Von Hindenburg is Given a Heavy Vote in Germany

Lacks Majority, However, and Run-off Election Needed—Hitler Is Second.

Berlin, March 14.—President Paul von Hindenburg, who appealed to the voters to keep him at the head of the nation in order that civil war might be averted last by only 168,453 votes in yesterday's election, but he was so far ahead of every other candidate it is taken for granted he will succeed when the nation votes again April 10.

A total of 18,661,736 citizens cast their ballots for the present head of the state, instead of the 18,830,189 required to give him a majority. Thus he lost out by less than one-half of 1 per cent of the votes cast.

The most surprising feature of the election was the relative weakness of Adolf Hitler, leader of the national socialist fascists, who polled only 11,328,571 votes. Hitler himself had counted on many more than 12 million ballots, and his lieutenants were confident his strength would run from 15 million to 18 million.

Survey of Results. The election commissioner issued the following preliminary summary of the complete results: President von Hindenburg, 18,469,726.

Adolf Hitler (Nazi), 11,328,571. Ernest Thaelmann (communist), 4,992,079.

Theodore Duesterberg (nationalist), 2,557,876. Gustav Winter (independent), 111,470. Scattering, 8,645. Total vote, 37,660,377.
