Olaf Lundbergh

Nehawka, Nebr.

Bert Willis was called to Omaha on Monday of this week, where he was looking after some business matters for a short time.

Jacob Smith, of Mynard, was a visitor at the home of L. M. McVey and James McVey for a few days during this week.

Grandmother Reynolds, of Nehawka, has been quite poorly for some time past and is being cared for by her granddaughter.

George Trunkenholz, of Eagle, was a visitor in Nehawka on Monday of this week and was looking after his oil interests while here.

R. D. Taylor was a visitor in Nehawka City early last Monday morning and was taking with him a truck load of feed for the dealers there.

Marion Stone, who is taking a four years' course at the Agricultural department of the state university, was a visitor at home for over Sunday.

Frank Trotter was looking after some business matters in Nebraska City on last Saturday, he having taken a load of stock to the market there.

Sam Martin, who is making his home at Seward at this time, was a visitor in Nehawka on last Tuesday, and was visiting with his many friends.

Misses Gladys Wolfe and Mildred Waids were visiting with friends and also looking after some shopping in Nebraska City on Monday afternoon of this week.

Grover Hoback and the family were enjoying a visit for the day on last Sunday at the home of the parents of Mrs. Hoback, Mr. and Mrs. A. H. Massey.

NOTICE!

Having taken the agency for the Aermotor Windmill and repairs for Murray and Nehawka, would appreciate your call for anything in windmills or repairs. Also oil for windmills.

Nehawka - Nebraska
Route 1-Box 65

Frank Lemon was a visitor in Weeping Water early Tuesday morning, where he was having some dental work done by one of the artists of Weeping Water.

Albert Wolfe, who is employed in the Jeff Brendel barber shop at Murray, was spending his Sunday at home and returned to his work at Murray on Monday morning.

Uncle Joseph Shrader and the good wife have been suffering quite a bit with an attack of the flu, and are being cared for by Mrs. H. M. Christweiser, of Union, who is a niece.

Miss Bessie Weiler, who looks after the drygoods department of the Sheldon store, was a visitor in her home town of Auburn over Sunday, returning to her work last Monday morning.

Miss Florence Griffin, who is attending the state university, was a visitor at the home of her parents, Mr. and Mrs. John Griffin, for over the week end and returned to her studies on last Monday morning.

W. O. Troop was a visitor in Omaha on Monday of this week and was accompanied as far as Plattsburgh by Mrs. Troop, who visited there for the day and when he came back in the evening, she accompanied him home.

Grandpa Nelson, who has been in Omaha, for some time where he is under an operation for his health, returned home one day last week and for a short time was feeling some better, but later was again feeling poorly.

Walter J. Wunderlich, who is at the hospital at Lincoln since undergoing an operation for relief from appendicitis, is reported as getting along very nicely. The attending physicians have promised to allow him to return to the home here during the week.

Mr. and Mrs. Robert Taylor were visiting on last Sunday with friends at Plattsburgh and were guests while there with William Gorder and the good wife, and Mr. and Mrs. Ansel Morrow, who conducts a hatchery in the county seat. All enjoyed the visit there very much.

Stewart Rough and the good wife were visiting at Crete on last Sunday and on their return stopped at Lincoln, where they visited for a short time with Walter Wunderlich, at the hospital, where he is convalescing and also visited with the brother of Mr. Rough, Mr. A. D. Rough, of that place.

Mrs. John Opp has been very sick at the home for some time with a complication of flu and other troubles, which has kept her in the home and bed for a short time past. She is showing some improvement but is still not able to be out as yet. Her many friends are hoping she will be able to be about soon.

Not because the night was so dark, or things of that kind, but because he did not drive in the right direction, Tommy Mason, who visited in Red Oak on last Sunday, but was not able to get home until the day light was breaking. He however had a

most pleasant visit in the Iowa town, and expected to visit there again.

Mrs. J. H. Palmer, who has been quite ill with the flu for some time, was rejoiced that their daughter came home over the week end, and was able to care for her mother during her illness. However, Miss Ruth was stricken with the disease and was compelled to miss a number of days of school during the early portion of the week.

Mrs. Owen Willis, has come five hundred little chickens, and some of them four weeks old, and from the number which has been hatched, she has not lost but three or four, which makes excellent luck with them. However, she has given much care to the raising of the flock thus far, and declares that it surely pays to care to the raising of the flock thus far, and declares that it surely pays to care well for them.

