PERMANENCY IS DESIRED

Washington.—The department of agriculture hopes the agricultural credit corporations, now existing or being formed in drouth areas, will continue in operation on a permanent basis after the present emergency.

Lewis T. Tume, chairman of the national advisory loan committee, said in explaining their setup to administer the government's supplemental drouth loan fund, they would prove of permanent value as an agricultural aid. A fund of \$10,000,000 has been set aside tentatively for the corporations or livestock loan companies.

Tume said many long term notes would be shifted from country banks to the credit corporations, thus relieving the danger of frozen assets, and "the necessity of refusing such notes."

1,000 Farmers

Defy the State in Tuberculin War

Veterinarians, Armed Guards Retreat to May Future Plans—Cool Heads Prevented Battle

Tipton, Ia., March 9.—A thousand determined farmers won a bloodless victory over the state of Iowa near here this afternoon when state veterinarians who were surrounded by 29 armed deputy sheriffs and state agents, returned to Tipton without having made public the results of their tuberculin tests of cattle on the F. C. Mitchell farm last Thursday. The farmers, who came from Muscatine, Scott and Cedar counties, assembled at the farm of William Butterbrodt to await the coming of the veterinarians and their guards.

Carried Tear Bombs.
The men arrived at the farm early in the afternoon, but did not leave their automobiles. The farmers remained at a respectful distance. There was some parleying but no threats were made and late today the veterinarians and their guards returned to Tipton to determine what the next move would be. It was said that some of the farmers were armed, but Butterbrodt said he saw no guns. The state's agents, it was said, were armed with tear bombs.

The farmers are opposed to the tuberculin test.
Governor Dan Turner wired the opposition leaders yesterday that they could appear before the legislature and ask that the law be repealed. He counseled against violence. Mark G. Thornburg, state secretary of agriculture, informed the farmers that the law would be enforced.

Expect Showdown Today.
It was said here tonight that the veterinarians would move on the farm again tomorrow and would read the findings of the veterinarians on the condition of the cattle. Ray Anderson, farm editor of a Cedar Rapids newspaper, said today that if the state attempted to carry into effect its determination to enforce the law he feared there would be trouble.

Anderson said the farmers were determined that the tests should not be made, nor the result of the Mitchell test made public. He asserted the situation is critical and that only cooler heads prevented a battle this afternoon.—World-Herald.

More than 73,000 miles in a New Ford

THE substantial worth of the new Ford is reflected in its good performance, economy and reliability. Its stamina and endurance are particularly apparent in sections where bad roads and severe weather put a heavy extra burden on the automobile.

In less than a year a new Ford Tudor Sedan was driven more than seventy-three thousand miles over a difficult route. The operating cost per mile was very low and practically the only expense for repairs was for new piston rings and a new bearing for the generator.

The car carried an average load of 1200 pounds of mail and was driven 250 miles daily. "The Ford has never failed to go when I was ready," writes one of the three mail carriers operating the car. "The starter did the trick last winter even at 34 degrees below zero. The gas runs about 20 miles per gallon. At times I pull a trailer whenever I have a bulky load."

Many other Ford owners report the same satisfactory performance. Every part has been made to endure — to serve you faithfully and well for many thousands of miles.

CHRISTIAN SCIENCE

The subject of the Lesson-Sermon read at all Christian Science churches and societies on Sunday, March 8, was "Man." Citations from the Bible show that man in God's image and likeness is spiritual, and is not the material sense which mortals commonly call man. Also, they show that when the true spiritual sense of God and man is obtained and lived their disease and other disorders of the flesh are thereby overcome. One Biblical selection, quoting Jesus' words, reads, "For whether is easier, to say, Thy sins be forgiven thee; or to say, Arise and walk." From Mary Baker Eddy's definition
