Nebraska Colleges Draw Many Students

High Standing of State Institutions Reflected in the Many Outside Students Enrolled.

Lincoln, Sept. 2.—Nebraska universities and colleges play a more important part in the educational life of the state than do the schools of most other states, it is revealed in a study of a recent pamphlet published by the United States office of education entitled "Residence and Migration of College Students." The survey covered more than 1,000,000 students attending 1,210 institutions.

But two states in the union have a higher percentage of their residents attending college than does Nebraska. The report shows that in Nebraska one out of every 72 persons is attending college. In Florida the ratio is one to 291. The average for the United States is one college student for every 123 persons.

"It is interesting to note," reads the report, "that the 15 states having the largest proportion of students are all west of the Mississippi river."

Of the 19,004 Nebraskans taking full-time college work at the time of the survey, 87.4 per cent thought highly enough of the schools in this state to attend home institutions. The highest percentage of home attendance, 92.5 per cent, was in California. The average for the entire country was 80.3 per cent and in Delaware it was 27.4 per cent.

Nebraska colleges and universities have such a high reputation in other parts of the country that more students come into the state for their college education than leave it for that purpose.

The government report shows that while 2,379 Nebraska students are attending school in other states, a total of 4,168 came into the state for that purpose.

The greater part of the visiting students come from California, Colorado, Iowa, Kansas, Minnesota, Missouri, South Dakota and Wyoming, while the 2,379 Nebraskans travel to California, Colorado, Illinois, Iowa, Kansas, Missouri and New York.

State universities have the greatest appeal to students who wish to attend college within their own state, reveals this report. In Nebraska 87.9 per cent of the students attending the publically controlled state university come from within the state, while the average for the United States is only 82.5 per cent. Within Nebraska publically controlled teachers colleges and normal schools 71.1 per cent of the student body come from Nebraska, while for the entire country the average is 9.2 per cent. Institutions not under public control fail to draw on their home state to as great a percentage as do the public type of school.

University of Nebraska officials, after studying the government report, expressed themselves as very well pleased with the showing that Nebraska and state universities were making, as well as approving the public endorsement of colleges and universities, as proven by the high percentage of Nebraskans who are enrolled in these institutions of higher education.

COUNTY FAIR PATRONS

We have a new department at our Cass county fair next week—a department of antiques, it is called, but I prefer to call it a department of old-fashioned things, and of relics of by-gone days. It will be found in the basement of the Congregational church. Hoping that you may have some interesting exhibits for that department.

Chevies-Packers Winning Teams in Kitty Ball League

League Leaders Have Close Shave with Lowly Rovers, 7 to 6—Packers Beat Orphans.

The customers at the Athletic park Tuesday night had the opportunity of enjoying what turned out to be one of the most exciting games that has been staged on that lot—the game between the Chevies, league leaders and the Rovers, one of the second division teams.

The Chevies had a real scare in the rally of the Rovers in the seventh and owe their victory to the circuit drive of Hubert Dew in their last bats which scored Schutz and Dew himself.

The game opened listless with the Chevies taking a four run lead that they maintained until the seventh when the Rovers stepped out in front for a few moments. Shepherd, pitching for the Rovers gave a nice exhibition and also added a home run for his team.

The crowd was decidedly in favor of the boys from the camp and the veterans of the Chevies had plenty of razzing but played a good steady game to win.

Railroads Deny Extension Drought Relief Rates

Special Rates for Drouth Districts are Not to be Granted in Future—Last Extension Aug. 4

Reduced emergency rates on livestock feed, water and cattle to be shipped to grazing areas will not be extended, the President's Drought Relief committee has been advised by H. G. Taylor, chairman of the Association of Western Railway Executives.

The President's committee on August 17 requested that the emergency reductions be extended. This request was considered at a meeting of the railroad executives in Chicago on August 28. Following this meeting, the committee was notified that the request had been denied. The present reduced rates expire today (September 4th).

Emergency freight tariffs providing reduced rates on hay, coarse grains, livestock feeds and livestock were issued June 2, effective June 4. These reductions were extended each month, the last extension being made on August 4.

The reduced rates applying in the western territory provided a 50 per cent reduction of hay, 33 1/2 per cent reduction on grains and mixed feeds and 50 per cent on water. The reductions also included 85 per cent of the rate on outbound cattle to other grazing areas and 15 per cent of the regular rate on the return movement.

The President's drought committee is composed of Secretary of Agriculture Henry A. Wallace, Chester C. Davis, administrator of the Agricultural Adjustment Act; Harry Hopkins, administrator of the Federal Emergency Relief Administration, and William I. Myers, governor of the Farm Credit Administration.

AIR RACING FATAL TO MANY

Cleveland.—Col. Roscoe Turner, winner of the Thompson trophy race at the national air races, and Maj. James H. Doolittle, winner of the event in 1932, are the only living holders of the award. Doolittle made the fastest speed in any of the six Thompson races.

Lowell Bayles captured the trophy the following year and then on Dec. 5, 1931, crashed while traveling at a speed of approximately 300 miles an hour at the Wayne county airport, Detroit.

Doolittle won in 1932, covering ten laps and 100 miles at a rate of 252.68 miles an hour in his Gee Bee special. James Wedell was second and Turner third.

Last year's winner was Wedell who was killed last June 24 when the small plane in which he was instructing a student crashed near Patterson, La.