Burial Vaults

You care well for your loved ones while alive. One of our concrete vaults protects their remains when buried. An absolute guarantee. MILLER & GRUBER, Plattsburgh, Nebr.

STRAWBERRIES

April is the month in which to put out your strawberry plants. In preparing the soil for planting strawberries, it should be remembered that they are to remain where planted from two to three years. The ground should be plowed or spaded as early as conditions will permit. The ground should be thoroughly pulverized.

In selecting the site for planting strawberries, it makes very little difference whether it be an east, west, north or south slope, except that a southern slope will ripen earlier and a northern slope will retain moisture longer in dry weather. Generally, a steep slope should be avoided for cultural reasons and to avoid the land washing. Slope enough to drain well should be had if possible. Drainage, of both air and water is of prime importance. By air drainage is meant air circulation.

There are two general systems of planting, one is known as the hedge row or matted row, and the other is the hill system. In the matted row system the plants should be set one foot apart in the row and the rows about three and a half feet apart. The plants should be permitted to spread out to a width of about fifteen inches in the row; this leaves room for cultivation and picking of the fruit. By this method it will require about 11,880 plants to one acre. Strawberry plants are set in the same manner as cabbage or other vegetable plants. Simply make an opening in the soil with a spade or dibble, put the roots straight down into the opening and press the soil firmly against the roots. Be sure that you have the crown or heart of the plant above the surface of the ground.

Cultivation should begin as soon as possible after setting the plants and the surface of the soil should be kept loose and pulverized. They should be cultivated once a week to keep down weeds and hold moisture in the soil. Care should be used so that the crown of the plants are not covered with dirt. The expense of establishing one acre of strawberries is about \$90.00. One man has furnished us the record from an acre of strawberries covered a period of twenty years. The greatest gross production was \$1,293.95, expenses of cultivation, harvesting and marketing the crop was \$235.98, leaving a net profit that year of \$958. The least crop in the twenty years was \$71.70 net, and the average for the twenty years was \$494.93 gross, the average expenses \$129.12, and the average yearly net income was \$365.81 per acre. This is a splendid crop to grow between the rows while establishing a grape vineyard.

Platters Take Second Place in Mink Tourney

Track Team Shows Up Well in Work and Capture Many First Prizes in Event.

From Monday's Daily—The track tournament held Saturday afternoon at Peru and in which there were a number of the south-eastern Nebraska schools competing in the MINK tourney, gave the Plattsburgh team second place, they being nosed out by four points by Auburn that took first place with Plattsburgh a close second. The scoring of Auburn showed 37 points and Plattsburgh 33, a splendid showing for the local school as this is the first year that Plattsburgh has developed any track interest to speak of. Falls City was third and followed by Peru and Nebraska City. The Peru team scored 23 points and of these 22 were scored by Homer Railsback, the well known prep school basketball star.

For the Plattsburgh team Jack Hatt was the most outstanding figure as he annexed first in the pole vault with ten feet and two inches as his record first in the high hurdles and second in the low hurdles.

George Perry was second in the mile race and third in the shot put. Bernard Galloway scored first in the half mile and second in the mile race and showed speed and skill in his performance on the cinder track.

Merle McCrary was third in the high hurdles and showed a great deal of skill in his work.

The first in the mile race was won by Donald Pittman of this city, who divided the racing honors with Galloway in the meet.

Eugene Bushnell tied for fourth place in the javelin throwing contest.

The showing was most gratifying to the fans of the local school and demonstrated the splendid physical training that the young people are receiving at the school.

Turkey Raising is Not So Difficult Matter as That

Agricultural College Carries on Series of Experiments to Discover Best Methods to Employ

"The turkey that pays is the one you raise," says J. R. Redditt, extension service poultryman at the college of agriculture, Lincoln. The difficulties of turkey raising have been overcome to a great degree by the efficient experiments carried on by the poultry department, and results published in bulletins on turkey production.

Clean feed, clean water and clean range are the primary requirements of successful turkey raising, established in an experiment on the poultry farm. According to Prof. E. E. Muschel, chairman of the poultry department, the methods developed by this experiment will receive wide application if the number of requests for the bulletins on the experiments is any indication of the interest aroused in turkey raising. Inquiries have come from as far east as Roanoke, Va., and as far west as Utah and Arizona.

