Waste of Farm Tested for Use at Iowa State

Installation of Retort at Cost of \$15,000 Gives Impetus to Research

Ames, Iowa.—With the installation of \$15,000 distillation retort in the chemical engineering laboratories at Iowa State College the search for new uses of agricultural wastes being conducted here has received new impetus. Research on utilization of agricultural wastes was started several years ago by Dr. R. Sweeney, head of chemical engineering, and his assistants. Last spring Congress passed the Dickinson bill providing a fund of \$75,000 to be used in furthering this work which is now being carried on in cooperation with the United States Department of Agriculture. Dr. P. B. Jacobs, chemical engineer for the Bureau of Chemistry and Soils, is stationed here in charge of the cooperative project.

The new retort is known as the continuous type. By means of it the waste material—cobs, straw, oat hulls or corn stalks—is fed continuously into the top and carried down a series of shelves, being subjected to increasingly high heat. From the waste materials in this particular part of the research are obtained wood alcohol, acetic acid, acetone, tars, charcoal and a combustible gas. The gas is now being run back and used to help heat the retort, the primary heating unit being an oil burner. All of these products are standard materials used in various manufacturing processes. The purpose of this phase of the research is to determine whether they can be economically manufactured from agricultural wastes rather than from wood.

Breakfast foods, fly sprays, shellac, expensive acids and other products have been made from agricultural wastes. Wood substitutes, such as wallboard which is stronger than oak and insulating materials, have been made in laboratories from corn-stalk pulp for several years. A few concerns have started to manufacture paper and wallboard on a commercial scale. Whether the old products which can be made from farm wastes will ever be manufactured on a scale to provide an outlet for wastes and added income for the farmer depends on whether present research indicates that it can be manufactured at a lower cost than from wood.

NEW INCORPORATIONS

Lincoln, Neb., Oct. 15.—The following articles of incorporation were filed here today.
Grand Island—The Vine Street club; capital, one thousand dollars; Lyman and Henrietta Wilkinson and Roy Rockwell, incorporators.
Omaha—Samuel S. Salzman, Inc.; capital 10 thousand dollars; Samuel and Elizabeth Salzman and L. Ferec, incorporators.
Fremont—Union Transfer company; capital, one thousand dollars; incorporators—Henry Ogram, F. W. Meldman and M. Krupinsky.

GREENWOOD

P. A. Sanborn was a business visitor in Lincoln on last Friday. The King's Daughters class met on Friday with Mrs. E. O. Miller at her home.

Mr. and Mrs. Goodhart Vant and son Jack of Fremont were in town on last Thursday.

Dwight Talcott, who is attending the University of Nebraska, spent the week end with his parents.

Mr. and Mrs. Dudley Clouse and family moved the first part of last week into the Methodist parsonage.

Mr. and Mrs. N. O. Coleman and Elva drove to Omaha on last Saturday, where they shopped for the day.

Mrs. John Gustafson went to Lincoln Tuesday morning to visit Mr. and Mrs. P. G. Gustafson for several days.

Mrs. J. M. Wells and son, Merl, of Lincoln, spent Sunday evening visiting their old friends the White and Bucknell families.

Wayne Landon, Don Parks, Lloyd Wilson and Chas. Trader left on last Sunday for the western part of the state on a hunting trip.

Homer Meyers, of near Ithaca, was a visitor in Greenwood on last Wednesday and was looking after some business matters for a short time.

P. E. Clymer and son, Clark, Evan Armstrong and Goodhart Vant all went to Ravenna on Monday afternoon to try out their luck at hunting.

Judge W. E. Newkirk and the good wife were visiting for a number of days last week at the home of their daughter, Mrs. L. D. Lee, at Murdock.

Dr. and Mrs. H. W. McFadden, of Maywood, Ill., arrived Sunday for a visit with relatives. While here Dr. McFadden was hunting with some others from Greenwood.

Mrs. Ella Marshall, who is staying on a farm in this vicinity, accompanied by Miss Catherine Coleman, postmistress, were visiting with friends in and near Ashland on last Saturday.

White E. A. Landon was looking after the escaped pheasants and some that did not escape, the elevators were being looked after by C. D. Fulmer, who is a good man for the place.

Wm. Rouse, while the time was at hand and he was not pressed with other work, has been painting the interior of his home and getting it all spick and span for the coming winter.

Announcements have been received of the marriage of Ivan Brunkow, son of Mr. and Mrs. Herman Brunkow, to Miss Pansy Laster, of Kansas City, Mo., on Saturday, Sept. 26th. Congratulations are in order.

John Weatherhog and wife and son Curtis visited in Greenwood Saturday and Sunday, returning to their home in Bloomfield Sunday afternoon.

Mrs. Nutzman, who is teaching at Bloomfield, accompanied the Weatherhog family.

The grading machinery of Cass county is here this week for the purpose of grading the mile west of town to connect the gravel with Lancaster county, according to reports of the workmen who are grading the road west of Alvo.

John H. Bell, who makes his home some ten miles northwest of Ashland, where he has resided for a number of years, was a visitor in Greenwood on last Wednesday and was visiting the many old time friends whom he knew some twenty-five to thirty years ago, when he resided here.

