#### THE GARDEN IN JANUARY

There is no better time to begin next summer's garden making than right now, in January. Now one has time to study all the things that go to the making of a garden; colorful seed catalogues, garden magazines, plans of seed houses.

In planning a garden one should take into consideration the plot in which the garden is to be located. Go and look it over; examine it from all angles. Does it face north, south, east, west? A great deal depends upon its location. If possible, send a bit of its soil to the State Agricultural College, State Farm, Lincoln. Someone there will tell you whether or not it is acid soil, whether it is clayey, or whether it contains lime; he will also tell you what to plant in it. Different selections of plants should be made for each type of soil.

Next, examine your plot with regard to its relation to your home; you will want to have your garden in keeping with the architecture of your house.

Make a chart of the whole place and if you have snapshots of your house cut out a house picture and paste it in its place on your map. It is not difficult to make a garden chart according to scale by using paper marked off in squares. On such a chart you can note all trees, fences, rocks, etc., or plan locations for them, if they do not already exist. This is really the first and an important step toward landscaping.

Flowers alone do not always make a garden. A true garden stimulates nature as nearly as it can. Flowers are planted neither in rows nor in stiff round or diamond-shaped beds, but are grouped as nature would group them; there are rocks in the garden, not piled up but laid in ledges, with little creeping, trailing plants between them; a pool with iris and ferns along the borders. A corner in the garden where wild flowers dwell—violets, sweet william, jack-in-the-pulpits.

Such a garden does not mean a great deal of work nor expense. Just a little work each week.

Remember that a path must always lead somewhere; and a curved and winding path has a certain element of expectation in it that is desirable. If the garden is large, make the path twist and turn, with a seat here, a bird bath there, a group of shrubbery, a rockery at other points. If the garden is small, make the path at one side, curving it so that it becomes a boundary for an old-fashioned border of perennials.

With this planning you can start your garden-book. In it note the flowers and plants you wish to know more intimately, changes you wish to make in your garden, shrubs which need attention when pruning time comes, dates when certain plants are set out and the depth they should be planted, garden notes, names and addresses of seed houses.

#### SOCIAL WORKERS FLOWER CLUB

The Social Workers Flower club met on Wednesday afternoon at the home of Mrs. John Kaufmann, south of the city, where a large group of the ladies gathered to enjoy the occasion.

The meeting was presided over by Mrs. Jack Stamp, president of the club and after the devotional period the club took up the active business.

The treasurer of the club reported that all bills had been paid and the ladies secured a neat sum from the lunch served at the likewise sale, giving them a fine balance in their treasury.

The afternoon was closed by the hostess serving a dainty two-course luncheon that was very much enjoyed by all of the members of the club.

The next meeting will be on Tuesday, February 12th at the home of Mrs. Mike Kaffenberger with Mrs. Walter Martin as associate hostess.

#### New Kidneys

If you could trade your neglected, tired and lazy kidneys for new ones, you would automatically get rid of Night Blindness, Nervousness, Dizziness, Rheumatism, Burning, Itching and Acidity. To correct functional kidney disorders, try the guaranteed Doctor's special prescription called CYSTEX (Sine-Tax). Must fit you up in 3 days or money back. At all drug stores.

The dose of a liquid laxative can be varied to suit the needs of the individual. The action can thus be regulated. A child is easily given the right dose. And mild liquid laxatives do not irritate the kidneys.

Doctors are generally agreed that senna is a natural laxative. It does not drain the system like the cathartics that leave you so thirsty. Dr. Caldwell's Syrup Pepsin is a liquid laxative which relies on senna for its laxative action. It gently helps the average person's constipated bowels until nature restores their regularity.

You can always get Dr. Caldwell's Syrup Pepsin at any drug store, ready for use.