Turkey raising was started on the college of agriculture poultry farm by using the current methods of letting the turkey hen incubate and brood her own poult. The results obtained were not satisfactory as many poult were lost. Artificial hatching and brooding methods were next tried. The requirements for the incubation of turkey eggs are about the same as for chicken eggs. Egg production costs were less because the hen did not stop laying to hatch and brood the poult.

The poult were bred with an ordinary coal or kerosene brooder. The method of feeding does not vary greatly from the accepted standard of chick feeding. Turkeys do not require a large range, but they do require a clean range, because black-head is soil borne. Wired-in enclosures with a roof are good protection against predatory animals and birds. According to Professor Muschel, turkey raising should again be a profitable business, as turkeys bring to fifteen cents a pound more than chickens during the holidays.

NORRIS ON UPDIKE SUIT

Washington, April 16.—The internal revenue bureau here in Washington is responsible for the government's failure to so far collect approximately \$400,000 income tax from Nels P. Updike, of Omaha. Senator George W. Norris said today. "I have read the opinion of the court, which holds with the government in every respect, that he owed the tax; that he didn't pay his taxes, but the government didn't commence suit until the limitations had expired. The bureau in Washington is to blame for that," Norris said.

FAIL TO NAME HOOVER

Colorado Springs, Colo., April 17.—Colorado republicans in state convention here Monday refused to instruct their seven delegates-at-large to vote for Herbert Hoover, leaving 13 delegates out of a total of 15 that will go to the national convention at Kansas City un-instructed. Two delegates from congressional District No. 1 were instructed for Hoover at that district's convention recently.

At the price of ordinary gasoline

Keep a record — watch your expenses — make comparisons — see for yourself how much LESS it costs to run your car on 400 "Extra Dry" than any other gasoline that sells at the regular price.

Full mileage from every gallon. Yes — and that's only one of the many good results you may expect from this superior gasoline. Instant starting in any weather — swift getaway when the green light flashes — acceleration that thrills and exhilarates — and in addition to all this, a cleaner, sweeter-running motor with less expense for valve grinding and general overhauling.

The reason is plain — Shell Gasoline is refined by a revolutionary process that takes only the most volatile elements from the crude. It is extra dry, which means it is ALL gasoline. Every drop vaporizes — every particle is converted into power — there are no impurities or greasy particles to clog up the spark plugs, pass the pistons unburned and dilute the oil in the crankcase.

Treat your car to this better gasoline. You will find it on sale at all Shell yellow-red service stations and Shell Dealers at the regular price — not one cent extra for its extra quality, or the extra service it will give you.

REVEAL KRESGE SCANDAL

New York, April 17.—The World will say tomorrow will admit today tomorrow will say that Mrs. Doris M. Kresge set \$10,000,000 as the price for giving Sebastian S. Kresge a child and he declined to pay it, according to his Detroit divorce complaint, which emerged today after having been hidden for months under supreme court seal. The Kresges never had a child.

The wealthy chain store operator, who gave Miss Doris Mercer securities before she married her in April 1924, related that in April 1925, she told him "that if he would give her \$10,000,000 she would bear the child for him, but if not," then there would be no child.

MINISTER SHOT TO DEATH

Troup, Tex., April 16.—Warned only by a shout, "Prepare to Meet Your God," the Rev. Fount Wallace, twenty-five pastor of the First Baptist church of Troup, was shot to death in a store here tonight by a young man answering the description of Loys Wilson, who later surrendered. Wallace was talking to the proprietor of the store when his assailant approached, and after the shout-warning, fired at close range with a 45-caliber pistol. The bullet passed thru the pastor's body and struck a boy in the street.

Mrs. Marvin Allen was a visitor in Council Bluffs and Omaha today to spend a few hours there with friends.

ROBBERS LOSE LOOT

Toledo, O., April 16.—Special police details searched tonight for machine gun bandits who shot and killed patrolman, George Zientara, after they had stolen an American Railway Express truck and abducted the four men who were guarding it.

play availed the bandits nothing, for they left behind, in a garage where Zientara and another policeman surprised them, two unopened strong boxes which they obtained from the truck. There was approximately four thousand dollars in the boxes left intact.
