Last week Wm. Sporer who has been visiting in California at the homes of two sisters for the past three weeks and as well seeing the great show on the coast, arrived home and was pleased the home city of Murray was here when he came, for it looked good to him. Mr. Sporer tells of the bridge which is being constructed from San Francisco to Oakland across the bay which is some four miles in length and fortunately there is an island about midway which makes the building of the bridge less than it would be otherwise. Mr. Sporer says the country is very dry out that way and the only way of growing crops is by irrigation.

**Another View of the Matter.**
