From Friday's Daily.—

The deceased was seventy-four years of age and a native of Illinois, coming to Plattsmouth when a boy and working for a number of years in the employ of O. M. Steight, who at that time conducted a large livery stable in this city.

Later Mr. Sage himself embarked in business in partnership with the late Timothy Clark in the coal business which they ran for a number of years until Mr. Sage embarked in the livery business in this city and erected a large barn at the corner of 7th and Pearl streets that stood there for a number of years.

Mr. Sage was married in Iowa to Miss Lillian L. Potter a great many years ago and on returning to this city the family home was made at 6th and Pearl streets until the death of the wife some five years ago and following which time Mr. Sage made his home with friends until several months ago when he was married the second time to Mrs. A. B. Hass.

Mr. Sage after his second marriage lived for some time on the farm south of this city on the K. & N. highway known as the gapen farm and a short time ago the family removed to Omaha where they have a home at 3522 Lincoln boulevard, where the death occurred this morning.

For the past six years Mr. Sage has been in increasing poor health and in the past year suffered a very severe attack of heart trouble and at which time his recovery was not expected altho he rallied and has in the last few weeks been looking much better than he has for years altho he has been under the care of physicians.

Mr. Sage is survived by the widow and one step-son, George Hass of Omaha, one sister, Mrs. Alta Bowman of Seattle, Washington and one brother, Bert Sage of Sheridan, Wyoming.

Cass County Agent Wins a Big Honor

One of the Eight Winners in the National Contest That Was Recently Held.

From Friday's Daily.—

The Soil Fertility program of Cass County, prepared for our County Agent L. R. Snipes, was entered in a national contest. There were eight county programs chosen from programs submitted from agents in all parts of the United States. Cass County soil program is one of the eight.

The eight county agents who were winners in the contest will meet in Chicago, Nov. 16 to 18 to attend the national agronomy meeting. The main features of Mr. Snipes' work were soil saving and farm records. The winning of the contest is a reflection of meritorious work on the part of our county agent, who has spent much time and effort in working out the "Soil Saving" and Farm Records projects, aside from the regular routine of his work. In the past several trips to Chicago and other points, all of which were the reward of high achievements and ceaseless effort.

The farmers are coming to realize more and more the value of their county agent in giving advice and information on all farm subjects and Cass County should feel especially proud that they have one of the best in the United States.

YOUNG MEN ARRESTED

The two young men with the articles taken and their auto started for Kansas City and acquired two lady companions somewhere in their journey who made the trip to the Missouri city. On reaching Kansas City information had been sent the authorities there and the quartet were lodged in jail where they are still resting up.

Edward Toman Seriously Injured in Auto Accident

Well Known Local Man Has Right Leg Very Badly Broken as Car Passes Over It Last Night

From Friday's Daily.—

Edward Toman, well known resident of this city, was the victim of a very severe accident yesterday afternoon that will confine him to the hospital with a very badly broken leg.

Mr. Toman had been engaged in cleaning up leaves and burning them along the pavement on South Chicago avenue at the time of the accident, the fire causing dense clouds of smoke in the immediate vicinity, where Mr. Toman was engaged and a cloud of smoke that resembled the well-known wartime smoke screen hung very heavy over the avenue, where there is a great deal of traffic.

At the time of the accident there were several cars passing and Miss Miriam Tritsch, who was driving a Ford touring car, came along as two other cars were also at the same section of the avenue and one of the passing cars, the driver of which is unknown, swung out to pass the other cars and came between the two cars, forcing Miss Tritsch to swing her car over to the side of the roadway and into the dense smoke.

It was not until the touring car of Miss Tritsch struck Mr. Toman that she was aware of his presence and she stopped the car as soon as possible to be started at finding the unfortunate man caught under the car and his leg broken. Mr. Toman was held by the running board of the car and his mangled leg was still under the car when found.

The lady driving the car was greatly shocked at the accident and attempted to extricate the unfortunate man who is heavy and hard to handle and a few moments later a car driven by Will Mickel of the Mickel Music House, of Omaha, and who was accompanied by A. L. Hefflinger, representative of the Mickel company, came along and they assisted in getting Mr. Toman into the car of Miss Tritsch, Dr. J. H. Hall, who was also passing, joining in getting the injured man into the car.

Mr. Toman was taken to the office of Mrs. Livingston, where the injured leg was examined and a temporary splint arranged to hold the leg which was fractured very badly below the knee joint. The injured man being taken later to the University hospital in Omaha, where he will be cared for and the injured leg given treatment.

The men who were passing the scene of the accident when it occurred state that the accident was due primarily to the very heavy clouds of smoke that obscured the view and prevented the passing cars from seeing that Mr. Toman was standing out on the pavement near the fire.

Platters Tie with Auburn High School

Final Tally of High School Football Game Is 6 to 6 on Auburn Field Yesterday.

