Taxation Action Taken on New Court Decision

Sokal Case Is Said to Be the Basis for Exempting Douglas County Property.

The action of the county board of Douglas county in exempting \$1,250,000 worth of property from taxation, the property being owned by lodgers and secret societies, labor organizations, churches and the Ak-Sar-Ben, rescue missions and similar organizations, is said to be based on a new decision of the supreme court given last May in the case of Telecviema Jednota Sokal, an organization that

owns a building in Omaha. The district court held that this building was not taxable. The supreme court, without writing an opinion, merely announced that it found no reversible error in the case and affirmed the judgment.

The county board of Lancaster county last year assessed the Scottish Rite building in Lincoln. This case has been appealed and is now pending in the supreme court. Some years ago the supreme court had the same matter before it and decided that the building was taxable. Since then it, is alleged, commercial activities once carried on in it, such as a cafeteria, are no longer in the building.

State Tax Commissioner Scott was absent Monday but it was stated at his office that both county and state taxation boards have power to place taxable property on the rolls if it has been found to have escaped taxation.

The constitution permits the legislation by law to exempt property owned and used exclusively for educational, religious, charitable or cemetery purposes when such property is not owned or used for financial gain or profit to either the owner or user.

Attorney General Sorenson was also absent Monday. When asked some months ago for a decision regarding the taxation of business buildings at Dawson belonging to a church, he stated that the best case on how this property should be taxed is perhaps the case of Young Men's Christian association assessment, 182 N. W. 599. In that case he says the court held in part:

"Where certain floor space in a building owned and occupied by a charitable organization is leased to outside parties for the operation of a cafeteria, open to and patronized by the general public as well as membership, the rentals being applied to the purpose of the organization, that portion of the building so leased is not exempt from taxation, altho the maintenance of the cafeteria therein is not financially helpful to the organization, but promotes its charitable purposes by attracting people to the building."

"That a certain portion of the building of a charitable organization which is not exempt from taxation cannot be separated from the residue by definite lines is no obstacle to the assessment of the property to the extent of the value of that portion thereof which is taxable, having due reference to the taxable value of the entire property."

When asked whether the second floor of a business house leased by a Masonic lodge at Ponca for a period of ninety-nine years is exempt from taxation, the attorney general said in a written statement:

"I will say that in my opinion no part of this building is exempt from taxation. I presume it will not be contended that it is used exclusively for charitable purposes and in any event the owner of the building derives financial gain from renting it." The entire building was taxed by the county board. The lodge had agreed to pay half the tax on the building when it obtained the second floor for ninety-nine years.
