The committee in charge had arranged a program of entertainment and sport which served as a real entertainment feature. "Rajah the Great," magician, was on hand and performed several feats of magic, the performers later being identified as Superintendent L. S. Devoe and Judge A. H. Duxbury, whose stunt was much enjoyed.

The ladies of the picnic party played the men in a baseball game and while the score was not given, it was a great exhibition of the national pastime. The feature of the game was the batting of the ladies, one securing a home run and another almost.

Radio programs were also a feature of the picnic party, and which helped make the time pass most delightfully.

The committee in charge wish to thank the members of the P-T-A for their fine co-operation in the matter, which has aided in making the event a great success.

### Government's Program is to Start Soon

Most of the States Have Made Their Surveys and There will be No Delay on the Projects

Washington, May 25.—Highway construction agencies are prepared to put into immediate operation the road improvement projects in the government's public works program.

The American Association of State Highway Officials has informed congress that within ninety days some 250 million dollars worth of construction could be placed under contract with every state highway department ready to spring into action the minute money is made available.

Most of the states have mapped their highway needs for years ahead, and have made surveys and prepared plans and specifications so as to proceed without delay. "The plans are ready, the roads are ready and the men to do the work are ready," says the association.

The public works bill authorizes the President to make grants to the states for road improvement in an aggregate amount not to exceed 400 million dollars. Three-fourths of the money would be prorated to the states on the old federal aid basis, and one-fourth according to population.

On the old basis funds are allotted to states one-third according to population, one-third by area and one-third by miles of post roads.

Under the new provisions, increasing the allotment by population, the congested areas where unemployment is the heaviest, would receive a larger proportion of the funds. High population states such as New York, Pennsylvania, Illinois, Ohio and California would benefit by this provision.

The measure provides first for road construction and improvement on the federal highway system, including all kinds of traffic betterments such as bridges and the elimination of dangerous railway crossings.

Secondary or feeder roads would be constructed as agreed upon by state highway departments and the secretary of agriculture, who is the titular head of the bureau of public roads. Government funds would defray the cost of surveys and plans in addition to construction.

### WANTS TREATY PUBLICITY

Shanghai.—While welcoming the military truce between opposing Sino-Japanese forces in the Peiping area, the Chinese press demanded to know "the price that was paid" for the cessation of hostilities. Newspapers urged the utmost publicity regarding details of the negotiations between representatives of Nanking and of Tokyo and roundly condemned secret diplomacy. Details of the armistice agreement have not been disclosed. The truce in the Peiping area is entirely local and in no way affects the status of Manchuria and Jehol, a Nanking government spokesman said.

"These issues," the spokesman said, "are in the hands of the League of Nations. Nanking will not sign anything alienating those areas."

Quiet on all fronts was reported in dispatches from zones of activity in the north.

Peiping. (Friday). A last minute hitch was reported to have prevented the signing of a Sino-Japanese armistice at Miyun, thirty-five miles northeast of Peiping.

Tokyo. (Friday).—The foreign office announced that a preliminary truce, called a "formal promise," was concluded orally Thursday at Hwajji, about thirty miles north of Peiping, by Chinese and Japanese military representatives.