From Thursday's Daily.—

The blue and white of the Plattsmouth high school yesterday emerged from the struggle with the Auburn high school eleven with a 6 to 6 score, the battle staged on the Auburn field.

The game opened with the Platters seemingly having easy sailing with the Nemaha boys but ere the final whistle sounded the two teams found themselves locked in a deadlock from which neither team was able to gather the force or punch to break the tie.

In the opening portion of the game there was several good passes made good by the Platters from Wescott to Perry and also to Gansemer that advanced the ball into the enemy territory and when the locals carried the ball over for the coveted first score of the game, the blue and white advanced down the field to striking distance of the Auburn goal, Robert Hadraba was sent into the backfield to replace Wurl and carrying the ball, Bob came through the Auburn line for the score. The try for point failed and left the locals leading 6 to 0.

After the first score the locals loosened up their playing and the Nemaha boys were quick to take advantage of the opportunity and before the third quarter was completed the Auburn team had tied up the score. A number of clever fakes through the center of the Plattsmouth line gained them ground that brought them to the vicinity of the Platters goal and from where they were able to crash through for the touchdown. Mason both tied up the blocked the Auburn kick and saved the locals from being kicked for the one point lead.

The remainder of the third and fourth quarter was one in which both teams attempted to gain enough to annex the game but in the crucial stages of the game both teams played a very stiff defense and were able to check any further scoring.

The game was not featured by any of the thrills of the Wahoo game and both teams played a very even game as a whole, the Auburn team showing a great deal of improvement since their last battle.

New Paving Great Improvement to City

Where New Paving Has Been Placed It Adds Much to the Convenience of the Residents.

From Saturday's Daily.—

The completion of all of the paving in the 1927 program in this city has given an addition to the large amount of pavement in the city and has added a great deal to the convenience of the city and where it will be a distinct advantage to the sections of the city that secured this improvement.

The last part of the paving program carried out was that on South 9th street and on Rock and which is now being used for travel by the general public and with the prospect of winter and bad roads the residents of that part of the city who have had much trouble with the mucky hill roads can look forward with pleasure to the fact that they will have a road that they can travel at all seasons of the year.

The paving on the hills also saves a great deal to the city in the cost of road maintaining and also eliminating the necessity after each rain of having a force of men out to scrape up the mud that flows down from the hills onto the paved streets and which costs the city from \$15 to \$20 each time to have cleaned off.

Another of the pieces of paving that was badly needed for several years was that leading from Main street to the Holy Rosary church, a block south on Pearl street and which in bad weather was almost impossible to travel for those wishing to drive to church and for funeral parties to reach the church. This condition has been remedied with the new pavement there and which assures a comfortable and good roadway.

These pieces of paving were initiated on the petition of the residents of the various districts and now that the work is completed it certainly is one that everyone in the city will appreciate as a convenience in travel and helping out down the expense of road maintaining that is a constant burden which has to be gone over after each rain storm as the hills streets wash very badly and makes necessary the expenditure of much money that is really thrown away as the work has to be done over repeatedly.

Cream of West Bakery Installs New Machinery

Large Mixing Machine Installed to Add to the Output of Large Local Baking Concern

From Saturday's Daily.—

It is fitting that our citizens should be kept informed of the improvements taking place in our little city.

A visit to the Cream of the West Bakery a few days ago disclosed the fact that Mr. Wentworth recently purchased the latest model of dough mixer, which has just arrived. This is a German invention, but is manufactured in Switzerland. It is called the "Artotex" dough mixing and kneading machine, has a maximum dough capacity of 185 pounds and is equipped with a one and one-half h. p. 220 volt ball bearing motor.

Ten thousand of these machines have been manufactured, but they are just being introduced into this country. So far as we are informed, there is only one in Illinois, one in Nebraska and this machine of Mr. Wentworth's is the first in this part of the country.

This is a fine looking machine and a decided improvement over the old style machines in common use. A little of what is said of it and claimed for it follows: The patent "Artotex" mixer assures the most remarkable high speed mixing results, giving maximum absorption and the most gluten development, in fact results which cannot be secured in the commonly known revolving blade type mixer.

Bakers in the old country have been thoroughly convinced that the only efficient machine producing a dough of perfect texture, uniform throughout while aerating and developing the gluten and creating the much sought absorption, is one that has an action which lifts, aerates and stretches the dough without subjecting it to the severe punishment in revolving blade type machines.

This machine has arms that lift, come together and recede, rolling and stretching the dough just as the most painstaking baker would do by hand. It does the same work in six minutes that the old style machine requires 30 minutes to do, and with one-half the power.

Mr. Wentworth is to be congratulated for his progressiveness in adopting this new human-like machine, thus giving his patrons the best possible service in manufacturing his products.
