in Cherry county, working on the farm of Sidney Goodfellow, arrived in Greenwood last week and after a short visit here will enter the state university as a student, and will expect to complete a four years course.

Sackett Visits Chief Executive

Chairman of Republican State Committee and National Committeeman McCloud Call

H. E. Sackett, chairman of the republican state committee, was at the capitol Thursday accompanied by Charles A. McCloud of York, republican national committeeman. They called first upon State Tax Commissioner Williams and Harry W. Scott, assistant state commissioner, who is secretary of the republican state committee without pay. The visitors met Secretary of State Marsh, but Mr. McCloud deposited no filing as a candidate for renomination for national committeeman.

Chairman Sackett had come from his home at Beatrice. He said he had not seen Governor McMullen for several months and he had dropped in to call upon him. He and Mr. McCloud called at the executive office and met Governor McMullen in his private office.

Chairman Sackett, when asked if the state committee intends to file a protest or institute a suit to prevent Roy H. Harrop of Omaha, progressive party candidate for governor last year, from appearing on the April primary ballot as a republican candidate for governor, said he had nothing to say. The primary law provides for the filing of protests by committees or interested persons against candidates on the ballot.

"Why should any one protest against Harrop?" asked Mr. McCloud.

"It is alleged he is not a republican," it was explained.

"Some say that about Norris," returned the national committeeman.

The recent statement by C. A. Sorensen that petitions for the nomination of Senator Norris as a republican preferential candidate for president would not be continued in circulation, until a conference is had with Norris for the reason that his friends do not care to embarrass him, is construed by Lowden supporters to mean that Norris may not care to have his name on the primary ballot and has added hope of a Lowden delegation from Nebraska.

RAILROADS AND RATE REDUCTIONS

A recent analysis of railroad freight rates by the Bureau of Railway Economics should blast once and for all the talk about reductions being due and the rates being excessive and "sky-high." As a matter of fact, the statistics show that the level at present is down to or below comparative level of other prices. Based upon actual receipts it is proven that the savings on freight rates since 1921 have totaled over \$3,000,000,000 and are still tending toward greater savings.

What the farmer and all those who use the railroads for freighting must realize, is that an increase in price may not mean an increase in profit. The law of comparison must be considered. Because a shipper pays more to send a product now than in 1917 certainly does not mean he is paying greater profit to the railroads. The increase in general prices and costs plays its all-important part.

The railroads, like any corporation, business or wage earner, are entitled to make a reasonable percentage of profit on their investment or labor. Railroad rates are established under strict government regulation in the interest of both the public and the carriers. The people are beginning to realize this and appreciate the superlative service rendered by American railroads.

It is the worst form of hypocrisy to condemn the rates of common carriers and public utilities without at the same time condemning our whole system of public regulation by state and nation. Undoubtedly both the rates and the commissions need checking up occasionally, but so does every farm, grocery store or manufacturing plant.

Public regulation of rates does not mean automatic rate reduction, it means the establishment of rates adequate to permit the rendering of satisfactory service to the public under good management, the payment of good wages and a return of reasonable dividends to investors.

HOT WEATHER THIS MONTH

Thomas Blair, meteorologist for the weather bureau at Lincoln, has this to say of September weather so far: "The temperature during the first two weeks of September has averaged more than 11 degrees per day warmer than normal, with an average temperature of 80.7 degrees. It has been an unusually long hot spell for September, which has been exceeded only twice in the past forty years. In 1897 the first two weeks were similar to those of the present year, but averaged 80.9 de-

Boys Exceed Girls in Births in United States

Figures Gathered by Insurance Company as to the Difference in the Births.

New York, N. Y.—That this is a man's world has long been the claim of feminists. Along comes the statistician and tells us that all the world over more boys are born than girls. In the United States in recent years, according to the Metropolitan Life Insurance company's Statistical Bulletin, the ratio of male to female births has been approximately 1.06 to one. This means that there are 106 boys born for every 100 girls.

But it is only at birth that males are thus six per cent in excess. The ratio in the actual living population as a whole is different, first, because death takes a relatively greater toll among males than among females and, second, because there has been

a preponderance of males among immigrants entering the States. These two influences, obviously, work in opposite directions, but the net result is that in the total population there are in the United States 104 males to every 100 females.

It is, however, a pure accident that the ratio in the actually living population in our own country is so nearly the same as the ratio at birth.

In most European countries, where immigration is negligible, the difference in the death rate among males and females is the dominant factor in establishing the ratio of the sexes in the living population, and in consequence, there is an excess of females over males.

In Asiatic countries, on the contrary, and in some of the less advanced European countries, the ratio is heavily in favor of the males. In China, the figure in the living population is 125 males to 100 females. "This," the bulletin states, "is undoubtedly an exaggerated picture because there is a tendency among Eastern nations to regard the female lightly, and this probably results in many escaping enumeration. But even making allowance for this, it is significant how in these countries the proportion of surviving males as