E. L. McDonald and the good wife departed for Kearney, where they were to visit with friends and where Mr. McDonald was to try his hand with one of the very latest in fowling pieces with the wily pheasants, which are said to abound in that vicinity. They drove out in his car.

W. S. Allen, the carpenter and cabinet maker and a workman who need not be ashamed of his work, for it is prime, and A. R. Birdsall, who

besides being able to conduct one of the very best cafes, is a finisher of woods, are making a set of fixtures with which to equip the Birdsall cafe, which were formerly contraband business, a former saloon, and the bar fixtures which were elaborate when the saloon flourished are now to be used after having been refinished for the fixtures of the cafe. They are very fine and will make elegant fixtures for the purpose for which they are now to be used.

Crops Good in Fillmore County
O. M. Hartsook and sister, Ethel Hartsook, were spending about a week recently visiting at their old home near Geneva, and where they enjoyed a very pleasant visit with relatives and the friends of other years when they resided there. Mr. Hartsook tells of the excellent corn crop which is now being harvested there, and of the excellent small grain crops which were harvested during the earlier portions of the season. Fillmore county, of which Geneva is the county seat, boasts of the very best crops of any county in the state of Nebraska this year.

Building Machinery
J. V. Stradley and the two sons are kept very busy these times with the construction of two shellers and also two hammer mill grinders. They have the shellers about completed and one has been tested in the shelling of a quantity of pop corn which was grown this year and which worked very fine, taking all the corn off the cobs were left intact, without being crushed or mangled. This is one of the very best of shellers, having a capacity for shelling a large amount of corn in a short time. All bearings are of the Timken roller type, which reduce the power necessary to operate the machine to a minimum. The hammer grinders are also showing much merit over other grinders of the same type, for they are also equipped with roller bearings and thus much power is saved in the operation and at the same time the very best of results achieved in the work which they perform. You who are interested in this line of machinery, step in and you will be quickly convinced of their superior merits.

Hunting Near Belgrade
A number of the nimrods of Greenwood who think it is great sport to get their amount or allowance of pheasants, the first day of the open season, were over to the vicinity of Belgrade on last Wednesday, where they were looking for an opportunity to get their one hen and four roosters, which is the maximum number the law allows, and may be able besides having a taste themselves, to furnish some for their friends. Among those who were enjoying the sport were E. A. Landon, L. C. Marvin, Dr. W. H. McFadden, here on a visit from Illinois, George Trunkenbolz, E. O. Landon, L. C. Marlon and John Hartsook, the latter from near Eagle.

Attended Bankers' Meeting
Messrs and Mesdames Phil L. Hall and O. E. Miller, the bankers at Greenwood, were enjoying the day last Monday (Columbus day) at the gathering of the Cass County Bankers' association, which was held at Nehalem. The gathering was held during the afternoon and the social session and banquet in the evening. Upon invitation of Messrs. Hall and Miller, Greenwood was selected as the convention city for the year 1932. We are sure that they will be properly entertained when the time comes to hold the convention here. H. A. Schneider, of Plattsmouth, was selected as president of the association for the ensuing year.

FARM FOR SALE OR TRADE
Known as Capen farm, four miles south of Plattsmouth. Call or inquire 3522 Lincoln Blvd., Omaha. Price reasonable. 019-614-37w

BAYER ASPIRIN is always SAFE

Demand this package

Beware of imitations

Genuine Bayer Aspirin, the kind that doctors prescribe and millions of users have proven safe for over thirty years, can easily be identified by the name Bayer and the word *Aspirin* as above.

Genuine Bayer Aspirin is safe and sure; it is always the same. It has the unqualified endorsement of physicians and druggists everywhere. It does not depress the heart, and no harmful effects follow its use.

Bayer Aspirin is the universal antidote for fever of all kinds.

Headaches
Colds
Sore Throat
Rheumatism
Toothache

Aspirin is the trade-mark of Bayer manufacture of monoacetic acid of medicinal.

A Stetson is SMART to Start with and It Stays that Way!

YOU can count on a Stetson to wear. Month in and month out it continues to hold its shape and gives you the most hat for your dollar. They're cheaper, too, than they've been for ten years.

Corn Yield Average This Year is Small

Only Four Years Poorer Since 1900; Cass County Will Average 25 Bushels to the Acre.

Nebraska corn yield is only slightly above the average of the four lowest yields since 1900. Present acreage is 22 percent larger than for those years and the production is correspondingly larger, says the state and federal division of agricultural statistics.

Since 1900 the four years, 1901, 1913, 1918 and 1926 have lower corn yields than the present year. The average yield for those years is 15.3 bushels as compared with the preliminary estimate of 17 bushels this year.

This year's acreage is the highest on record with a total of 10,096,000 acres. The average acreage for the four years since 1900 having lower yields is 7,745,000, making the present year's acreage 29 percent larger.

The present estimate of production is 171,632,000 bushels. A normal or full crop yield on Nebraska's present acreage would reach a total of 358,408,000 bushels. The present estimate is less than half that amount.

Corn yields by districts this year are as follows: Northwest, 13 bushels; north central, 11.4 bushels; northeast, 13.9 bushels; central, 13.7 bushels; east central, 18.8 bushels; southwest, 14.8 bushels; south central, 17.2 bushels; southeast, 23.8 bushels. Only eleven of ninety-three counties have yields of 25 bushels
